Foreword *iv*

About the Author *xiii*

Acknowledgments *xv*

Introduction *xvii*

Part One ADO Classic **1**

Chapter 1 Working with ADO **3**

Choosing the “Right” Version of ADO 3

What’s New in ADO 2.5? 6

What’s New in ADO 2.6? 8

What’s New in ADO 2.7? 9

The ADO Component Checker 9

Installing ADO 10

Deploying ADO 11

The .NET Framework Approach 13

Getting More Help with ADO 14

Chapter 2 Introduction to ADO **15**

ADO and OLE DB 15

The ADO Object Model 18

Chapter 3 Creating ADO Objects **23**

Instantiating ADO Objects 23

Instantiating ADO Components in Visual Basic Script 25

When Things Go Wrong 27

Contents

Chapter 4 Getting Connected	29
<i>The ADO Connection Object</i>	<i>31</i>
<i>Using the Connection Object</i>	<i>34</i>
<i>Managing Transactions</i>	<i>74</i>
 Chapter 5 ADO Command Strategies	 81
<i>Inner Workings of the Command Object</i>	<i>82</i>
<i>Building Command Objects</i>	<i>86</i>
<i>Managing Command Objects</i>	<i>124</i>
<i>Performance Considerations: Using Command Objects Wisely</i>	<i>137</i>
 Chapter 6 Recordset Strategies	 139
<i>Introducing Recordsets</i>	<i>139</i>
<i>Constructing Recordset Objects</i>	<i>144</i>
<i>Working with Recordset Objects</i>	<i>148</i>
 Chapter 7 Manipulating Your Recordset	 225
<i>Data Binding Your Recordset</i>	<i>225</i>
<i>Understanding the State Property</i>	<i>226</i>
<i>Fetching Techniques</i>	<i>227</i>
<i>Sorting, Filtering, and Finding</i>	<i>243</i>
<i>Disconnecting Recordsets</i>	<i>248</i>
<i>Choosing Read-Only vs. Read-Write Recordsets</i>	<i>249</i>
<i>Working with Field Objects</i>	<i>249</i>
<i>Working with Stored Procedures</i>	<i>261</i>
<i>Accessing Deprecated Recordsets</i>	<i>287</i>
<i>Recordset Events</i>	<i>289</i>
 Chapter 8 Understanding Record and Stream Objects	 293
<i>Introducing the ADO Record Object</i>	<i>293</i>
<i>Introducing the Stream Object</i>	<i>294</i>

Chapter 9 Passing Resultsets Between Layers	301
<i>Delivering Pizza with a Dump Truck</i>	<i>302</i>
<i>Understanding Recordset Marshaling</i>	<i>306</i>
<i>Passing Disconnected Recordsets</i>	<i>312</i>
<i>Passing Strings and String Arrays</i>	<i>318</i>
<i>Passing OUTPUT Parameters Instead of Rowsets</i>	<i>321</i>
<i>Passing Variant Arrays</i>	<i>324</i>
<i>Passing User-defined Structures</i>	<i>326</i>
<i>Passing PropertyBags</i>	<i>338</i>
<i>Passing XML</i>	<i>341</i>
 Chapter 10 Getting Your Data into Shape	 345
<i>The Shape Provider</i>	<i>346</i>
<i>Building a Simple Shape</i>	<i>347</i>
<i>Why Not Use the Data Environment Designer?</i>	<i>353</i>
<i>Analyzing the Impact</i>	<i>356</i>
<i>Finding a Better Way</i>	<i>357</i>
<i>The Impact of the “Just Enough” Approach</i>	<i>359</i>
 Chapter 11 Data Access Tips and Techniques	 361
<i>Referencing Data on Other Servers</i>	<i>361</i>
<i>TSQL Tips</i>	<i>362</i>
<i>Performance-Tuning Stored Procedures</i>	<i>365</i>
<i>SET NOCOUNT Using OLE DB Providers</i>	<i>366</i>
<i>Granting Permissions</i>	<i>367</i>
<i>More Recordset Secrets</i>	<i>369</i>
<i>Working with the Grid Control</i>	<i>374</i>
<i>Working with Strings</i>	<i>375</i>
<i>Working with Graphics</i>	<i>377</i>
<i>MDAC/ADO Setup Issues</i>	<i>377</i>
<i>Hooking up Visual Basic/ADO Help</i>	<i>378</i>
 Chapter 12 ADO and the Visual Database Tools	 379
<i>Using the Data View Window</i>	<i>380</i>
<i>Using the Data Environment Designer</i>	<i>386</i>
<i>Using ADO without the Data Environment Designer</i>	<i>394</i>
<i>Using the Data Object Wizard</i>	<i>395</i>

Part Two ADO.NET and the .NET Framework.....399

Chapter 13 Introducing ADO.NET401

<i>How We Got Here</i>	401
<i>ADO.NET—A New Beginning</i>	405
<i>Understanding ADO.NET Infrastructure</i>	407
<i>ADO.NET .NET Data Providers</i>	413
<i>ADO.NET and Disconnected Data Structures</i>	418
<i>The System.Data Namespace</i>	419
<i>ADO.NET's Low-Level Data Stream</i>	432

Chapter 14 ADO.NET—Getting Connected435

<i>ADO.NET .NET Data Providers</i>	436
<i>Creating ADO.NET Connection Objects</i>	438
<i>Connecting via the SqlClient .NET Data Provider</i>	446
<i>Managing Transactions</i>	453
<i>Connecting with the Odbc .NET Data Provider</i>	454
<i>Opening ADO.NET Connections in Code</i>	457
<i>Using the IDE to Get Connected</i>	458
<i>Closing Connections</i>	460
<i>COM-based ADO as a .NET Data Provider</i>	468

Chapter 15 ADO.NET Command Strategies473

<i>Understanding ADO.NET Commands</i>	473
<i>Binding to Resultset Columns</i>	524

Chapter 16 ADO.NET DataReader Strategies529

<i>Comparing ADOc with ADO.NET</i>	530
<i>Understanding the DataReader</i>	532
<i>Using the DataReader Get Methods to Retrieve Data</i>	539
<i>Cleaning Up After your DataReader</i>	543

Chapter 17 Using the DataTable and DataSet	545
Understanding the DataSet and DataTable Structure	547
Importing ADOc Recordsets	555
Building DataTables	559
Accessing DataTable Data	567
Accessing DataSet Data	581
Binding to DataSets	582
 Chapter 18 Filtering, Sorting, and Finding	 585
Filtering and Sorting with the Select Method	586
Working with the DataViewManager	598
Using the Find Methods	600
 Chapter 19 ADO.NET Update Strategies	 607
Changing Data—The Fundamentals	608
Update Strategies	622
Using Visual Studio to Generate Action Queries	633
Retrieving Autonumber, Identity, or GUIDs	641
Understanding the Update Methods	645
Update Performance	647
Updating the Authors Table—An Example	649
Update Error Handling Strategies	656
Handling Update Method Exceptions	660
Executing Ad Hoc Queries to Perform Updates	664
Merging and Transporting Data	664
 Chapter 20 ADO.NET Constraint Strategies	 667
Understanding .NET Constraints	667
How ADO.NET Implements Constraints	669
Creating DataRelation Objects	679
 Chapter 21 ADO.NET Error Management Strategies	 685
Structured Exception Handling	686
Understanding Try/Catch	686
Trapping Specific vs. General Exceptions	690
The System.Data Exceptions	690
Displaying the Error Message	695

Contents

<i>Chapter 22 ADO.NET and XML</i>	697
<i>XML Support in ADO.NET</i>	698
<i>Standardizing on XML Formats</i>	699
<i>Understanding XML and DataSet Objects</i>	700
<i>Creating a Web Service as an XML Data Source</i>	710
<i>Passing an Updated DataSet Back to a Web Service</i>	720
<i>Creating Custom Error Handlers</i>	725
<i>ADO.NET and SOAP</i>	726
 <i>Appendix A Working with the Biblio Sample Database</i>	729
 <i>Appendix B CompareCursorLocation Chart</i>	731
 <i>Appendix C ADOc Dynamic Properties</i>	743
 <i>Index</i>	753

ADO.NET and ADO Examples and Best Practices for VB
Programmers

Vaughn, W.

2002, XX, 771 p. 106 illus. With online files/update.,
Softcover

ISBN: 978-1-893115-68-2
