

Contents

Part I Applied Continuum Mechanics

Numerical Investigation of Shock Waves in a Radiating Gas Described by a Variable Eddington Factor <i>Angelo Marcello Anile, Vittorio Romano</i>	3
Anisotropic Fluids: From Liquid Crystals to Granular Materials <i>Harald Ehrentraut</i>	18
Integration and Segregation in a Population – A Thermodynamicists’s View <i>Ingo Müller</i>	44
Asymptotic and Other Properties of Some Nonlinear Diffusion Models <i>Salvatore Rionero</i>	56
The Binary Mixtures of Euler Fluids: A Unified Theory of Second Sound Phenomena <i>Tommaso Ruggeri</i>	79
Continuously Distributed Control of Plates by Electric Networks with PZT Actuators <i>Stefano Vidoli, Francesco dell’Isola</i>	92

Part II Soil Mechanics and Porous Media

Hydraulic Theory for a Frictional Debris Flow on a Collisional Shear Layer <i>James T. Jenkins</i>	113
The Beavers and Joseph Condition for Velocity Slip at the Surface of a Porous Medium <i>Geoff McKay</i>	126

Porous Convection, the Chebyshev Tau Method, and Spurious Eigenvalues	
<i>Brian Straughan</i>	140

Mechanics of Multiphase Porous Media – Application to Unsaturated Soils	
<i>Laurent Vulliet, Lyesse Laloui</i>	153

Part III Glacier and Ice Dynamics

Modelling Iceberg Drift and Ice-Rafted Sedimentation	
<i>Garry K.C. Clarke, Douglas I. La Prairie</i>	183

Modelling the Flow of Glaciers and Ice Sheets	
<i>Andrew C. Fowler</i>	201

Notes on Basic Glaciological Computational Methods and Algorithms	
<i>Richard C.A. Hindmarsh</i>	222

Constitutive Modelling and Flow Simulation of Anisotropic Polar Ice	
<i>Jacques Meyssonier, Paul Duval, Olivier Gagliardini, Armelle Philip</i>	250

Influence of Bed Topography on Steady Plane Ice Sheet Flow	
<i>Leslie W. Morland</i>	276

Part IV Climatology and Lake Physics

Glacial Isostasy: Models for the Response of the Earth to Varying Ice Loads	
<i>Ralf Greve</i>	307

Arctic Sea Ice and Its Role in Climate Variability and Change	
<i>Lawrence A. Mysak</i>	326

The Role of Simple Models in Understanding Climate Change	
<i>Thomas F. Stocker</i>	337

Comparing Different Numerical Treatments of Advection Terms for Wind-Induced Circulations in Lake Constance	
<i>Yongqi Wang</i>	368

Continuum Mechanics and Applications in Geophysics
and the Environment

straughan, b.; Greve, R.; Ehrentaut, H.; Wang, Y. (Eds.)

2001, XIII, 394 p., Hardcover

ISBN: 978-3-540-41660-9
