The Regulation of eIF4F During Cell Growth and Cell Death

Simon J. Morley

1	Introduction	1
2	Mechanism and Regulation of Initiation of Protein Synthesis	1
2.1	The mRNA-Binding Initiation Factors	3
2.1.1	Initiation Factor eIF4E	3
2.1.2	eIF4E Phosphorylation	5
2.2	Initiation Factor eIF4A	5
2.3	eIF4B and eIF4H	6
2.4	Scaffold Protein eIF4G	7
2.5	Poly(A)-Binding Protein (PABP)	7
2.6	eIF4E Binding Proteins	8
3	The Regulation of eIF4F Complex Levels	9
3.1	eIF4F: An Overview	9
3.2	eIF4F and Increased Rates of Protein Synthesis	10
3.3	eIF4F and Decreased Rates of Protein Synthesis	12
3.4	Internal Ribosome Binding, eIF4E, eIF4G Integrity and Reduced Levels of eIF4F	14
3.4.1	Initiation on Viral Internal Ribosome Entry Sites	14
3.4.2	Potential IRES in Capped, Cellular mRNAs	14
4	Cell Death and the eIF4F Complex	17
4.1	Apoptosis: An Overview	17
4.1.1	Apoptosis and Protein Synthesis Rates	18
4.2	Apoptosis and the Initiation Factors Involved in Binding mRNA to the Ribosome	18
4.2.1	eIF4GI and eIF4GII	18
4.2.2	eIF4B, eIF3p35, 4E-BP1 and eIF2 α	20
4.3	Possible Mechanisms of Translational Control During Apoptosis	22
4.3.1	Cleavage of eIF2 α , eIF4B, eIF3p35 and the Increased Binding of 4E-BP1 to eIF4E	23
4.3.2	Cleavage of eIF4G	24
	References	26

Regulation of the Activity of Eukaryotic Initiation Factors in Stressed Cells

Gert C. Scheper, Roel Van Wijk, and Adri A.M. Thomas

1	Stress and Protein Synthesis	39
1.1	Inhibition of General Protein Synthesis	39
1.2	Phosphorylation of eIF2	39
1.3	Inactivation of eIF2B	41
1.4	Inactivation of the Cap-Binding Complex eIF4F	43
1.5	Dephosphorylation of eIF4E	44
1.6	Binding of eIF4E to 4E-BPs	44
2	Preferential Translation of HSP mRNAs	45
3	Experimental Procedures	50
	References	52

Initiation Factor eIF2 α Phosphorylation in Stress Responses and Apoptosis

Michael J. Clemens

1	Introduction	57
2	EIF2 α Kinases and Their Regulation	60
2.1	Double-Stranded RNA-Activated Protein Kinase (PKR)	61
2.2	The <i>Saccharomyces cerevisiae</i> Protein Kinase GCN2	64
2.3	PKR-Like Endoplasmic Reticulum Protein Kinase (PERK)	65
2.4	Haemin-Regulated Inhibitor (HRI)	66
3	Physiological Regulation of eIF2 α Phosphorylation	67
3.1	Stress Responses	69
3.1.1	Heat Shock	69
3.1.2	Nutrient Supply	70
3.1.3	Regulation by Calcium	71
3.1.4	The Relative Importance of eIF2 α Phosphorylation and Other Mechanisms in Stress Responses	71
3.2	Apoptosis	74
4	What Are the Consequences of eIF2 α Phosphorylation?	76
5	Summary	78
	References	78

Elongation Factor-2 Phosphorylation and the Regulation of Protein Synthesis by Calcium

Angus C. Nairn, Masayuki Matsushita, Kent Nastiuk, Atsuko Horiuchi, Ken-Ichi Mitsui, Yoshio Shimizu, and H. Clive Palfrey

1	Introduction	91
2	Phosphorylation of eEF2 and Regulation of Polypeptide Elongation in Vitro	92
3	Structure and Regulation of EF2 Kinase	95

4	Phosphorylation of EF2 Kinase by PKA and Other Kinases	102
5	Regulation of EF2 Kinase Turnover by a Ubiquitination/Proteasome-Dependent Pathway	103
6	Hormonal Control of eEF2 Expression and Phosphorylation . . .	105
6.1	Regulation of eEF2 Protein	106
6.2	Regulation of eEF2 Phosphorylation	107
6.3	Regulation of eEF2 Dephosphorylation	108
7	Relationship of eEF2 Phosphorylation to Protein Synthesis and Growth in Proliferating Cells	109
8	Cell Cycle-Dependent Phosphorylation of eEF2	111
9	Phosphorylation of eEF2 in Neurons	114
10	eEF2 Phosphorylation and the Regulation of Local Protein Synthesis in Neurons	116
11	eEF2 Phosphorylation and Glutamate-Mediated Control of Protein Synthesis at Developing Synapses	118
