

Table of Contents

| | |
|---|----------|
| 1. Group IV Catalysts and Cocatalysts | 1 |
| UV/VIS Studies on the Activation of Zirconocene-Based Olefin-Polymerization Catalysts <i>U. Wieser, H.-H. Brintzinger</i> | 3 |
| Activation of Siloxy-Substituted Compounds and Homopolymerisation of Ethylene by Different Soluble Alumoxane Cocatalysts <i>K. Kallio, J. Kauhanen</i> | 14 |
| Methylaluminoxane as a Cocatalyst for Olefin Polymerization. Structure, Reactivity and Cocatalytic Effect <i>E. Rytter, M. Ystenes, J. L. Eilertsen, M. Ott, J. A. Stvneng, J. Liu</i> | 23 |
| Olefin Polymerization under High-pressure: Formation of Super-high Molecular Weight Polyolefins <i>N. Suzuki, Y. Masubuchi, C. Takayama, Y. Yamaguchi, T. Kase, T. K. Miyamoto, A. Horiuchi, T. Mise</i> | 37 |
| Higher-Order Kinetics in Propene Polymerisations by Zirconocene Catalysts. Analysis of Alternative Reaction Mechanisms <i>via</i> a Genetic Algorithm <i>F. Schaper, H.-H. Brintzinger</i> | 46 |
| Structures of MAO: Experimental Data and Molecular Models According to DFT Quantum-Chemical Simulations <i>V. A. Zakharov, I. I. Zakharov, V. N. Panchenko</i> | 63 |
| A DFT Study of Ethylene Polymerization by Zirconocene-Boron Catalytic Systems <i>I. E. Nifant'ev, L. Y. Ustynyuk, D. N. Laikov</i> | 72 |
| Activation Reactions of Cp_2ZrCl_2 and Cp_2ZrMe_2 with Aluminium Alkyl Type Cocatalysts Studied by <i>in situ</i> FTIR Spectroscopy <i>J. L. Eilertsen, E. Rytter, M. Ystenes</i> | 86 |

| | |
|---|-----|
| Single Component Zirconocene Catalysts for the Stereospecific Polymerization of MMA <i>H. Frauenrath, H. Keul, H. Höcker</i> | 97 |
| Modeling Methylaluminoxane (MAO) <i>E. Zurek, T.K. Woo, T.K. Firman, T. Ziegler</i> | 109 |
| 2. Non Group IV Catalysts | 125 |
| Phosphinoalkyl-Substituted Cyclopentadienyl Chromium Catalysts for the Oligomerization of Ethylene <i>A. Döhring, V.R. Jensen, P. W. Jolly, W. Thiel, J.C. Weber</i> | 127 |
| 1-Hexene Polymerization Initiated by α -Diimine [N,N] Nickel Dibromide/MAO Catalytic Systems: Influence of the α -Diimine Ligand Structure <i>S. Gomont, S. Boissière, A. Deffieux, H. Cramail</i> | 137 |
| 1,3,5-Triazacyclohexane Complexes of Chromium as Homogeneous Model Systems for the Phillips Catalyst <i>R.D. Köhn, G. Seifert, G. Kociok-Köhn, S. Mihan, D. Lilge, H. Maas</i> | 147 |
| Rare Earth Half-Sandwich Catalysts for the Homo- and Copolymerization of Ethylene and Styrene <i>J. Okuda, S. Arndt, K. Beckerle, K. C. Hultzs, P. Voth, T.P. Spaniol</i> | 156 |
| 3. Traditional Catalysts | 167 |
| The New Revolutionary Development of Catalysis as The Driving Force for the Commercial Dynamic Success of Polyolefins <i>P. Galli, G. Vecellio</i> | 169 |
| Basic Approaches for the Design of Active Sites on the Traditional Ziegler Catalysts <i>H. Kono, M. Tomisaka, H. Matsuoka, B. Liu, M. Terano</i> | 196 |
| Surface Analytical Approaches for the Phillips Catalyst by EPMA and XPS <i>B. Liu, T. Shimizu, M. Terano</i> | 206 |
| Main Kinetic Features of Ethylene Polymerization Reactions with Heterogeneous Ziegler-Natta Catalysts in the Light of Multi-Center Reaction Mechanism <i>Y. V. Kissin</i> | 217 |
| Hydrogen Effects in Propylene Polymerization with Ti-Based Ziegler-Natta Catalysts. Chemical Mechanism <i>Y. V. Kissin, L. A. Rishina</i> | 229 |

| | |
|--|-----|
| Elementary Steps of Ziegler-Natta Catalyst Intermediates Formation. Incorporation of Magnesium Alkoxides with $[\text{Ti}(\text{dipp})_4]$, Ph_3SiOH , $[\text{Al}(\text{CH}_3)_3]$, and $\text{MCl}_{(3)4}$ ($\text{M} = \text{V}, \text{Zr}$) <i>S. Szafert, J. Utko, J. Ejfler, L. Jerzykiewicz, P. Sobota</i> | 240 |
| 4. Polymerization Mechanisms, Catalyst Structure and Polymer Structure Relationships | 251 |
| Mechanistic Aspects of Olefin Polymerization with Metallocene Catalysts: Evidence from NMR Investigations <i>I. Tritto, M.C. Sacchi, P. Locatelli, F. Forlini</i> | 253 |
| Syndiotactic Specific Structures, Symmetry Considerations, Mechanistic Aspects <i>A. Razavi, D. Baekelmans, V. Bellia, Y. De Brauer, K. Hortmann, M. Lambrecht, O. Miserque, L. Peters, M. Slawinski, S. Van Belle</i> | 267 |
| The Particularities of Isospecific Polypropylene Synthesis in Bulk with Ansa-Metallocene Catalysts <i>P.M. Nedorezova, V.I. Tsvetkova, A.M. Aladyshev, D.V. Savinov, D.A. Lemenovskii</i> | 280 |
| Ethene Polymerization Catalyzed by Monoalkyl and Methyl Substituted Zirconocenes. Possible Effects of Reaction Barriers and Ligand-Metal Agostic Interactions <i>K. Thorshaug, J.A. Støvneng, H. Wigum, E. Rytter</i> | 289 |
| A Density Functional Theory Study of the Syndiotactic-Specific Polymerization of Styrene <i>L. Cavallo, G. Minieri, P. Corradini, A. Zambelli, G. Guerra</i> | 299 |
| Influence of Ligands on the Deactivation of Group IV Metallocene Catalysts in the High-Temperature Polymerization of Ethene <i>A. Rau, T. Wiczorek, G. Luft</i> | 307 |
| 5. Polymerization, Co-Polymerization, Non-Traditional Monomers and Polymer Characterization | 315 |
| Correlations Between Chain Branching, Morphology Development and Properties of Polyethenes <i>P. Walter, J. Heinemann, H. Ebeling, D. Mäder, S. Trinkle, R. Mülhaupt</i> | 317 |
| Heterogenized Bifunctional Catalysts in Olefin Polymerization <i>E. Mushina, Y. Podolsky, V. Frolov</i> | 327 |
| Long-Chain Branched Polyethylene via Metallocene-Catalysis: Comparison of Catalysts <i>E. Kokko, P. Lehmus, A. Malmberg, B. Löfgren, J. V. Seppälä</i> | 335 |

| | |
|--|-----|
| New Half-Sandwich Titanocenes for the Polymerization of Butadiene <i>W. Kaminsky, V. Scholz</i> | 346 |
| Metalocene Catalyzed Copolymerization of Propene with Mono- and Diolefins <i>M. Arnold, S. Bornemann, J. Knorr, T. Schimmel</i> | 353 |
| A Comparison of the Behavior of Nickel/MAO Catalytic Systems in the Polymerization of Styrene and 1,3-Cyclohexadiene <i>R. Po, N. Cardì, M. A. Cardaci, R. Santi</i> | 365 |
| 6. Catalyst Heterogenization and Particle Microreactor Effects | 375 |
| Activity Limits of Heterogeneous Polymerization Catalysts <i>T. F. McKenna, R. Spitz</i> | 377 |
| Reversibly Crosslinked Polystyrene as a Support for Metallocenes Part I: Covalently Bonded Metallocenes and Functionalized Supports <i>M. Klapper, M. Koch, M. Stork, N. Nenov, K. Müllen</i> | 387 |
| Reversibly Crosslinked Polystyrene as a Support for Metallocenes Part II: Non-Covalent Bonding for the Immobilization <i>M. Koch, M. Klapper, K. Müllen</i> | 396 |
| An Intrinsic Defect of Slow Monomer Diffusion Theory for Explaining Broad MWDs <i>T. Keii</i> | 404 |
| Prepolymerization and Copolymerization Studies Using Homogeneous and Silica-supported $\text{Cp}_2\text{ZrCl}_2/\text{MAO}$ Catalyst Systems <i>P. J. T. Tait, J. A. M. Awudza</i> | 414 |
| Unique Flowability Behavior of Ethylene Copolymers Produced by a Catalyst System Comprising Ethylenebis(indenyl)hafnium Dichloride and Aluminoxane <i>J.-I. Imuta, T. Tsutsui, K. Yoshitugu, T. Matsugi, N. Kashiwa</i> | 427 |
| Diffusion Measurements in Porous Polymer Particles <i>J. G. Seland, B. Hafskjold</i> | 434 |

Organometallic Catalysts and Olefin Polymerization

Catalysts for a New Millennium

Blom, R.; Follestad, A.; Rytter, E.; Tilset, M.; Ystenes, M.

(Eds.)

2001, XII, 443 p., Hardcover

ISBN: 978-3-540-41402-5
