

Contents

1 Introduction

Views and Experiences of Configuration Management	
A. Riitahuhta	1

Workshop Structure and Comments from Discussion	
A. Pulkkinen	22

2 Part I: Analysis of Customers, Markets and Technology

Record from 1 st Group Work	
A. Pulkkinen	36

Even Modular Products can be Unmanageable	
K. Aasland, J. Reitan and D. Blackenberg	41

Structured Sales Process for Configuration	
S. Suistoranta	49

Visualizing Interdependencies in Technical Design	
B.J. Oosterman, G.J.C. Gaalman and F.P.J. Kuijpers	63

3 Part II: Development of Product Portfolios and Module Systems

Record from 2 nd Group Work	
A. Pulkkinen	79

Product Structuring for Design Re-use	
J.S. Smith and A.H.B. Duffy	83

Capturing Quality Perceptions in the Design Rational of a Modular Product Concept	
M.W. Lange and J. Åslund	101

Relating Product and Process Structures	
A. McKay, A. de Pennington and S.J. Trott	117

4 Part III: Metrics and Methods for Modularity and Configurability

Record from 3 rd Group Work	
A. Pulkkinen	129
Modularisation by Relational Matrices – a Method for the Consideration of Strategic and Functional Aspects	
M. Blackenfelt	134
Enhancing Product Modularisation with Multiple Views of Decomposition and Clustering	
S. Järventausta and A. Pulkkinen	153
A Framework for Evaluating Commonality	
R.B. Stake	169

5 Part IV: Supporting Modeling and IT-Tools

Conclusions and Discussion for Further Research	
A. Pulkkinen	185
Preservation of Engineering Knowledge in Configuration Systems	
T. Jensen	189
Report on Using Product Data	
Management Software in Managing Modular Products	
M. Vainio-Mattila	203
ValueMap™ - a Method for Understanding the Economical Potential of Product Modularization and Cost of Variety	
T. Larsson and J. Åslund	215

Design for Configuration

A Debate based on the 5th WDK Workshop on Product
Structuring

Riitahuhta, A.; Pulkkinen, A. (Eds.)

2001, IX, 222 p., Hardcover
