Section I: Significance of the Pineal Gland and Its Hormone Melatonin	1
1 Some Historical Remarks Concerning Research on the Pineal Gland and Cancer	
Vera Lapin	3
References	4
2 Biology of the Pineal Gland and Melatonin in Humans	
Lutz Vollrath	5
2.1 Introduction	5
2.2 The Pineal Gland in Animal Species	5
2.2.1 Structural Aspects, Innervation, and Pinealocyte Receptors	6
2.2.2 Melatonin (MEL) Synthesis and the Regulation of Its Day/Night Rhythm	9
2.2.3 The Influence of Light and Darkness on MEL Formation	11
2.2.4 The Function of MEL in Non-Human Mammals	12
2.2.5 Influence of Magnetic and Electromagnetic Fields on the Pineal Gland	12
2.3 The Human Pineal Gland and MEL	13
2.3.1 General Aspects	13
2.3.2 Release and Fate of MEL	14
2.3.3 Interindividual Variation of MEL Secretion	15
2.3.4 Day/Night Rhythm of MEL Formation in Humans	16
2.3.5 Influence of Light and Dark on MEL Secretion	18
2.3.6 Seasonal Differences in MEL Secretion	19
2.3.7 MEL Secretion in Old Age and Pineal Calcification	20
2.3.8 Various Factors Influencing MEL Secretion	21
2.3.9 MEL and Seasonal Affective Disorder	22
2.3.10 Electromagnetic and Magnetic Fields	23
2.3.11 Function of MEL in Humans	24
2.4 Conclusions	28
