

Contents

Mitochondria and Apoptosis, the Stepping Stones on the Path to Death D.W. ETHELL and D.R. GREEN	1
Mitochondrial Membrane Permeabilization in Physiological and Pathological Cell Death L. RAVAGNAN and G. KROEMER	15
Bcl-2 Family Members and Permeabilization of the Outer Mitochondrial Membrane O. TERRADILLOS, X. ROUCOU, S. DA CRUZ, B. SANCHEZ, and J.-C. MARTINOU	27
Roles for Fas in Programmed Cell Death of Motoneurons C. RAOUL, G. UGOLINI, A. ESTEVEZ, B. PETTMANN, and C.E HENDERSON	33
Events that Commit Neurons to Die After Trophic Factor Deprivation G.V. PUTCHA, M. DESHMUKH, and E.M. JOHNSON, JR.	47
Normal Programmed Cell Death of Developing Avian and Mammalian Neurons Following Inhibition or Genetic Deletion of Caspases R. W. OPPENHEIM, C.-Y. KUAN, D. PREVETTE, P. RAKIC, and H. YAGINUMA	61
Caspases and Their Regulation in Apoptosis During Brain Development C.-Y. KUAN, R.A. FLAVELL, and P. RAKIC	75
Apoptotic Neurodegeneration in the Developing Brain C. IKONOMIDOU	89
Apoptosis, Glial Cells and Parkinson's Disease E.C. HIRSCH	97
Mechanisms of Neuronal Death: An in vivo Study in the Lurcher Mutant Mice F. SELIMI, A. CAMPANA, J. BAKOUCHE, A. LOHOF, M.W. VOGEL, and J. MARIANI	109

Neuronal Death in Huntington’s Disease: Multiple Pathways
for One Issue?
S. HUMBERT and F. SAUDOU 137

Subject Index 153

Neuronal Death by Accident or by Design

Henderson, C.E.; Green, D.; Mariani, J.; Christen, Y.

(Eds.)

2001, XI, 154 p. 58 illus., 18 illus. in color., Hardcover

ISBN: 978-3-540-41777-4
