1	Introduction	
	F. Wulff, L. Rahm, and P. Larsson	1
1.1	Background	1
1.2	Physical Transports and External Forcing	2
1.3	Critical Processes	3
1.4	Budgets and Models	10
1.5	Conclusions	14
	References	15
2	Physical Oceanography of the Baltic Sea	
	A. Stigebrandt	19
2.1	Objectives of this Chapter	19
2.2	Introduction	20
2.3	Overall Description of the Physical State of the Baltic Sea	31
2.3.1	Salinity	31
2.3.2	Temperature	35
2.3.3	Currents	37
2.4	Water and Heat Budgets	40
2.4.1	Water Budget	40
2.4.2	Heat Budget	42
2.5	Sea Level and its Variability	44
2.5.1	Externally and Internally Forced Sea Level Variability	45
2.5.2	Distribution of Sea Level Variability	47
2.6	Water Exchange Between Basins – Strait Dynamics	48
2.6.1	Barotropic Strait Flows	49
2.6.2	Baroclinic Strait Flows	51

2.6.3	Water Exchange of Fjords, Bays and Archipelagoes	54
2.7	Dynamics of the Surface Layer	56
2.7.1	Annual Cycles	58
2.7.2	Horizontal Diffusion	60
2.8	Dynamics of the Deep Water	62
2.8.1	Inflow of Saline Water to the Baltic Sea	62
2.8.2	Dense Bottom Pools and Bottom Currents in the Baltic Sea	64
2.8.3	Interleaving of Inflows into the Baltic Proper – Halocline Ventilation	65
2.8.4	Diapycnal Mixing Beneath the Seasonal Pycnocline	66
	References	68

3	Climate and Hydrology of the Baltic Basin S. Bergström, H. Alexandersson, B. Carlsson, W. Josefsson, K.-G. Karlsson, and G. Westring	75
----------	---	----

3.1	Climate of the Baltic Basin	75
3.1.1	General Overview	75
3.1.2	Air Temperature	78
3.1.3	Precipitation	86
3.1.4	Winds	90
3.1.5	Cloudiness	91
3.1.6	Radiation	94
3.1.7	Ice Conditions	98
3.2	River Runoff to the Baltic Sea	101
3.2.1	Annual River Runoff to the Baltic Sea	103
3.2.2	Seasonal Contributions from Rivers	107
3.2.3	Monthly Values and Extremes	110
	References	110

4	Riverine Inputs of Nutrients to the Baltic Sea A. Grimvall and P. Stålnacke	113
----------	---	-----

4.1	Introduction	113
4.2	Databases and Background Documents	114
4.3	Data Quality and Statistical Methods	116
4.4	Total Input of Nutrients to the Baltic Sea	117

4.5	Spatial Distribution of Riverine Loads	118
4.6	Temporal Changes in Total Riverine Input	121
4.7	Temporal Trends in Specific Rivers	123
4.8	Controllability of Riverine Loads of Nutrients	124
4.9	Conclusions	128
	References	128

5 Deposition of Nitrate and Ammonium from the Atmosphere to the Baltic Sea

L. Granat 133

5.1	Introduction	133
5.2	Estimation of Wet Deposition	134
5.2.1	Data	134
5.2.2	Data Scrutinization	135
5.2.3	Interpolation	137
5.3	Estimation of Dry Deposition	139
5.3.1	Concentration Data	139
5.3.2	Deposition Velocity	141
5.4	Results and Discussion	142
5.4.1	Uncertainties in Wet Deposition Estimates	145
5.4.2	Comparison with Other Estimates	146
	References	147

6 Atmospheric and River Input of PCBs, DDTs and HCHs to the Baltic Sea

C. Agrell, P. Larsson, L. Okla, G. Bremle, N. Johansson,
M. Klavins, O. Roots, and A. Zelechowska 149

6.1	Introduction	149
6.1.1	The Compounds	150
6.1.2	Transport Processes	151
6.1.3	Transport by Rivers	152
6.1.4	The Study	153
6.2	Material and Methods	154
6.2.1	Air and Precipitation Sampling	154
6.2.2	River Sampling	155
6.2.3	Sample Preparation and Analysis	155
6.2.4	Statistical Analysis	156
6.3	Results and Discussion	158

6.3.1	Concentration of Persistent Pollutants in the Atmosphere	158
6.3.2	Concentrations of Persistent Pollutants in Precipitation	163
6.3.3	Atmospheric Deposition	166
6.3.4	Concentration and Transport of Pollutants in Rivers	169

**15 A Multicompartment, Multi-Basin Fugacity Model
Describing the Fate of PCBs in the Baltic Sea**
F. Wania, D. Broman, J. Axelman, C. Näf, and C. Agrell 417

15.1 Introduction 417

15.2 Model Structure 419

15.2.1 Mass Balance for Water 421

15.2.2 Mass Balance for Particulate Organic Carbon 422

15.2.3 Mass Balance for the Persistent Organic Pollutant 426

15.3 PCBs in the Baltic Sea 430

15.3.1 Selection of Input Parameters 430

15.4 Presentation of Model Results 433

15.4.1 Response Times 437

15.5 Evaluation of Model Results 438

15.5.1 Water Concentrations 438

15.5.2 Sediment Concentrations 439

15.5.3 Concentrations in Precipitation 439

15.5.4 Mass Balance of PCBs 439

15.6 Conclusion 440

15.7 Outlook 441
