
CONTENTS

List of Tables.....	xv
1 Introduction.....	1
1.1 The Marine Diesel Propulsion System.....	1
1.1.1 Historical Note	1
1.1.2 Marine Engine Configuration and Operation.....	1
1.1.3 The Screw Propeller.....	6
1.2 Contribution of this Work	8
1.2.1 Statement of the Problem	8
1.2.2 Overview of the Approach	9
1.2.3 Text Outline	10
2 Marine Engine Thermodynamics	13
2.1 Physical Engine Modelling	13
2.2 Turbocharged Engine Model Variables	15
2.3 Turbocharged Engine Dynamical Equations.....	17
2.4 Turbocharged Engine Algebraic Equations	20
2.4.1 Turbocharger Compressor.....	20
2.4.2 Intercooler	21
2.4.3 Scavenging Receiver	21
2.4.4 Engine Cylinders.....	22
2.4.5 Exhaust Receiver.....	25
2.4.6 Turbocharger Turbine	27
2.5 Cycle-mean Model Summary and Solution Procedure	28
2.5.1 Direct-drive Turbocharged Engine Model Summary.....	28
2.5.2 Engine Simulation Procedure.....	30
2.5.3 Typical Case Numerical Example.....	32
2.5.4 Torque Map Generation Procedure	37
2.5.5 Test Case Investigation	38
2.6 Summary	42
3 Marine Plant Empirical Transfer Function.....	43
3.1 Black-box Engine Modelling	43
3.2 Shafting System Dynamical Analysis	45
3.2.1 Lumped Two-mass Model	45
3.2.2 Typical Case Numerical Investigation	49
3.3 The Plant Transfer Function.....	50
3.3.1 Black-box Model Development and Identification	50
3.3.2 Full-order Transfer Function.....	51
3.3.3 Reduced-order Transfer Function	55
3.3.4 Plant Transfer Function Identification	58

3.3.5	Identification of Typical Powerplant.....	61
3.4	Summary	69
4	Robust PID Control of the Marine Plant	71
4.1	Introduction	71
4.1.1	The PID Control Law	71
4.1.2	Proportional Control.....	72
4.1.3	Proportional-Integral Control	74
4.1.4	Proportional-Integral-Derivative Control	77
4.2	Application Aspects of Marine Engine Governing	80
4.2.1	Functionality Requirements	80
4.2.2	Spectral Analysis of Engine and Propeller Torque	81
4.2.3	Example of Propulsion Plant Analysis	84
4.3	PID H-infinity Loop Shaping	86
4.3.1	Theoretical Note	86
4.3.2	PID Controller Tuning for Loop Shaping	87
4.4	PI and PID H-infinity Regulation of Shaft RPM.....	88
4.4.1	Overview and Requirements	88
4.4.2	The PI H ∞ RPM Regulator	89
4.4.3	The PID H ∞ RPM Regulator	91
4.4.4	Robustness Against Neglected Dynamics	93
4.4.5	Numerical Investigation of a Typical Case	97
4.5	D-term Implementation Using Shaft Torque Feedback.....	103
4.5.1	Real-time Differentiation and Linear Filters	103
4.5.2	RPM Derivative Estimation from Fuel Index and Shaft Torque	105
4.5.3	The PID H ∞ RPM Regulator with Shaft Torque Feedforward	108
4.5.4	Typical Case Numerical Investigation	110
4.6	Summary	112
5	State-space Description of the Marine Plant.....	115
5.1	Introduction	115
5.1.1	Overview of the Approach	115
5.1.2	Mathematical Formulation and Notation.....	117
5.2	The Neural Torque Approximators	122
5.2.1	Configuration of the Approximators	122
5.2.2	Training of the Approximators.....	127
5.2.3	Typical Case Numerical Investigation	128
5.3	State Equations of the Marine Plant	132
5.4	State-space Decomposition and Uncertainty	133
5.4.1	Manipulation of Equations and Variables	133
5.4.2	State-space Parametric Uncertainty and Disturbance	137
5.4.3	Uncertainty Identification of Typical Powerplant	146
5.5	Transfer Function Matrix of the Marine Plant.....	147
5.5.1	The Open-loop Transfer Function Matrix	147
5.5.2	Empirical and State-space Transfer Function.....	148

5.6 Summary	151
6 Marine Plant Robust State-feedback Control	153
6.1 Introduction	153
6.1.1. Controller Design Framework.....	153
6.1.2. Control of N^2M	154
6.1.3. Control of UPM	156
6.1.4. Architecture of the Propulsion Control System	157
6.2 Supervisory Setpoint Control of the Marine Plant	159
6.2.1 Setpoint Control Requirements	159
6.2.2 Supervisory Controller Structure	161
6.2.3 Test Case Investigation	164
6.2.4 The Low-pass Setpoint Filter	166
6.3 Full-state-feedback Control of the Marine Plant	169
6.3.1 Theoretical Background	169
6.3.2 Practical H_∞ -norm Requirements	172
6.3.3 Marine Plant Regulator Synthesis	175
6.3.4 Test Case: MAN B&W 6L60MC Marine Plant	177
6.3.5 Robustness Against Model Uncertainty	181
6.4 State-feedback and Integral Control of the Marine Plant	185
6.4.1 Steady-state Error Analysis	185
6.4.2 Integral Control and Steady-state Error	187
6.5 Summary	189
7 Closure	191
7.1 Conclusions and Discussion.....	191
7.2 Subjects for Future Investigations and Research.....	193
Appendix A Non-linear Algebraic Systems of Equations.....	195
Appendix B Second-order Transfer Function with Zero	197
B.1 Transient Behaviour Analysis	197
B.2 Frequency Response and H_∞ -norm Requirements	199
References.....	205
