

Contents

Introduction

1 Introduction	
<i>R. Stegmann</i>	3

Fundamental Aspects

2 Hazardous Waste Contaminated Sites and Soil Awareness – Some Social Observations	
<i>H.W. Thoenes</i>	11
3 Do Contaminated Soils Have to Be Decontaminated?	
<i>G. Miehlisch</i>	15
4 An Overview of Soil and Sediment Treatment Research in the Netherlands	
<i>W. Rulkens</i>	21

Chemical Analysis of Contaminated Soils

5 How Much Analytical Work Do We Need?	
<i>H. Steinhart, T. Kacker, S. Meyer, G. Biernoth</i>	37
6 Methods for the Determination of Mineral Oil Hydrocarbons in Soil Materials for the Evaluation of Remediation Measures	
<i>J. Bundt</i>	49
7 Determination of the TPH- and PAH-Content of Mineral Oil Contaminated Soils by Thin-Layer Chromatography	
<i>C. Reimers</i>	63
8 Solid State NMR Spectroscopy Using ¹³ C-Labelled PAH	
<i>E.T.K.Haupt, T. Kacker, H. Steinhart</i>	83

9 Syntheses of ^{13}C -Labelled Polycyclic Aromatic Compounds	
<i>C. Garms, W. Francke</i>	95

10 Field Analytical Techniques for the Analysis of Contaminated Soil	
<i>G. Matz, W. Schröder</i>	133

Ecotoxicological Assessment of Soils

11 Advances in Biological Assessment of Chemical-Impacted Soils	
<i>W. Ahlf, W. Frühling, H. Neumann-Hensel</i>	151
12 Ecotoxicological Assessment of Soils – Bioavailability from an Ecotoxicological Point of View	
<i>W. Kördel, K. Hund-Rinke</i>	161

Bioremediation

13 Bioavailability – the Key Factor of Soil Bioremediation	
<i>B. Mahro, R. Müller, V. Kasche</i>	181
14 Bioavailability of Organic Compounds Sequestered in Soils	
<i>M. Alexander</i>	197
15 Bacterial Strategies to Improve the Bioavailability of Hydrophobic Organic Pollutants	
<i>L.Y. Wick, D. Springael, H. Harms</i>	203
16 Formation of Residues of Organic Pollutants Within the Soil Matrix – Mechanisms and Stability	
<i>M. Kästner, H.H. Richnow</i>	219
17 The Significance of Bound Residues in the Bioremediation Process of PAH Contaminated Sites	
<i>E. Annweiler, H.H. Richnow, W. Michaelis</i>	253
18 Humification of PAH and TNT During Bioremediation – Evaluation of Long Term Risk and Sustainability	
<i>A. Eschenbach, H. Mescher, R. Wienberg, B. Mahro</i>	271

19 Humification as a Remediation Strategy for TNT Contaminations: Applications and Limitations <i>R. Winterberg</i>	293
20 Strategies to Improve PAH Bioavailability: Addition of Surfactants, Ozonation and Application of Ultrasound <i>A. Tiehm</i>	299
21 Bioaugmentation: Advantages and Problems Using Micro Organisms with Special Abilities in Soil Decontamination <i>R. Müller, B. Mahro</i>	325
22 Optimisation of Microbial Soil Treatment <i>C. Hupe, M. Koning, J.-C. Lüth, J. Heerenklage, R. Stegmann</i>	343
23 Carbon Balance and Modelling of Oil Degradation in Soil Bioreactors <i>S. Lotter, J. Heerenklage, R. Stegmann</i>	355
24 Degradation of Xenobiotics at Elevated Temperatures <i>H. Feitkenhauer, S. Hebenbrock, U. Deppe, H. Märkl, G. Antranikian</i>	365
25 Influence of Oil-Contamination on N-Mineralisation in Soils <i>A. Kiehne, G. Miehlisch, A. Gröngroft</i>	385
26 Development and Application of an Oxygen-Controlled High-Pressure Aeration System for the Treatment of TPH-Contaminated Soils in High Bio- piles (a Case Study) <i>M. Koning, I. Cohrs, R. Stegmann</i>	399

Physical Treatment

27 Remediation of Soils by Washing Processes – an Historical Overview <i>M. Wilichowski</i>	417
28 Ways to Improve the Efficiency of Soil Washing <i>J. Werther, O. Malerius, J. Schmidt</i>	435
29 New Developments in Soil Washing Technology <i>Th. Neeße</i>	461
30 Clean-Up and Assessment of Metal Contaminated Soils <i>W. Calmano, S. Mangold, H. Stichnothe, J. Thöming</i>	471
31 Supercritical Water and Supercritical Carbon Dioxide for Cleaning of Soil Material <i>G. Brunner, B. Misch, A. Firus, K. Nowak</i>	491

32 Application of the Physical-Chemical Desorption Technology for Soil Decontamination <i>B. Niemeyer</i>	519
33 Elimination of Hazardous Components from Fine-Grained Particles and Sludges by the Application of the Steam Stripping Process <i>J. Höhne, B. Niemeyer</i>	531
34 Degradation of Chlorinated Arenes by Electroreduction <i>J. Voss, M. Altrogge, D. Golinske, O. Kranz, D. Nünnecke, D. Petersen, E. Waller</i>	547

Natural Attenuation

35 Natural Attenuation – Non-Destructive Processes <i>U. Förstner, J. Gerth</i>	567
36 Natural Attenuation as an Approach to Remediation of Groundwater Pollution at Landfills <i>T. H. Christensen, P.L. Bjerg, P. Kjeldsen</i>	587
37 Natural Attenuation of Inorganic Pollutants – A Critical View <i>J. Gerth, F. Dankwarth, U. Förstner</i>	603

Appendix

38 Determination of Mineral Oil Hydrocarbons by Means of Thin-Layer Chromatography – Analytical Directions <i>C. Reimers</i>	617
39 Determination of the PAH-Content in Soils by HPTLC – Analytical Directions <i>C. Reimers</i>	623
40 Determination of the Total Petroleum Hydrocarbon Content in Soils by Gas-Chromatography <i>C. Reimers</i>	629
41 Application of Test Systems for a Balance-Based Examination of Biodegradation of Contaminants in Soil <i>K. Hupe, M. Koning, J.-C. Lüth, I. Cohrs, J. Heerenklage, R. Stegmann</i>	637
42 Electroreduction <i>J. Voss, M. Altrogge, D. Golinske, O. Kranz, D. Nünnecke, D. Petersen, E. Waller</i>	651

Treatment of Contaminated Soil

Fundamentals, Analysis, Applications

Stegmann, R.; Brunner, G.; Calmano, W.; Matz, G. (Eds.)

2001, XVI, 658 p., Hardcover

ISBN: 978-3-540-41736-1
