

## ERRATUM

In place of the original development environment applications described in Chapter 2 of the text the author now recommends the use of WAMP5 as a means of obtaining and installing a complete PHP development environment for use with this text. WAMP5 can be downloaded from here:

<http://www.en.wampserver.com/download.php>  
<https://sourceforge.net/projects/wampserver/>  
<http://www.hotscripts.com/Detailed/31482.html>

To quote the web site (<http://www.en.wampserver.com/presentation.php>):  
"WAMP5 installs automatically Apache 1.3.31 ,PHP5, MySQL database ,PHPmyadmin and SQLitemanager on your computer. It's principal aim is to allow you to easily discover the new version oh PHP : PHP5. WAMP5 comes with a service manager installed as a tray icon. It allows you to manage WAMP5 and access all services.".

Some more information on WAMP5 can be found in the Wikepedia:

<http://en.wikipedia.org/wiki/WAMP>
