

Table of Contents

Introduction	1
<i>Paul J.J. Welfens</i>	
 Part I	
Internationalization, Trade, FDI and the Environment	5
 A. Long-range Transboundary Air Pollution: Problem and Policy Options in Europe	
<i>Markus Amann</i>	7
1. Introduction	7
2. The Convention on Long-range Transboundary Air Pollution	7
3. Air Pollution Control in the European Union	8
4. The 'Effect-based' Approach for Differentiating Emission Control Requirements	9
5. National Emission Ceilings in a Multi-pollutant/Multi-effect Context	10
6. Conclusions	17
References	19
 Comments on: Long-Range Transboundary Air Pollution: Problems and Policy Options in Europe	 21
<i>Reimund Schwarze</i>	
 B. Environmental Regulation, Multinational Companies and International Competitiveness	
<i>Alistair Ulph and Laura Valentini</i>	25
1. Introduction	25
2. What does Economic Analysis Tell Us About Claims 1 - 5?	26
2.1 The Simplest Possible Model	27
2.2 Allowing for Multi-National Production	29

2.3 Allowing for Many Firms	30
2.4 Multiple Firms and Plants	33
2.5 Agglomeration Effects	34
2.6 Time Structure Revisited	36
2.7 Summary	37
3. Empirical Studies	39
4. Policy Implications	43
5. Conclusions	49
References	55

Comments on: Environmental Regulation, Multinational Companies and International Competitiveness **59**

Tom Jones and Joaquim Oliveira Martins

1. Introduction	59
2. Globalization and Environment: A Framework For Analysis	60
3. Trade Issues	62
4. Foreign Investment Issues	64
5. International Co-operation Issues	67
6. Conclusions	71
References	77

C. Economic Globalization, FDI, Environment and Employment **79**

Rolf-Ulrich Sprenger

1. Introduction	79
2. Globalization: Main Features and Driving Forces	80
2.1 Definition	80
2.2 Feature and Driving Forces of Globalization	81
2.3 Key Trends in Foreign Direct Investment	82
3. FDI and Employment	86
3.1 Analytical Framework	86
3.1.1 Employment Effects of FDI Outflows	86
3.1.2 Employment Effects of FDI Inflows	88
3.1.3 Evaluating the Total Effects of FDI on Employment	89
3.2 FDI and Employment — Empirical Evidence	90

3.2.1 Employment Effects of FDI Outflows	90
3.2.2 Employment Impacts of FDI Inflows in OECD Countries	92
3.2.3 Conclusions — FDI and Employment	98
3.3 FDI and Environment	100
3.3.1 Analytical Framework	100
3.3.2 Empirical Evidence — FDI and Environment	103
3.3.2.1 Environmental Effects of FDI in the Home Country	103
3.3.2.2 Environmental Effects of FDI in Host Countries	104
3.3.2.3 Transboundary Environmental Effects of FDI	111
4. First Conclusions	115
References	117

Comments on: Economic Globalization, FDI, Environment and Employment 121

Michael Rauscher

References	124

D. Trade Neutrality of National Environmental Policy: Some Theoretical Considerations and Simulation Results for Switzerland 125

Gebhard Kirchgässner

1. Introduction	125
2. Possibilities for Trade-Neutrality of Indirect Taxes	127
3. Some Theoretical Considerations	130
3.1 Minimal Tax Revenue Subject to a Given Environmental Standard	131
3.2 Leakage Effects	134
4. Simulation Results for Switzerland	136
4.1 Description of the Model	137
4.2 Simulation Results	141
5. Summary and Concluding Remarks	145
Appendix D1: A Small Theoretical Model of Optimal Tax Revenue	147
Appendix D2: Sectoral Disaggregation	149
References	150

Comments on: Trade Neutrality of National Environmental Policy: Some Theoretical Considerations and Simulation Results for Switzerland 153

Rüdiger Pethig

1. The Problem	153
2. Trade Neutrality	153
3. The Cost of Exempting Energy-intensive Tradables	154
4. Emission Reduction by Raising as Little Tax Revenue as Possible	155
5. Differentiation of Carbon Tax Rates to Limit Carbon Leakage Effects	157
6. Simulation Results for Switzerland	157
References	159

E. World Economic Impacts of the Kyoto Protocol 161

Christoph Böhringer and Thomas F. Rutherford

1. Introduction	161
2. Analytical Framework	161
2.1 Model Characteristics	161
2.2 Parametrization	164
3. The Kyoto Protocol: Abatement Scenario and Computational Results	166
3.1 Abatement Scenario	166
3.2 Quantitative Results	169
4. Concluding Remarks	176
References	178

Comments on: The Kyoto Protocol - Domestic Policy Impacts and International Spill-Overs 181

Ronnie Schöb

1. Introduction	181
2. Carbon Tax is a Tax on Exhaustible Resources	182
3. Environmental Taxes in the Presence of Involuntary Unemployment	184
4. Summing Up	187
References	189

F.	Panel Discussion: Sustainability and New Economic Policy Options	191
	<i>Klaus Conrad</i>	
	Sustainability and New Economic Policy Options: The Example of International Emissions Trading	193
	<i>Carsten Helm</i>	
	Towards an Ecological Economic Policy	197
	<i>Friedrich Hinterberger</i>	

Part II

Environmental Policy Options in a Globalized World

G.	The Economics of the Kyoto Protocol	205
	<i>Franz Hackl and Gerald J. Pruckner</i>	
	1. Introduction	205
	2. A Short History of Climate Policy	206
	2.1 The Pre-Kyoto Era	206
	2.2 The Kyoto Protocol	207
	2.2.1 Emission Trading and Joint Implementation	208
	2.2.2 Clean Development Mechanism	208
	2.2.3 Bubbles and Umbrellas	208
	3. An Economic Model for Global Climate Change	210
	3.1 Marginal Damage (Benefit of Abatement)	210
	3.2 Marginal Costs	211
	3.3 Data	212
	4. Empirical Results	213
	4.1 Global versus National Public Good Effect	213
	4.2 The Simulation of Kyoto Scenarios	216
	5. Summary and Concluding Remarks	220
	References	222

Comments on: The Economics of the Kyoto Protocol **223**

Jürgen Jerger

- 1. Introduction 223
- 2. Suboptimality at the National Level? 224
- 3. Small Differences Between Pareto and Nash Optimality? 225
- 4. Back to National Policies in GHG Abatement? 227

H. Innovation-Augmented Ecological Tax Reform: Theory, Model Simulation and New Policy Implications **229**

Bernd Meyer and Paul J.J. Welfens

- 1. Introduction 229
- 2. Theory of Ecological Tax Reform 232
 - 2.1 Basic Theory 232
 - 2.2 Crucial Issues 233
 - 2.3 Innovation-Augmented Tax Reform 235
- 3. The Policy Framework in Germany and the EU 236
 - 3.1 EU Proposals and Germany's Ecological Tax Reform 236
 - 3.2 Modelling an Innovation-Augmented Ecological Tax Reform 247
 - 3.3 The Simulation Results for the Standard Case and the InnovationAugmented Reform 249
 - 3.4 Some Caveats 252
- 4. Policy Implications 252
- References 266

I. Greening the National Accounts – Approach and Policy Use **269**

Peter Bartelmus

- 1. Rationale: Accounting for Sustainability 269
 - 1.1 Measuring Sustainability – An Emerging Dichotomy 269
 - 1.2 Capital Maintenance – The Door to Environmental Accounting 271
- 2. Approach: Extending the System Boundaries 274
 - 2.1 Asset, Production and Consumption Boundaries 274
 - 2.2 Accounting Identities and Environmentally Adjusted Aggregates 276

2.3 Pricing the Priceless: Methods and Limits of Monetary Valuation	280
3. Policy Uses of Green Accounting	283
3.1 Diagnosis: Is Growth Sustainable?	284
3.2 Policy Formulation: Steering by 'eco-nomic' Variables	285
3.2.1 Natural Wealth Maintenance: Enhancing the Sustainability of Economic Growth	287
3.2.2 Accounting for Accountability: Prompting Cost Internalization	288
3.2.3 Monitoring Policy Response: Environmental Protection Expenditures	290
3.3 Physical Accounting – A Tool of Environmental Management	291
4. Outlook: Beyond Accounting – From Valuation to Evaluation	293
References	295

J. Do Environmental Taxes and Standards Induce Innovation? 301

Jens Hemmelskamp and Fabio Leone

1. Introduction	301
2. Innovation Effects of Environmental Standards and Environmental Taxes	303
2.1 Environmental Standards and Innovation	303
2.2 The Effect of Environmental Taxes on Innovation	305
3. Linking Environmental Economics and Innovation Research	307
4. Empirical Analysis of the Impact of Taxes and Standards on Innovation	308
4.1 Data Problems	308
4.2 The Hypotheses of the Empirical Analysis	310
4.3 Constructing a Regulatory Indicator	311
4.4 Company Innovation Goals As Exogenous Variables	313
4.5 The Basic Model	315
4.6 Results From the Econometric Models	315
5. Conclusion and Further Research	319
References	323

Comments on: Environmental Innovation 327

Hans-Peter Weikard

References 330

K. CO₂ - Taxes, Growth, Labor Market Effects and Structural Change – An Empirical Analysis 331

Bernd Meyer

1. Introduction 331

2. The Model 332

2.1 A First Characterization 332

2.2 The Philosophy of the Model 333

2.3 The Structure of the Model 334

3. The Scenarios 336

3.1 The Business-As-Usual-Scenario and Its Results 336

3.2 The Eco-Tax-Scenario 337

4. Results of Carbon Tax Simulations: The Meaning of Different Compensation Strategies 338

5. Eco Taxes and the Reduction of Employers' Social Contribution 340

5.1 The Macroeconomic Results 340

5.2 The Effects on Prices and Energy Demand 343

5.3 The Effects on Production and Employment 344

5.4 The Burden for Private Households 348

6. Conclusions 349

References 351

L. Environmental Problems in the Single EU Market: Developments, Theory and New Policy Options 353

Paul J.J. Welfens and Rainer Hillebrand

1. Introduction: The Environmental Performance in the European Union 353

2. EU Environmental Policy After Amsterdam 355

3. Theory of Efficient Internalization of Environmental Problems 360

3.1 The Question of an Efficient Competency Allocation 361

3.2 Energy Generation and Transboundary Pollution 363

3.3 Transportation Problems	368
4. Towards New Policy Options	376
4.1 Problems of Efficient Standard-Setting and Self-Regulation	376
4.2 Modified Ecological Tax Reforms at the National Level	378
5. Perspectives and Conclusions	379
Appendix	381
References	386

Comments on: Towards New Policy Options in EU Environmental Policy **389**

Bernd Hansjürgens

1. Introduction	389
2. The Division of Environmental Functions Between EU and Member States	390
3. New Policy Options Through Instrument Choice	391
References	394

M. Economic Growth and Environmental Problems in China **397**

Yushi Mao

1. Executive Summary	397
2. General Picture of China's Natural Environment	397
3. The Transition From Planned Economy to Market Economy and its Environmental Impact	401
4. The Success and Failure of Environmental Policy in China	406
References	413

Comments on: Economic Growth and Environmental Problems in China **415**

Jutta Ludwig

1. Executive Summary	415
2. Introduction	416
3. From Planned Economy to Market Economy in the Chinese Water Sector	416

3.1 Improvement of Agricultural Water Savings	417
3.2 Domestic Water Use	417
3.3 Reduction in Water Demand	419
3.4 Demand-Side-Management to Finance Water Efficiency	421
4. Water Prices and Water Tariff Structures as an Instrument of Sustainable Water Management	422
4.1 Chinese Water Prices in Comparison	422
4.2 Effects of Pricing on Water Demand	425
5. Water Management and International Cooperation	426
5.1 Waste Water Treatment	427
5.2 Eco Efficiency for the Chinese Water Sector	428
