

Contents

1 Production of Artemisinin from in Vitro Cultures of *Artemisia annua* L.

J.F.S. FERREIRA and J. JANICK (With 3 Figures)

1 Introduction	1
2 In Vitro Approaches	6
3 Conclusions and Prospects	9
References	10

2 In Vitro Culture and the Production of Secondary Metabolites in *Coriandrum sativum* L. (Coriander)

J.R. LIU, S.W. KIM, and S.C. OH (With 2 Figures)

1 Introduction	13
2 Plant Regeneration Via Somatic Embryogenesis	14
3 Production of Petroselinic Acid from Cell Suspension Cultures	17
4 Summary and Conclusions	19
5 Protocol for Plant Regeneration Via Somatic Embryogenesis	19
6 Protocol for Production of Petroselenic Acid from Cell Suspension Cultures	20
References	21

3 Polyphenol Production in *Crataegus* Tissue Cultures (Hawthorn)

T. BAHORUN, F. TROTIN, and J. VASSEUR (With 11 Figures)

1 Introduction	23
2 In Vitro Approaches	28
3 Oxygen Species Scavenging by Callus Extracts	39
4 Summary and Conclusion	42
5 Protocol	43
References	47

4 *Dionaea muscipula* Ellis (Venus Flytrap): In Vitro Cultures and in Vitro Production of Secondary Metabolites

K. KUKULCZANKA and J. BUDZIANOWSKI (With 8 Figures)

1 Introduction	50
2 In Vitro Approaches	54
3 Secondary Metabolites	63
4 Conclusions and Prospects	68
5 Protocol	70
References	70

5 In Vitro Culture and the Production of Secondary Metabolites in *Hyoscyamus reticulatus* L.

I. IONKOVA (With 7 Figures)

1 Introduction	75
2 In Vitro Approaches	77
3 Conclusion	91
4 Protocol	91
References	92

6 Micropropagation of *Hypericum canariense* L. for the Production of Hypericin

S. MEDEROS-MOLINA (With 4 Figures)

1 Introduction	95
2 <i>Hypericum canariense</i> L.	97
3 In Vitro Culture Studies of <i>Hypericum</i> Species	100
4 Hypericin from Clonal Propagation of <i>Hypericum canariense</i> L.	105
5 Future Prospects	107
6 Conclusion	108
7 Protocol	108
References	110

7 Production of Quinolizidine Alkaloids in in Vitro Cultures of Legumes

M. WINK (With 4 Figures)

1 Introduction	118
2 Quinolizidine Alkaloid Formation in in Vitro Cultures	123
3 Why is Quinolizidine Alkaloid Production Reduced in Cell Suspension Cultures?	128

4 Gene Expression in Suspension-Cultured Cells of <i>L. polyphyllus</i>	129
References	132
8 <i>Malva</i> sp. (Mallow): In Vitro Culture and the Production of Secondary Metabolites S.E. KINTZIOS (With 10 Figures)	
1 Introduction	137
2 The in Vitro Culture of <i>Malva</i> sp.	143
3 Conclusion and Prospects	152
4 Protocol	152
References	153
9 In Vitro Culture and the Production of Polyphenol and Volatile Compounds in <i>Ocimum</i> K. ISHIMARU, Y. MURAKAMI, and K. SHIMOMURA (With 12 Figures)	
1 Introduction	156
2 In Vitro Studies of <i>Ocimum</i>	157
3 Tissue Cultures and Phenolic Production of <i>Ocimum</i>	158
4 Shoot Cultures and Volatile Compounds of <i>Ocimum</i>	168
5 Conclusion and Prospects	173
6 Protocol	174
References	176
10 <i>Pergularia tomentosa</i> in Vitro Culture and the Production of Cardenolides and Other Secondary Metabolites H.M. ELHAG, M.M. EL-OLEMY, and M.S. AL-SAID (With 4 Figures)	
1 Introduction	177
2 In Vitro Culture Studies	181
3 Cardenolide Production by <i>P. tomentosa</i> Callus and Suspension Cultures	192
4 Summary and Conclusion	194
5 Protocol	194
References	196
11 Indolopyridoquinazolin, Furoquinoline, Canthinone and Protoberberine-Type Alkaloids from <i>Phellodendron amurense</i> Callus Tissues A. IKUTA (With 9 Figures)	
1 Introduction	199
2 In Vitro Cultures	203

3 Chemotaxonomy	207
4 Speculative Biogenesis of the Indolopyridoquinazoline, Furoquinoline, Canthinone and Protoberberine-Type Alkaloids in Callus Tissues	208
5 Isolation and Characterization of cDNA Clones Encoding Aromatic Amino Acid Decarboxylase During Alkaloid Biosynthesis from <i>P. amurense</i>	209
6 Time Course Study	211
7 Productivity of Alkaloids from <i>P. amurense</i> Callus Tissues	213
8 Summary	214
9 Protocol	217
References	218

12 In Vitro Culture and the Production of Secondary Metabolites by *Sempervivum* spp. (Houseleek)

É. KERTÉSZ-DOBOS, Á. LASZLÓ-BENCsik, and D. DÁNOS (With 9 Figures)

1 Introduction	222
2 In Vitro Approaches	227
3 Clonal Propagation Technique	232
4 Conclusion and Prospect	235
5 Protocol	236
References	238

13 In Vitro Culture and the Production of Steroidal

Saponin in *Solanum aculeatissimum* Jacq.

T. IKENAGA, T. OYAMA, S. KIKUTA, and R. HANDAYANI (With 7 Figures)

1 Introduction	241
2 In Vitro Approaches	242
3 Summary and Conclusion	248
4 Protocol	249
References	250

14 *Solanum chrysotrichum* (Schdl.): Distribution, Identification of Antifungal SC-1 Saponin, In Vitro Propagation, Cell Suspension Cultures, Large-Scale Production of SC-1

M.L. VILLARREAL, L. ALVÁREZ, and R. QUINTERO (With 9 Figures)

1 Introduction	252
2 Isolation and Identification of the Antifungal Compound	254
3 In Vitro Approaches	257
4 Conclusion and Prospect	265

5 Protocol	265
References	266
15 In Vitro Culture and the Production of Secondary Metabolites in <i>Solanum kasianum</i> U. MÜHLENBECK, A. KORTENBUSCH, and W. BARZ (With 4 Figures)	
1 Introduction	268
2 In Vitro Approaches	270
3 Conclusion and Prospect	277
References	278
16 In Vitro Culture and the Production of Secondary Metabolites in <i>Stephania</i> Y. SUGIMOTO (With 16 Figures)	
1 Introduction	281
2 In Vitro Studies	283
3 Protocols	299
4 Summary and Conclusion	303
References	303
17 <i>Trigonella</i> Species: In Vitro Culture and Production of Secondary Metabolites P. CHRISTEN (With 8 Figures)	
1 Introduction	306
2 In Vitro Culture Studies	308
3 Summary and Conclusion	324
References	325
18 <i>Vaccinium</i> Species (Small-Fruited Berries): In Vitro Culture and the Production of Food Colorants and Phytochemicals M.A.L. SMITH (With 6 Figures)	
1 Introduction	328
2 In Vitro Approaches	333
3 Summary, Conclusion, and Prospects	341
4 Protocol	342
References	342
Subject Index	345
