Author Index

XIII

Part 1

Keynote Lectures

Micro fabrication for process intensification <i>W. Ehrfeld, U. Ehrfeld</i>	3
Microstructures for smart reactors: Precision performance in industrial production <i>M. Matlosz, S. Rode, J.-M. Commenge</i>	13

Part 2

Design and Production of Microreactor Devices and Systems

Lecture Session

Microfluidics and microtechnology for microreactor systems <i>N.R. Tas, R.E. Oosterbroek, T.T. Veenstra, M. Elwenspoek, A. van den Berg</i>	25
Micromachined straight-through silicon microchannel array for mono-dispersed microspheres <i>I. Kobayashi, M. Nakajima, Y. Kikuchi, K. Chun, H. Fujita</i>	41
Development of a cooled microreactor for platinum catalyzed ammonia oxidation <i>E.V. Rebrov, M.H.J.M. de Croon, J.C. Schouten</i>	49
Microchemical systems for direct fluorination of aromatics <i>N. de Mas, R.J. Jackman, M.A. Schmidt, K.F. Jensen</i>	60
Design, fabrication and experimental study of new compact mini heat-exchangers <i>L. Luo, B. Hoareau, U. D'Ortona, D. Tondeur, H. Le Gall, S. Corbel</i>	68
Poster Session	
Development of a self-heating catalytic microreactor <i>K. Kusakabe, D. Miyagawa, Y. Gu, H. Maeda, S. Morooka</i>	70

Preparation of microchannel palladium membranes by electrolysis <i>K. Kusakabe, M. Takahashi, H. Maeda, S. Morooka</i>	78
Heating concepts for ceramic microreactors <i>R. Knitter, R. Lurk, M. Rohde, S. Stolz, V. Winter</i>	86
Design and fabrication of zeolite-containing microstructures <i>Y.S.S. Wan, J.L.H. Chau, A. Gavrilidis, K.L. Yeung</i>	94
New process for manufacturing ceramic microfluidic devices for microreactor and bioanalytical applications <i>C. Provin, S. Monneret, H. Le Gall, H. Rigneault, P.-F. Lenne, H. Giovannini</i>	103
Macroscale production of microsystems <i>M. Schreiber, C.M. Hagg, U. Schubert, A.H. Whitehead</i>	113

Part 3

Mathematical Modelling and Systems Analysis for Microreaction Technology and Bioanalytical Devices

Lecture Session

Prediction of the potential of microreactors for heterogeneously catalysed gas phase reactions <i>T. Stief, O.-U. Langer</i>	121
--	-----

Poster Session

Microchannel reactors for kinetic measurement: Influence of diffusion and dispersion on experimental accuracy <i>J.M. Commenge, L. Falk, J.P. Corriou, M. Matlosz</i>	131
A vertically-averaged formulation of wall catalytic reactions in microchannel flows: single isothermal & non-isothermal reactions <i>D. Gobby, I. Eames, A. Gavrilidis</i>	141

Part 4

Characterization of Microstructured Unit Operation and Reaction Modules

Lecture Session

Intensification in microstructured unit operations: Performance comparison between mega and microscale <i>A.R. Oroskar, K.M. VandenBussche, S.F. Abdo</i>	153
---	-----

A new microstructure device for fast temperature cycling for chemical reactions <i>J. Brandner, M. Fichtner, K. Schubert, M.A. Liauw, G. Emig</i>	164
Photochemical reactions and online product detection in microfabricated reactors <i>H. Lu, M.A. Schmidt, K.F. Jensen</i>	175
Chaotic mixing in electrokinetically and pressure driven micro flows <i>Y.-K. Lee, J. Deval, P. Tabeling, C.-M. Ho</i>	185
Filamentous catalytic beds for the design of a membrane microreactor: Propane dehydrogenation as a case study <i>O. Wolfarth, L. Kiwi-Minsker, A. Renken</i>	192
Characterization of a gas/liquid microreactor, the micro bubble column: Determination of specific interfacial area <i>V. Haverkamp, G. Emig, V. Hessel, M. Liauw, H. Löwe</i>	202
Visualization of flow patterns and chemical synthesis in transparent Micromixers <i>T. Herweck, S. Hardt, V. Hessel, H. Löwe, C. Hofmann, F. Weise, T. Dietrich, A. Freitag</i>	215
Forced periodic temperature oscillations in microchannel reactors <i>A. Rouge, A. Renken</i>	230
Poster Session	
Comparison of Ag/Al- and Ag/ α -Al ₂ O ₃ catalytic surfaces for the partial oxidation of ethene in microchannel reactors <i>A. Kursawe, D. Hönicke</i>	240
Monodispersed droplet formation caused by interfacial tension from microfabricated channel array <i>S. Sugiura, M. Nakajima, M. Seki</i>	252
Investigation of microfluidics and heat transferability inside a microreactor array made of glass <i>E. Marioth, S. Loebbecke, M. Scholz, F. Schnürer, T. Türcke, J. Antes, H.H. Krause</i>	262

Part 5

Application of Microdevices for Production, Energy and Transportation Systems

Lecture Session

Sub-watt power using an integrated fuel processor and fuel cell <i>E. Jones, J. Holladay, S. Perry, R. Orth, B. Rozmiarek, J. Hu, M. Phelps, C. Guzman</i>	277
Catalytic microreactor systems for hydrogen generation <i>P.M. Irving, W. Lloyd Allen, T. Healey, Q. Ming, W.J. Thomson</i>	286
Palladium based micro-membrane for water gas shift reaction and hydrogen gas separation <i>S.V. Kamik, M.K. Hatalis, M.V. Kothare</i>	295
Demonstration of energy efficient steam reforming in microchannels for automotive fuel processing <i>G.A. Whyatt, W.E. TeGrotenhuis, J.G.H. Geeting, J.M. Davis, R.S. Wegeng, L.R. Pederson</i>	303
A microstructure reactor system for the controlled oxidation of hydrogen for possible application in space <i>K. Haas-Santo, O. Görke, K. Schubert, J. Fiedler, H. Funke</i>	313

Poster Session

Catalyst coating in microreactors for methanol steam reforming: Kinetics <i>P. Reuse, P. Tribolet, L. Kiwi-Minsker, A. Renken</i>	322
A microreactor for in-situ hydrogen production by catalytic methanol Reforming <i>A.V. Pattekar, M.V. Kothare, S.V. Kamik, M.K. Hatalis</i>	332
Applications for micro chemical and thermal systems <i>D.L. Brenchley</i>	343
Mixing simulation of a zigzag microchannel: A step towards the methoxylation of methyl-2-furoate <i>V. Mengeaud, R. Ferrigno, J. Josserand, H.H. Girault</i>	350
Fuel processor development for a soldier-portable fuel cell system <i>D.R. Palo, J.D. Holladay, R.T. Rozmiarek, C.E. Guzman-Leong, Y. Wang, J. Hu, Y.-H. Chin, R.A. Dagle, E.G. Baker</i>	359

MIRTH-e: Micro reactor technology for hydrogen and electricity
*E.R. Delsman, E.V. Rebrov, M.H.J.M. de Croon, J.C. Schouten,
 G.J. Kramer, V. Cominos, T. Richter, T.T. Veenstra, A. van den Berg,
 P.D. Cobden, F.A. de Bruijn, C. Ferret, U. D'Ortona, L. Falk*

368

Part 6

Microreactors as Tools in Chemical Research

Lecture Session

Microreactors as tools in chemical research
O. Woerz

377

Microchannel reactor for the partial oxidation of isoprene
S. Walter, E. Joannet, M. Schiel, I. Boulet, R. Philipps, M.A. Liauw

387

Selective oxidation of 1-butene to maleic anhydride - comparison of the
 performance between microchannel reactors and a fixed bed reactor
S. Kah, D. Hönicke

397

Application of a micromixer for the high throughput screening of fluid-liquid
 Molecular catalysis
C. de Bellefon, S. Caravieilhès, P. Grenouillet

408

A novel cross-flow microreactor for kinetic studies of catalytic processes
S.K. Ajmera, C. Delattre, M.A. Schmidt, K.F. Jensen

414

A new microreactor for the solution-phase synthesis of potential drugs
U. Kunz, A. Kirschning

424

Investigation, analysis and optimization of exothermic nitrations in
 Microreactor processes
*J. Antes, T. Tücke, J. Kerth, E. Marioth, F. Schnürer, H.H. Krause,
 S. Löbbecke*

446

Development of a microreactor for solid phase synthesis
*E. Bremus-Köbberling, A. Gillner, M. Wehner, U. Russek, J. Köbberling,
 D. Enders, S. Brandtner*

455

Poster Session

Catalysts and reaction conditions screening by microreactor devices for
 exhaust gas purification
I.R. Tamas, R. Ganea, G. Pop

464

Liquid phase hydrogenation of p-nitrotoluene in microchannel reactors
R. Födisch, D. Hönicke, Y. Xu, B. Platzer

470

Monitoring of chemical processes in microreactors by adapting FTIR Microscopy and HPLC <i>T. Türcke, W. Schweikert, F. Lechner, J. Antes, H.H. Krause, S. Löbbecke</i>	479
Suitability of various types of micromixers for the forced precipitation of calcium carbonate <i>R. Schenk, M. Donnet, V. Hessel, C. Hofmann, N. Jongen, H. Löwe</i>	489
Microdevice-based system for rapid catalyst development <i>R.S. Besser, X. Ouyang, J. Fort, H. Surangalikar</i>	499
The synthesis of peptides using micro reactors <i>P. Watts, C. Wiles, S.J. Haswell, E. Pombo-Villar, P. Styring</i>	508

Part 7

Analytical and Biological Applications

Lecture Session

BIOCHIPS: Lab-on-a-chip and DNA chips, new tools for high throughput genetic analysis and diagnostics <i>M. Cuzin, A. Fuchs, P. Caillat, Y. Fouillet</i>	521
Fabrication of disposable plastic microplates with 96 integrated microfluidic capillary electrophoresis (CE) structures for high throughput screening (HTS) <i>A.E. Guber, M. Hecke, D. Herrmann, A. Muslija, T. Schaller, A. Gerlach, G. Knebel</i>	532
Diagnostic analyses by biochemical reactions and separations on a chip <i>M. Seki, J.W. Hong, R. Aoyama, R. Ezaki, Y. Kakigi, M. Yamada, T. Fujii, I. Endo</i>	542
In situ and ex situ fabrication of DNA chips by microdeposition <i>M. Cabrera, M. Jaber, J.P. Cloarec, J.R. Martin, E. Souteryand, V. Dugas, J. Broutin, F. Bessueille, M. Bras, J.P. Chauvet</i>	552

Poster Session

Chemical and biological sensors based on modified electrodes with Electropolymerized diamines <i>B. Lakard, G. Herlem, B. Fahys, M. de la Bachelerie, W. Daniau, G. Martin</i>	561
A fluidic MEMS for protein identification by electrospray ionization/mass spectrometry <i>C. Druon, X. Mélique, C. Rolando, P. Tabourier</i>	572

Microreaction Technology

IMRET 5: Proceedings of the Fifth International
Conference on Microreaction Technology

Matlosz, M.; Ehrfeld, W.; Baselt, J.P. (Eds.)

2001, XV, 578 p., Hardcover

ISBN: 978-3-540-42498-7
