## Part I. Basics and Physical Tools

---

<b>1. Introduction</b>	<b>3</b>
<b>2. Physical Principles of Micro- and Nanotribology</b>	<b>7</b>
2.1 Fundamental Definitions	7
2.2 Model Materials	9
2.3 Mechanical Properties	11
2.3.1 Roughness	11
2.3.2 Elastic Bodies	12
2.3.3 Viscoelastic Bodies	13
2.3.4 Contact Mechanics	15
2.4 Adhesion	20
2.4.1 Molecular Forces	23
2.4.2 Electrostatic Forces	25
2.4.3 Capillary Forces	28
2.5 Lubrication	32
2.5.1 Simple Liquids – Experiments	33
2.5.2 Simple Liquids – Simulation	35
2.5.3 Water – Bulk Properties	37
2.5.4 Water – Molecular Film Properties	39
2.5.5 Lubrication and Water Film Thickness	44
2.5.6 Solid Lubrication	49
2.6 Friction	49
2.6.1 Macroscale Stick/Slips	52
2.6.2 Microscale Stick/Slips	53
2.6.3 Nanoscale Stick/Slips	56
2.6.4 Stick/Slips and Sliding Velocity	57
2.6.5 Friction and Sliding Velocity	59
2.6.6 Friction versus Temperature and Humidity	64
2.6.7 Friction and Contact Geometry	65
2.6.8 Normal Force Dependence	68
2.6.9 Vibrations	70
2.7 Wear	73

2.7.1	Microscale Wear .....	73
2.7.2	Nanoscale Wear .....	74
2.7.3	Wear of Organic Monolayers .....	74

---

## Part II. Biological Friction Systems

---

<b>3.</b>	<b>Biological Frictional and Adhesive Systems .....</b>	<b>79</b>
3.1	Biological Attachment .....	79
3.2	Systems with Reduced Friction .....	80
3.2.1	Fluids and Friction .....	80
3.2.2	Joints and Articular Cartilage.....	85
3.2.3	Muscle Connective Tissues .....	91
3.3	Systems with Increased Friction .....	94
3.3.1	Surface-Replicating Mechanisms in Plants .....	94
3.3.2	Egg Filaments of Teleostean Fish.....	95
3.3.3	Attachment Apparatus in Hill Stream Fish .....	95
3.3.4	Friction in Fish Spines .....	97
3.3.5	Attachment for Locomotion in Lizard Pads .....	98
3.3.6	Primate Skin .....	100
3.3.7	Frictional Surfaces of Snake Scales .....	100
3.3.8	Interlock in Parasites and Plant Diaspores .....	101
3.3.9	Bird Feather Interlocking Device .....	102
3.4	Mediators of Adhesion .....	103
3.4.1	Design of Adhesive Polymers.....	103
3.4.2	Coupling Agents .....	104
3.5	Systems with Increased Adhesion .....	105
3.5.1	Cell Adhesion .....	106
3.5.2	Invertebrates .....	107
3.5.3	Byssus Adhesion in Molluscs.....	110
3.5.4	Tube Feet of Starfish .....	112
3.5.5	Transitory Adhesion of Soft-Bodied Invertebrates.....	114
3.5.6	Adhesion in Barnacles .....	116
3.5.7	Permanent Adhesion in Insects and Spiders .....	117
3.5.8	Temporary Adhesion in Cladoceran Crustaceans .....	118
3.5.9	Chordata – Larval Adhesion in Fish and Ascidians ...	118
3.5.10	Sticking in Tree Frogs.....	119
3.5.11	Adhesion in Bats .....	121
3.5.12	Plants .....	122
3.5.13	Bonding to the Dental Surface .....	122
3.6	Anti-adhesive Mechanisms .....	124
3.6.1	Plants .....	124
3.6.2	Animals.....	126

<b>4. Frictional Devices of Insects</b> .....	129
4.1 Design Principles of Insect Attachment Devices .....	130
4.2 Insect Cuticle: Ultrastructural Architecture of the Material .....	131
4.3 Systems of Two Complementary Surfaces .....	133
4.3.1 Dragonfly Head-Arresting System .....	133
4.3.2 Wing-Locking Devices .....	135
4.3.3 Insect Unguitractor Apparatus .....	137
4.3.4 Coxal Interlocking Mechanism in Lacewings .....	138
4.3.5 Coxal Interlocking Mechanism in Jumping Cicadas ...	138
4.4 Systems of One Adaptable Surface .....	139
4.4.1 Surface Characteristics .....	141
4.4.2 Ultrastructural Architecture of the Pad Material .....	143
4.4.3 Two Alternative Designs of Adhesive Pads .....	145
4.5 Epidermal Secretions .....	147
4.5.1 Pore Canals .....	148

---

### Part III. Test Equipment

---

<b>5. Microscale Test Equipment</b> .....	153
5.1 Microtribometer .....	153
5.1.1 Force Detection .....	153
5.1.2 Springs for the Micronewton Range .....	154
5.1.3 Ball Selection .....	155
5.1.4 Interferometer-Based Tribometers .....	156
5.1.5 Fiber-Optics-Based Microtribometer .....	158
5.1.6 Bio-Microtribometer .....	161
5.1.7 Data Evaluation .....	163
5.2 Mechanical Microanalysis .....	164
5.2.1 Hardness Measurement .....	164
5.2.2 Scratch Testing .....	166
5.2.3 Contact-Angle Measurement .....	167
5.2.4 Profilometry .....	168
5.2.5 Lubrication Analysis .....	170
5.3 Accompanying Surface Science Techniques .....	170
5.3.1 Photoelectron Spectroscopy .....	171
5.3.2 Auger Electron Spectroscopy .....	173
5.3.3 Infrared Spectroscopy .....	175
5.3.4 Low-Energy Electron Diffraction .....	176

<b>6. Nanoscale Probe Techniques</b>	179
6.1 Scanning Tunneling Microscope	180
6.1.1 Operating Principle	180
6.1.2 Constant Current/Height Mode	181
6.1.3 Tunnel Spectroscopy	182
6.1.4 Hydration Scanning Tunneling Microscopy	183
6.2 AFM	184
6.2.1 Operating Principle	184
6.2.2 Contact mode	185
6.2.3 Tapping Mode	186
6.2.4 Non-contact Mode	187
6.2.5 Force Modulation	188
6.3 Selected Results	188
6.3.1 Forces Between Tip and Molecule	188
6.3.2 Nanoscale Friction and Wear	190
6.3.3 Nano-indentation	191
<b>7. Microscopy Techniques</b>	193
7.1 Principles of Microscopy Techniques	194
7.1.1 Light Microscopy	194
7.1.2 Phase-Contrast Microscopy	196
7.1.3 Interference Microscopy	196
7.1.4 Polarization Microscopy	197
7.1.5 Fluorescence Microscopy	197
7.1.6 Transmission Electron Microscopy	198
7.1.7 Scanning Electron Microscopy	198
7.2 Preparation Procedures	200
7.2.1 Fixation	200
7.2.2 Embedding	202
7.2.3 Sectioning	203
7.2.4 Histological Staining	204
7.2.5 Histochemistry	204
7.2.6 Contrasting Technique for TEM	205
7.2.7 Critical-Point Drying	206
7.2.8 Freeze-Drying	207
7.2.9 Cryofracturing and Freeze-Fracturing	207
7.2.10 Freeze-Substitution	208
7.3 Microscopy Methods	
Used in Surface Characterization	209
7.3.1 Surface Contour in Biological Surfaces	210
7.4 Special Techniques for Studies on Material Design	212
7.4.1 Ultrastructural Architecture of Micro-outgrowths	212
7.4.2 Pore Canals	215
7.4.3 Fluids Occurring in the Contact Area	216
7.4.4 Material Properties of Fibrous Composites	217

---

**Part IV. Case Studies**

---

<b>8. Samples, Sample Preparation and Tester Setup</b>	225
8.1 A Biological Microsystem	226
8.2 Sample Aging	228
<b>9. Case Study I: Indentation and Adhesion</b>	231
9.1 Measurement Procedure	231
9.2 Indentation	232
9.3 Adhesion	236
9.3.1 The Attachment Process	236
9.3.2 The Detachment Process	238
9.3.3 Adhesive Properties of the Secretion	239
<b>10. Case Study II: Friction</b>	243
10.1 Test Setup	243
10.2 Results	244
10.2.1 Load Dependence and Friction Hysteresis	245
10.2.2 Anisotropy of Friction and Inner Structure	247
<b>11. Case Study III: Material Properties</b>	251
11.1 Elastic Properties	251
11.2 Viscoelastic Properties	252
<b>12. Outlook</b>	255

---

**Part V. Appendix**

---

<b>A. Contact Models</b>	259
<b>B. Capillary Theory</b>	261
<b>C. Glossary</b>	265
<b>D. List of Symbols</b>	273
<b>References</b>	277
<b>Index</b>	299
