

# **Table of Contents**

## **1 Historical Development**

1.1	Introduction .....	1
1.2	Thermoelectric and Thermomagnetic Phenomena .....	2
1.3	Peltier Cooling and the Thermoelectric Figure of Merit.....	8
1.4	Efficiency of Thermoelectric Power Generation .....	12
1.5	Ettingshausen Cooling and the Thermomagnetic Figure of Merit ..	13

## **2 Transport of Heat and Electricity in Solids**

2.1	Crystalline Solids.....	15
2.2	Heat Conduction by the Lattice.....	18
2.3	Band Theory of Solids .....	28
2.4	Electron Transport in a Zero Magnetic Field.....	36
2.5	Effect of a Magnetic Field .....	44
2.6	Nonparabolic Bands .....	51
2.7	Phonon Drag .....	55

## **3 Selection and Optimization Criteria**

3.1	Selection Criteria for Thermoelectric Materials.....	59
3.2	Influence of Carrier Concentration on the Properties of Semiconductors .....	59
3.3	Optimization of Electronic Properties.....	71
3.4	Minimizing Thermal Conductivity .....	76
3.5	Anisotropic Thermoelements .....	84
3.6	Thermoelectric Cooling at Very Low Temperatures.....	87

## **4 Measurement and Characterization**

4.1	Electrical Conductivity.....	91
4.2	Seebeck Coefficient .....	93
4.3	Thermal Conductivity .....	95
4.4	Figure of Merit.....	99
4.5	Thermogalvanomagnetic Effects .....	105

**5    Review of Established Materials and Devices**

5.1	Group V <sub>2</sub> –VI <sub>3</sub> .....	111
5.2	Elements of Group V and Their Alloys.....	131
5.3	Materials for Thermoelectric Generators .....	146
5.4	Production of Materials .....	151
5.5	Design of Modules .....	163

**6    The Phonon–Glass Electron-Crystal Approach  
to Thermoelectric Materials Research**

6.1	Requirements for Good Thermoelectric Materials and the PGEC Approach.....	177
6.2	The Skutterudite Material System.....	178
6.3	Clathrate Compounds .....	191

**7    Complex Chalcogenide Structures**

7.1	Introduction .....	209
7.2	New Materials with Potential for Thermoelectric Applications....	210
7.3	Pentatelluride Compounds .....	220
7.4	Tl <sub>2</sub> SnTe <sub>5</sub> and Tl <sub>2</sub> GeTe <sub>5</sub> .....	229

**8    Low-Dimensional Thermoelectric Materials**

8.1	Fine-Grained Si–Ge and Thin-Film Bi.....	235
8.2	Survey of Size Effects.....	236
8.3	Experimental Structures.....	242
8.4	Practical Considerations .....	251
8.5	Summary .....	254

**9    Thermionic Refrigeration**

9.1	The Vacuum Diode.....	255
9.2	Solid-State Thermionic Devices.....	263

**References .....** 271**Subject Index .....** 287

Thermoelectrics

Basic Principles and New Materials Developments

Nolas, G.S.; Sharp, J.; Goldsmid, J.

2001, VIII, 293 p., Hardcover

ISBN: 978-3-540-41245-8
