

# Contents

Preface.....	vii
--------------	-----

Contents .....	xi
----------------	----

<b>1 Basic Notions .....</b>	<b>1</b>
------------------------------	----------

1.1	Object Recognition .....	1
1.2	Pattern Similarity and PR Tasks .....	2
1.2.1	Pattern Classification .....	3
1.2.2	Pattern Regression .....	6
1.2.3	Pattern Description .....	8
1.3	Classes, Patterns and Features.....	9
1.4	PR Approaches .....	13
1.4.1	Data Clustering .....	14
1.4.2	Statistical Classification .....	14
1.4.3	Neural Networks.....	15
1.4.4	Structural PR.....	16
1.5	PR Project .....	16
1.5.1	Project Tasks .....	16
1.5.2	Training and Testing .....	18
1.5.3	PR Software .....	18
	Bibliography .....	20

<b>2 Pattern Discrimination .....</b>	<b>21</b>
---------------------------------------	-----------

2.1	Decision Regions and Functions .....	21
2.1.1	Generalized Decision Functions .....	23
2.1.2	Hyperplane Separability.....	26
2.2	Feature Space Metrics .....	29
2.3	The Covariance Matrix .....	33
2.4	Principal Components .....	39
2.5	Feature Assessment .....	41
2.5.1	Graphic Inspection .....	42

2.5.2	Distribution Model Assessment.....	43
2.5.3	Statistical Inference Tests.....	44
2.6	The Dimensionality Ratio Problem.....	46
	Bibliography .....	49
	Exercises.....	49
<b>3</b>	<b>Data Clustering .....</b>	<b>53</b>
3.1	Unsupervised Classification.....	53
3.2	The Standardization Issue .....	55
3.3	Tree Clustering.....	58
3.3.1	Linkage Rules .....	60
3.3.2	Tree Clustering Experiments .....	63
3.4	Dimensional Reduction .....	65
3.5	K-Means Clustering.....	70
3.6	Cluster Validation .....	73
	Bibliography .....	76
	Exercises.....	77
<b>4</b>	<b>Statistical Classification .....</b>	<b>79</b>
4.1	Linear Discriminants.....	79
4.1.1	Minimum Distance Classifier.....	79
4.1.2	Euclidian Linear Discriminants.....	82
4.1.3	Mahalanobis Linear Discriminants.....	85
4.1.4	Fisher's Linear Discriminant.....	88
4.2	Bayesian Classification .....	90
4.2.1	Bayes Rule for Minimum Risk.....	90
4.2.2	Normal Bayesian Classification .....	97
4.2.3	Reject Region.....	103
4.2.4	Dimensionality Ratio and Error Estimation .....	105
4.3	Model-Free Techniques .....	108
4.3.1	The Parzen Window Method.....	110
4.3.2	The K-Nearest Neighbours Method .....	113
4.3.3	The ROC Curve .....	116
4.4	Feature Selection .....	121
4.5	Classifier Evaluation.....	126
4.6	Tree Classifiers .....	130
4.6.1	Decision Trees and Tables .....	130
4.6.2	Automatic Generation of Tree Classifiers .....	136
4.7	Statistical Classifiers in Data Mining .....	138
	Bibliography .....	140
	Exercises.....	142

<b>5</b>	<b>Neural Networks.....</b>	<b>147</b>
5.1	LMS Adjusted Discriminants .....	147
5.2	Activation Functions .....	155
5.3	The Perceptron Concept.....	159
5.4	Neural Network Types.....	167
5.5	Multi-Layer Perceptrons .....	171
5.5.1	The Back-Propagation Algorithm .....	172
5.5.2	Practical aspects .....	175
5.5.3	Time Series .....	181
5.6	Performance of Neural Networks.....	184
5.6.1	Error Measures .....	184
5.6.2	The Hessian Matrix .....	186
5.6.3	Bias and Variance in NN Design.....	189
5.6.4	Network Complexity .....	192
5.6.5	Risk Minimization .....	199
5.7	Approximation Methods in NN Training .....	201
5.7.1	The Conjugate-Gradient Method .....	202
5.7.2	The Levenberg-Marquardt Method .....	205
5.8	Genetic Algorithms in NN Training.....	207
5.9	Radial Basis Functions .....	212
5.10	Support Vector Machines.....	215
5.11	Kohonen Networks.....	223
5.12	Hopfield Networks .....	226
5.13	Modular Neural Networks .....	231
5.14	Neural Networks in Data Mining .....	235
	Bibliography .....	237
	Exercises.....	239
<b>6</b>	<b>Structural Pattern Recognition.....</b>	<b>243</b>
6.1	Pattern Primitives .....	243
6.1.1	Signal Primitives.....	243
6.1.2	Image Primitives.....	245
6.2	Structural Representations .....	247
6.2.1	Strings .....	247
6.2.2	Graphs .....	248
6.2.3	Trees .....	249
6.3	Syntactic Analysis .....	250
6.3.1	String Grammars.....	250
6.3.2	Picture Description Language.....	253
6.3.3	Grammar Types .....	255
6.3.4	Finite-State Automata .....	257
6.3.5	Attributed Grammars.....	260
6.3.6	Stochastic Grammars .....	261

6.3.7	Grammatical Inference .....	264
6.4	Structural Matching .....	265
6.4.1	String Matching .....	265
6.4.2	Probabilistic Relaxation Matching .....	271
6.4.3	Discrete Relaxation Matching .....	274
6.4.4	Relaxation Using Hopfield Networks.....	275
6.4.5	Graph and Tree Matching .....	279
	Bibliography .....	283
	Exercises.....	285
 <b>Appendix A – CD Datasets .....</b>		<b>291</b>
A.1	Breast Tissue .....	291
A.2	Clusters .....	292
A.3	Cork Stoppers .....	292
A.4	Crimes .....	293
A.5	Cardiotocographic Data .....	293
A.6	Electrocardiograms .....	294
A.7	Foetal Heart Rate Signals .....	295
A.8	FHR-Apgar .....	295
A.9	Firms .....	296
A.10	Foetal Weight .....	296
A.11	Food .....	297
A.12	Fruits .....	297
A.13	Impulses on Noise.....	297
A.14	MLP Sets.....	298
A.15	Norm2c2d.....	298
A.16	Rocks .....	299
A.17	Stock Exchange .....	299
A.18	Tanks .....	300
A.19	Weather.....	300
 <b>Appendix B – CD Tools.....</b>		<b>301</b>
B.1	Adaptive Filtering .....	301
B.2	Density Estimation .....	301
B.3	Design Set Size.....	302
B.4	Error Energy.....	303
B.5	Genetic Neural Networks .....	304
B.6	Hopfield network .....	306
B.7	k-NN Bounds .....	308
B.8	k-NN Classification.....	308
B.9	Perceptron.....	309

B.10 Syntactic Analysis .....	309
<b>Appendix C - Orthonormal Transformation .....</b>	<b>311</b>
<b>Index .....</b>	<b>315</b>

Pattern Recognition

Concepts, Methods and Applications

Marques de Sá, J.P.

2001, XIX, 318 p. With CD-ROM., Hardcover

ISBN: 978-3-540-42297-6
