

## Table of Contents

<b>1. What MAPLE Can Do for You</b>	1
1.1 Arithmetic	1
1.2 Numerical Computations	1
1.3 Polynomials and Rational Functions	2
1.4 Trigonometry	3
1.5 Differentiation	4
1.6 Truncated Series Expansions	4
1.7 Differential Equations and Systems	5
1.8 Integration	6
1.9 Plot of Curves	7
1.10 Plot of Surfaces	9
1.11 Linear Algebra	10
<b>2. Introduction</b>	11
2.1 First Steps	11
2.1.1 Keyboarding an Expression	11
2.1.2 Operators, Functions and Constants	13
2.1.3 First Computations	14
2.2 Assignment and Evaluation	16
2.2.1 Identifiers	16
2.2.2 Assignment	16
2.2.3 Free Variables and Evaluation	17
2.2.4 Full Evaluation Rule	19
2.2.5 Use of Apostrophes: Partial Evaluation	20
2.2.6 Evaluation of Function Arguments	22
2.3 Fundamental Operations	23
2.3.1 The Function <code>expand</code>	24
2.3.2 The Function <code>factor</code>	25
2.3.3 The Function <code>normal</code>	27
2.3.4 The Function <code>convert</code> in Trigonometry	28
2.3.5 First Approach to the Function <code>simplify</code>	29
2.3.6 Simplification of Radicals: <code>radnormal</code> and <code>rationalize</code>	33
2.3.7 The Functions <code>collect</code> and <code>sort</code>	34

2.4	First Approach to Functions .....	37
2.4.1	Functions of One Variable .....	37
2.4.2	Functions of Several Variables .....	38
2.4.3	The Difference Between Functions and Expressions ...	39
2.4.4	Links Between Expressions and Functions .....	40
2.5	Simplification of Power Functions .....	41
2.5.1	The Functions <code>exp</code> , <code>ln</code> and the Exponentiation Operator .....	41
2.5.2	The Function <code>simplify</code> .....	44
2.5.3	The Function <code>combine</code> .....	47
<b>3.</b>	<b>Arithmetic</b> .....	49
3.1	Divisibility .....	49
3.1.1	Quotient and Remainder .....	49
3.1.2	G.c.d. and Euclid's Algorithm .....	50
3.1.3	Decomposition into Prime Factors .....	52
3.1.4	Congruences .....	52
3.2	Diophantian Equations .....	54
3.2.1	Chinese Remainder Theorem .....	54
3.2.2	Solution of Equations Modulo $n$ .....	54
3.2.3	Classical Equations .....	55
<b>4.</b>	<b>Real Numbers, Complex Numbers</b> .....	57
4.1	The Real Numbers .....	57
4.1.1	Display of Real Numbers .....	57
4.1.2	Approximate Decimal Value of Real Numbers .....	59
4.2	The Complex Numbers .....	62
4.2.1	The Different Types of Complex Numbers .....	62
4.2.2	Algebraic Form of the Complex Numbers .....	63
4.2.3	Trigonometric Form of the Complex Numbers .....	65
4.2.4	Computing with Expressions with Complex Coefficients .....	65
4.2.5	Approximate Decimal Value of the Complex Numbers	67
<b>5.</b>	<b>Two-Dimensional Graphics</b> .....	69
5.1	Curves Defined by an Equation $y = f(x)$ .....	69
5.1.1	Graphic Representation of an Expression .....	69
5.1.2	Graphic Representation of a Function .....	71
5.1.3	Simultaneous Plot of Several Curves .....	73
5.1.4	Plot of a Family of Curves .....	73
5.2	The Environment of <code>plot</code> .....	75
5.2.1	The <code>plot</code> Menu in Windows .....	76
5.2.2	The Options of <code>plot</code> .....	77
5.3	Parametrized Curves in Cartesian Coordinates .....	82
5.3.1	Plot of a Parametrized Curve .....	82

5.3.2	Simultaneous Plot of Several Parametrized Curves . . . .	83
5.3.3	Plot of a Family of Parametrized Curves . . . . .	84
5.4	Curves in Polar Coordinates . . . . .	86
5.4.1	Plot of a Curve in Polar Coordinates . . . . .	86
5.4.2	Plot of a Family of Curves in Polar Coordinates . . . . .	88
5.5	Curves Defined Implicitly . . . . .	89
5.5.1	Plot of a Curve Defined Implicitly . . . . .	89
5.5.2	Plot of a Family of Implicit Curves . . . . .	90
5.5.3	Precision of the Plot of Implicit Curves . . . . .	91
5.6	Polygonal Plots . . . . .	92
5.7	Mixing Drawings . . . . .	92
5.7.1	How Does <code>plot</code> Work . . . . .	93
5.7.2	The Function <code>display</code> . . . . .	93
5.8	Animation . . . . .	94
5.9	Using Logarithmic Scales . . . . .	97
<b>6.</b>	<b>Equations and Inequations . . . . .</b>	<b>99</b>
6.1	Symbolic Solution: <code>solve</code> . . . . .	99
6.1.1	Univariate Polynomial Equations . . . . .	99
6.1.2	Other Equations in One Variable . . . . .	103
6.1.3	Systems of Equations . . . . .	105
6.1.4	Inequations . . . . .	107
6.2	Approximate Solution of Equations: <code>fsolve</code> . . . . .	108
6.2.1	Algebraic Equations in One Variable . . . . .	108
6.2.2	Other Equations in One Variable . . . . .	109
6.2.3	Systems of Equations . . . . .	110
6.3	Solution of Recurrences: <code>rsolve</code> . . . . .	112
6.3.1	Linear Recurrences . . . . .	112
6.3.2	Homographic Recurrences . . . . .	114
6.3.3	Other Recurrence Relations . . . . .	115
<b>7.</b>	<b>Limits and Derivatives . . . . .</b>	<b>117</b>
7.1	Limits . . . . .	117
7.1.1	Limit of Expressions . . . . .	117
7.1.2	Limit of Expressions Depending on Parameters . . . . .	119
7.1.3	Limit of Functions . . . . .	121
7.2	Derivatives . . . . .	122
7.2.1	Derivatives of Expressions in a Single Variable . . . . .	122
7.2.2	Partial Derivatives of Expressions in Several Variables . . . . .	123
7.2.3	Derivatives of Functions in One Variable . . . . .	124
7.2.4	Partial Derivatives of Functions in Several Variables . . . . .	125

<b>8. Truncated Series Expansions</b>	127
8.1 The Function <b>series</b>	127
8.1.1 Obtaining Truncated Series Expansions	127
8.1.2 Generalized Series Expansions	129
8.1.3 Regular Part of a Series Expansion	130
8.1.4 Obtaining an Equivalent	131
8.1.5 Limits of the Function <b>series</b>	132
8.2 Operations on Truncated Series Expansions	133
8.2.1 Sums, Quotients, Products of Truncated Series Expansions	133
8.2.2 Compositions and Inverses of Truncated Series Expansions	134
8.2.3 Integration of a Truncated Series Expansion	135
8.3 Series Expansion of an Implicit Function	136
<b>9. Differential Equations</b>	141
9.1 Methods for Solving Exactly	141
9.1.1 Differential Equations of Order 1	141
9.1.2 Differential Equations of Higher Order	144
9.1.3 Classical Equations	146
9.1.4 Systems of Differential Equations	147
9.2 Methods for Approximate Solutions	149
9.2.1 Numerical Solution of an Equation of Order 1	149
9.2.2 Numerical Solution of an Equation of Higher Order	151
9.2.3 Computing a Truncated Series Expansion of the Solution	154
9.3 Methods to Solve Graphically	155
9.3.1 Differential Equation of Order 1	155
9.3.2 The Options of <b>DEplot</b> for a Differential Equation	156
9.3.3 Differential Equation of Order $n$	157
9.3.4 Necessity of the Option <b>stepsize</b>	158
9.3.5 Differential System of Order 1	158
9.3.6 Study of an Example	160
<b>10. Integration and Summation</b>	163
10.1 Integration	163
10.1.1 Exact Computation of Definite and Indefinite Integrals	163
10.1.2 Generalized Integrals	165
10.1.3 Inert Form <b>Int</b>	166
10.1.4 Numerical Evaluation of Integrals	167
10.2 Operations on Unevaluated Integrals	168
10.2.1 Integration by Parts	168
10.2.2 Variable Substitution in an Integral	170

10.2.3	Differentiation Under the Integral Sign . . . . .	171
10.2.4	Truncated Series Expansion of an Indefinite Integral . .	173
10.3	Discrete Summation . . . . .	174
10.3.1	Indefinite Sums . . . . .	174
10.3.2	Finite Sums . . . . .	176
<b>11.</b>	<b>Three-Dimensional Graphics . . . . .</b>	<b>179</b>
11.1	Surfaces Defined by an Equation $z = f(x, y)$ . . . . .	179
11.1.1	Plot of a Surface Defined by an Expression . . . . .	179
11.1.2	Plot of a Surface Defined by a Function . . . . .	181
11.1.3	Simultaneous Plot of Several Surfaces . . . . .	182
11.2	The Environment of <code>plot3d</code> . . . . .	183
11.2.1	The Menu of <code>plot3d</code> in Windows . . . . .	183
11.2.2	The Options of <code>plot3d</code> . . . . .	185
11.3	Surface Patches Parametrized in Cartesian Coordinates . . . .	189
11.4	Surfaces Patches Parametrized in Cylindrical Coordinates . .	190
11.5	Surface Patches Parametrized in Spherical Coordinates . . . .	192
11.6	Parametrized Space Curves . . . . .	193
11.6.1	Plot of a Parametrized Curve . . . . .	193
11.6.2	Simultaneous Plot of Several Parametrized Curves . . .	194
11.7	Surfaces Defined Implicitly . . . . .	194
11.8	Mixing Plots from Different Origins . . . . .	196
<b>12.</b>	<b>Polynomials with Rational Coefficients . . . . .</b>	<b>199</b>
12.1	Writing Polynomials . . . . .	199
12.1.1	Reminders: <code>collect</code> , <code>sort</code> , <code>expand</code> . . . . .	199
12.1.2	Indeterminates of a Polynomial . . . . .	201
12.1.3	Value of a Polynomial at a Point . . . . .	202
12.2	Coefficients of a Polynomial . . . . .	202
12.2.1	Degree and Low Degree . . . . .	202
12.2.2	Obtaining the Coefficients . . . . .	204
12.3	Divisibility . . . . .	205
12.3.1	The Function <code>divide</code> . . . . .	205
12.3.2	Euclidean Division . . . . .	207
12.3.3	Resultant and Discriminant . . . . .	208
12.4	Computation of the g.c.d. and the l.c.m. . . . .	209
12.4.1	The Functions <code>gcd</code> and <code>lcm</code> . . . . .	209
12.4.2	Content and Primitive Part . . . . .	210
12.4.3	Extended Euclid's Algorithm: The Function <code>gcdex</code> . .	212
12.5	Factorization . . . . .	213
12.5.1	Decomposition into Irreducible Factors . . . . .	213
12.5.2	Square-Free Factorization . . . . .	214
12.5.3	Irreducibility Test . . . . .	215

<b>13. Polynomials with Irrational Coefficients</b>	217
13.1 Algebraic Extensions of $\mathbb{Q}$	217
13.1.1 Irreducibility Test	218
13.1.2 Roots of a Polynomial	218
13.1.3 The Function <code>RootOf</code>	219
13.1.4 Numerical Values of Expressions Containing <code>RootOf</code> 's	222
13.1.5 Conversion of <code>RootOf</code> Into Radicals	225
13.2 Computation Over an Algebraic Extension	226
13.2.1 Factorization Over a Given Extension	226
13.2.2 Incompatibility Between Radicals and <code>RootOf</code>	227
13.2.3 Irreducibility, Roots Over a Given Extension	229
13.2.4 Factorization of a Polynomial Over Its Splitting Field	229
13.2.5 Divisibility of Polynomials with Algebraic Coefficients	230
13.2.6 G.c.d. of Polynomials with Algebraic Coefficients	231
13.3 Polynomials with Coefficients in $\mathbb{Z}/p\mathbb{Z}$	233
13.3.1 Basic Polynomial Computations in $\mathbb{Z}/p\mathbb{Z}$	233
13.3.2 Divisibility of Polynomials in $\mathbb{Z}/p\mathbb{Z}$	234
13.3.3 Computation of the G.c.d. of Polynomials in $\mathbb{Z}/p\mathbb{Z}$	235
13.3.4 Euclidean Division, Extended Euclid's Algorithm	235
13.3.5 Factorization of the Polynomials in $\mathbb{Z}/p\mathbb{Z}$	236
<b>14. Rational Functions</b>	239
14.1 Writing of the Rational Functions	239
14.1.1 Irreducible Form	239
14.1.2 Numerator and Denominator	240
14.2 Factorization of the Rational Functions	241
14.2.1 Rational Functions with Rational Coefficients	241
14.2.2 Rational Functions with Any Coefficients	242
14.2.3 Factorization Over an Algebraic Extension	242
14.3 Partial Fraction Decomposition	243
14.3.1 Decomposition of a Rational Function Over $\mathbb{Q}(x)$	243
14.3.2 Decomposition Over $\mathbb{R}(x)$ or Over $\mathbb{C}(x)$	244
14.3.3 Decomposition of a Rational Function with Parameters	247
14.4 Continued Fraction Series Expansions	248
<b>15. Construction of Vectors and of Matrices</b>	251
15.1 The <code>linalg</code> Library	251
15.2 Vectors	252
15.2.1 Definition of the Vectors	252
15.2.2 Dimension and Components of a Vector	254
15.3 Matrices	255
15.3.1 Definition of Matrices	255
15.3.2 Dimensions and Coefficients of a Matrix	257

15.4 Problems of Evaluation .....	258
15.4.1 Evaluation of Vectors .....	258
15.4.2 Evaluation of the Matrices.....	260
15.4.3 Example of Use of Matrices of Variable Size .....	261
15.5 Special Matrices .....	263
15.5.1 Diagonal Matrix and Identity Matrix .....	263
15.5.2 Tri-Diagonal or Multi-Diagonal Matrix .....	263
15.5.3 Vandermonde Matrix .....	264
15.5.4 Hilbert Matrix .....	265
15.5.5 Sylvester Matrix and Bézout Matrix .....	265
15.5.6 Matrix of a System of Equations .....	266
15.6 Random Vectors and Matrices .....	266
15.6.1 Random Vectors .....	266
15.6.2 Random Matrices .....	267
15.7 Functions to Extract Matrices.....	268
15.7.1 Submatrices .....	268
15.7.2 Column Vector and Row Vector .....	269
15.8 Constructors of Matrices .....	270
15.8.1 Block-Diagonal Matrices .....	270
15.8.2 Blockmatrices.....	271
15.8.3 Juxtaposition and Stack of Matrices .....	272
15.8.4 Copying a Matrix Into Another .....	273
<b>16. Vector Analysis and Matrix Calculus .....</b>	<b>275</b>
16.1 Operations upon Vectors and Matrices .....	275
16.1.1 Linear Combinations of Vectors .....	275
16.1.2 Linear Combination of Matrices .....	277
16.1.3 Transposition of Matrices and of Vectors .....	278
16.1.4 Product of a Matrix by a Vector .....	279
16.1.5 Product of Matrices .....	279
16.1.6 Inverse of a Matrix .....	281
16.1.7 Powers of Square Matrices.....	282
16.2 Basis of a Vector Subspace .....	283
16.2.1 Subspace Defined by Generators.....	283
16.2.2 Kernel of a Matrix .....	284
16.2.3 Subspace Generated by the Lines of a Matrix .....	284
16.2.4 Subspace Defined by Equations .....	285
16.2.5 Intersection and Sum of Vector Subspaces .....	286
16.2.6 Rank of a Matrix.....	286
16.2.7 Evaluation Problem .....	287
16.2.8 An Exercise About the Commuting Matrices.....	288

<b>17. Systems of Linear Equations</b> .....	291
17.1 Solution of a Linear System .....	291
17.1.1 Linear System Given in Matrix Form .....	291
17.1.2 Linear System Specified by Equations .....	294
17.2 The Pivot's Method .....	296
17.2.1 Operations on the Rows and the Columns of a Matrix	296
17.2.2 The Function <code>pivot</code> .....	297
17.2.3 Gaussian Elimination: The Function <code>gausselim</code> .....	298
17.2.4 Gaussian Elimination Without Denominator: <code>ffgausselim</code> .....	300
17.2.5 Optional Parameters of <code>gausselim</code> and <code>ffgausselim</code>	301
17.2.6 Gauss–Jordan Elimination .....	302
<b>18. Normalization of Matrices</b> .....	305
18.1 Determinant, Characteristic Polynomial .....	305
18.1.1 Determinant of a Matrix .....	305
18.1.2 Characteristic Matrix and Characteristic Polynomial ..	306
18.1.3 Minimal Polynomial of a Matrix .....	307
18.2 Eigenvalues and Eigenvectors of a Matrix .....	308
18.2.1 Eigenvalues .....	308
18.2.2 Eigenvectors, Diagonalization .....	310
18.2.3 Testing if a Matrix Can Be Diagonalized .....	312
18.2.4 Matrices That Have an Element of Type <code>float</code> .....	313
18.2.5 The Inert Function <code>Eigenvals</code> .....	314
18.2.6 Normalization to the Jordan Form .....	315
<b>19. Orthogonality</b> .....	319
19.1 Euclidean and Hermitean Vector Spaces .....	319
19.1.1 Scalar Product, Hermitean Scalar Product .....	319
19.1.2 Norm .....	321
19.1.3 Cross Product .....	321
19.1.4 Gram–Schmidt Orthogonalization .....	321
19.1.5 Positive Definite and Positive Semidefinite Real Symmetric Matrices .....	323
19.1.6 Hermitian Transpose of a Matrix .....	324
19.1.7 Orthogonal Matrix .....	325
19.1.8 Normalization of Real Symmetric Matrices .....	325
19.2 Orthogonal Polynomials .....	326
19.2.1 Chebyshev Polynomials of the First Kind .....	326
19.2.2 Chebyshev Polynomials of the Second Kind .....	327
19.2.3 Hermite Polynomials .....	327
19.2.4 Laguerre Polynomials .....	328
19.2.5 Legendre and Jacobi Polynomials .....	329
19.2.6 Gegenbauer Polynomials .....	329

<b>20. Vector Analysis</b>	331
20.1 Jacobian Matrix, Divergence	331
20.1.1 Jacobian Matrix	331
20.1.2 Divergence of a Vector Field	332
20.2 Gradient, Laplacian, Curl	333
20.2.1 Gradient	333
20.2.2 Laplacian	333
20.2.3 Hessian Matrix	335
20.2.4 Curl of a Vector Field of $\mathbb{R}^3$	336
20.3 Scalar Potential, Vector Potential	336
20.3.1 Scalar Potential of a Vector Field	336
20.3.2 Vector Potential of a Vector Field	337
<b>21. The MAPLE Objects</b>	339
21.1 Basic Expressions	339
21.1.1 The Types <code>+</code> , <code>*</code> and <code>^</code>	339
21.1.2 The Functions <code>whattype</code> , <code>op</code> and <code>nops</code>	339
21.1.3 The Type <code>function</code>	341
21.1.4 Structure of Basic Mathematical Expressions	342
21.2 Real and Complex Numerical Values	343
21.2.1 The Values of Type <code>numeric</code>	344
21.2.2 The Values of Type <code>realcons</code>	346
21.2.3 The Complex Values	348
21.3 Expression Sequences	349
21.3.1 The Function <code>seq</code>	350
21.3.2 The Operator <code>\$</code>	351
21.3.3 Sequence of Results	351
21.3.4 Sequence of Components of an Expression	352
21.3.5 Sequence of Parameters of a Procedure	352
21.4 Ranges	353
21.5 Sets and Lists	355
21.5.1 The Operators <code>{ }</code> and <code>[ ]</code>	355
21.5.2 Operations Upon the Sets	357
21.5.3 Operations on Lists	358
21.5.4 Extraction	359
21.5.5 Back to the Function <code>seq</code>	360
21.6 Unevaluated Integrals	361
21.7 Polynomials	361
21.8 Truncated Series Expansions	364
21.8.1 Taylor Series Expansions	364
21.8.2 Other Series Expansions	365
21.9 Boolean Relations	366
21.9.1 The Type <code>relation</code>	366
21.9.2 The Type <code>boolean</code>	367

21.10 Tables and Arrays .....	368
21.10.1 Tables .....	368
21.10.2 Tables, Indexed Variables .....	370
<b>22. Working More Cleverly with the Subexpressions .....</b>	<b>373</b>
22.1 The Substitution Functions .....	373
22.1.1 The Function <code>subs</code> .....	373
22.1.2 The Function <code>subsop</code> .....	377
22.2 The Function <code>map</code> .....	378
22.2.1 Using <code>map</code> with a Function Which Has a Single Argument .....	378
22.2.2 Using <code>map</code> with a Function of Several Arguments .....	380
22.2.3 Using <code>map</code> Upon a Sequence .....	381
22.2.4 Avoiding the Use of <code>map</code> .....	382
<b>23. Programming: Loops and Branches .....</b>	<b>385</b>
23.1 Loops .....	385
23.1.1 <code>for</code> Loop with a Numerical Counter .....	385
23.1.2 <code>for</code> Loop Upon Operands .....	387
23.1.3 How to Write a Loop That Spans Several Lines .....	388
23.1.4 Echo of the Instructions of a Loop .....	389
23.1.5 Nested Loops and Echo on the Screen: <code>printlevel</code> ...	390
23.1.6 Avoiding <code>for</code> Loops .....	391
23.1.7 <code>while</code> Loop .....	392
23.2 Branches .....	394
23.2.1 The Conditional Branch: <code>if ... then ... elif ... else</code> .....	394
23.2.2 <code>next</code> and <code>break</code> .....	396
23.2.3 MAPLE's Three-State-Logic .....	397
<b>24. Programming: Functions and Procedures .....</b>	<b>399</b>
24.1 Functions .....	399
24.1.1 Definition of a Simple Function .....	399
24.1.2 Use of a Function .....	400
24.1.3 Function Using Tests .....	401
24.1.4 Evaluation Problem for a Function .....	404
24.1.5 Number of Arguments Passed on to a Function .....	404
24.1.6 Other Ways to Write a Function .....	406
24.1.7 Particular Values: <code>remember</code> Table .....	407
24.2 Procedures .....	409
24.2.1 Definition of a Procedure .....	409
24.2.2 Local Variables and Global Variables .....	411
24.2.3 Recursive Procedures .....	416

24.2.4	<b>remember</b> Table Versus Recursion . . . . .	417
24.2.5	Structure of an Object Function or Procedure . . . . .	419
24.3	About Passing Parameters . . . . .	420
24.3.1	Automatic Verification of the Types of Arguments . . . .	420
24.3.2	Testing the Number and the Kind of Arguments Which Are Passed . . . . .	420
24.3.3	How to Test a Type . . . . .	421
24.3.4	Procedure Modifying the Value of Some Parameters . .	423
24.3.5	Procedure with a Variable Number of Arguments . . . .	425
24.3.6	Procedure with an Unspecified Number of Arguments	426
24.4	Follow-up of the Execution of a Procedure . . . . .	427
24.4.1	The Variable <b>printlevel</b> . . . . .	427
24.4.2	The Functions <b>userinfo</b> and <b>infolevel</b> . . . . .	429
24.5	Save and Reread a Procedure . . . . .	431
<b>25.</b>	<b>The Mathematical Functions</b> . . . . .	<b>433</b>
25.1	Catalogue of Mathematical Functions . . . . .	433
25.1.1	Arithmetical Functions . . . . .	434
25.1.2	Counting Functions and $\Gamma$ Function . . . . .	434
25.1.3	Exponentials, Logarithms and Hypergeometric Function . . . . .	435
25.1.4	Circular and Hyperbolic Trigonometric Functions . . . .	435
25.1.5	Inverse Trigonometric Functions . . . . .	436
25.1.6	Integral Exponential and Related Functions . . . . .	437
25.1.7	Bessel Functions . . . . .	438
25.1.8	Elliptic Functions . . . . .	440
25.2	How Does a MAPLE Function Work? . . . . .	441
25.2.1	Numerical Return Values . . . . .	441
25.2.2	An Example: The Function <b>arcsin</b> . . . . .	441
25.2.3	Case of the Functions <b>builtin</b> . . . . .	444
25.2.4	<b>remember</b> Table . . . . .	444
<b>26.</b>	<b>Maple Environment in Windows</b> . . . . .	<b>447</b>
26.1	The MAPLE Worksheet . . . . .	447
26.1.1	Text and Maple-input Modes . . . . .	448
26.1.2	Groups and Sections . . . . .	449
26.1.3	The Menu Bar . . . . .	450
26.2	The File Menu . . . . .	451
26.3	The Edit Menu . . . . .	453
26.4	The View Menu . . . . .	454
26.5	The Insert Menu . . . . .	456
26.6	The Format Menu . . . . .	457
26.7	The Options Menu . . . . .	458
26.8	The Window Menu . . . . .	459

26.9 On-line Help ..... 460

    26.9.1 The Help Menu ..... 460

    26.9.2 Accessing the On-line Help Directly..... 460

    26.9.3 Structure of a Help Page ..... 461

**Index** ..... 463

An Introduction to Maple V

Cornil, J.-M.; Testud, P.

2001, XX, 470 p. 37 illus., Softcover

ISBN: 978-3-540-66442-0
