# Table of Contents

|           |  |    |
|-----------|--|----|
| Chapter 1 | <b>Introduction</b>  | 1  |
| 1.1       | About the Book   | 13 |
| Chapter 2 | <b>Environmentally Driven Plasticity</b>   | 15 |
| 2.1       | The Physical Environment   | 15 |
| 2.1.1     | Growing and Flowing  | 17 |
| 2.2       | The Case Studies   | 30 |
| 2.2.1     | Case Studies of Environmentally Driven Plasticity: Seaweeds  | 30 |
| 2.2.2     | Morphological Plasticity in Sponges  | 34 |
| 2.2.3     | Morphological Plasticity in Colonial Cnidarians  | 43 |
| 2.2.4     | Biologically Inherent Regulation of Morphogenesis  | 56 |
| Chapter 3 | <b>Measuring Growth and Form</b>   | 67 |
| 3.1       | Metrics for Branching Networks   | 67 |
| 3.1.1     | Branch Ordering  | 68 |
| 3.1.2     | Horton Statistics  | 69 |
| 3.1.3     | Tokunaga Statistics  | 70 |
| 3.2       | Morphological Analysis of a Branching Sponge   | 72 |
| 3.2.1     | Image Processing   | 72 |
| 3.2.2     | Horton Analysis  | 73 |
| 3.2.3     | Fractal Analysis   | 75 |
| 3.3       | Two-dimensional Morphological Analysis<br>of Ranges of Growth Forms  | 75 |
| 3.3.1     | Sampling Growth Forms Along a Gradient<br>of Increasing Water Movement   | 77 |
| 3.3.2     | Morphological Measurements in a Range of Growth Forms  | 78 |
| 3.3.3     | A Comparison of the Morphological Measurements<br>in a Range of Growth Forms of the Three Species              | 84 |
| 3.4       | Three-Dimensional Morphological Analysis<br>of Growth Forms of <i>Madracis Mirabilis</i> (Preliminary Results) | 87 |

---

|           |  |     |
|-----------|--|-----|
| Chapter 4 | Simulating Growth and Form .....   | 91  |
| 4.1       | L-systems .....  | 91  |
| 4.1.1     | Introduction to Modeling Using L-systems .....   | 91  |
| 4.1.2     | Examples of L-systems for Modeling Seaweed .....   | 94  |
| 4.2       | Example of a Simple Model of Plasticity<br>in Algal Morphology .....   | 97  |
| 4.3       | Modeling Fluid Flow Using Lattice Gases<br>and the Lattice Boltzmann Model .....   | 99  |
| 4.3.1     | Cellular Automata as Models for Fluid Flow .....   | 100 |
| 4.3.2     | Transport, Erosion, Deposition, and Hydrodynamic Forces ....   | 105 |
| 4.3.3     | Transport and Sedimentation .....  | 108 |
| 4.4       | A Laplacian Model of Branching Growth .....  | 109 |
| 4.4.1     | Laplacian Growth .....   | 109 |
| 4.4.2     | The Numerical Model .....  | 110 |
| 4.4.3     | Model Results .....  | 112 |
| 4.5       | Growth by Aggregation .....  | 114 |
| 4.5.1     | Morphological Plasticity and the Influence<br>of Hydrodynamics .....   | 114 |
| 4.5.2     | Modeling the Nutrient Distribution .....   | 115 |
| 4.5.3     | Growth by Aggregation in a Monodirectional Flow .....  | 116 |
| 4.5.4     | Growth by Aggregation in a Bidirectional (Alternating) Flow ..   | 119 |
| 4.5.5     | Comparison Between the Range of Aggregates<br>and the Growth Forms .....   | 123 |
| 4.6       | Accretive Growth .....   | 125 |
| 4.6.1     | Surface Normal Deposition in Marine Sessile Organisms .....  | 125 |
| 4.6.2     | A Model of Surface Normal Accretive Growth .....   | 127 |
| 4.6.3     | Accretive Growth Using an Approximation<br>of Actual Deposition Velocities<br>and the Amount of Contact with the Environment ..... | 128 |
| 4.6.4     | A Model of Accretive Growth Driven by the Local Amount<br>of Available Nutrient and the Influence of Hydrodynamics .....           | 130 |
| 4.6.5     | A Model of Accretive Growth<br>Driven by Local Light Intensities .....   | 137 |
| 4.6.6     | A Model of Accretive Growth<br>Driven by Local Nutrient Availability<br>and Regulated by a Growth-Suppressing Isomone .....        | 139 |
| 4.6.7     | A Comparison Between the Accretive Model<br>and the Growth Forms .....   | 139 |
| 4.7       | Gastrovascular Dynamics of Hydractiniid Hydrozoans .....   | 144 |

---

|                      |   |     |
|----------------------|---|-----|
| Chapter 5            | <b>Verifying Models</b>   | 147 |
| 5.1                  | Transplantation Experiments with Stony Corals   | 147 |
| 5.2                  | Transplantation and Other Perturbation Experiments<br>with the Sponge <i>Haliclona oculata</i><br>and a Comparison to the Simulation Models | 151 |
| 5.3                  | Colonial Hydrozoans: Perturbation Experiments<br>of Gastrovascular Physiology and Effects<br>on Colony Development                          | 155 |
| Chapter 6            | <b>Applications</b>   | 159 |
| 6.1                  | Antarctic Sponges   | 160 |
| 6.2                  | Coral Records   | 163 |
| Chapter 7            | <b>Epilogue</b>   | 169 |
| 7.1                  | Conclusion  | 172 |
| <b>References</b>    |   | 173 |
| <b>Subject Index</b> |   | 191 |

The Algorithmic Beauty of Seaweeds, Sponges and  
Corals

Kaandorp, J.A.; Kübler, J.E.

2001, XV, 193 p. 138 illus., 51 illus. in color., Hardcover

ISBN: 978-3-540-67700-0
