

Contents

- 1 Introduction 1**
 - 1.1 Motivation for Requirements Engineering 1
 - 1.2 A Little History 5
 - 1.3 People, Communication and Requirements 6
 - 1.4 A Framework for RE 7
 - 1.5 Requirements Types and RE Pathways 11
 - 1.6 Constraints on Design 13
 - 1.7 Documenting Requirements 15
 - 1.8 Summary 18

- 2 Understanding People 19**
 - 2.1 Introduction 19
 - 2.2 Cognitive Models 19
 - 2.3 Speech and Language 21
 - 2.4 Memory 21
 - 2.4.1 Working Memory 21
 - 2.4.2 Long-term Memory 22
 - 2.5 Thinking and Problem Solving 27
 - 2.5.1 Mental Models 29
 - 2.5.2 Levels of Reasoning 30
 - 2.6 Attention 31
 - 2.7 Motivation and Arousal 32
 - 2.7.1 Motivation 32
 - 2.7.2 Arousal 33
 - 2.8 Stress and Fatigue 34
 - 2.9 Human Error 35
 - 2.10 Social Issues 38
 - 2.10.1 Power 38
 - 2.10.2 Trust 40
 - 2.11 Summary 42

- 3 RE Tasks and Processes 45**
 - 3.1 Requirements Elicitation 45

3.1.1 Scoping	47
3.2 Analysis	48
3.2.1 Goal Analysis	48
3.2.2 Event Analysis	50
3.2.3 Analysis Techniques	51
3.3 Modelling	51
3.4 Validation	54
3.5 Negotiation	55
3.5.1 Managing Negotiation	57
3.6 Functional Allocation	59
3.7 Processes for Discovering and Refining Requirements	61
3.7.1 Policy-Driven Requirements	61
3.7.2 Problem-Initiated Requirements	63
3.7.3 Requirements-by-Example	64
3.7.4 Requirements Imposed by the External Environment	67
3.8 RE for Different Target Products	68
3.8.1 The Market Dimension	69
3.8.2 The Specific to Generic Dimension	72
3.8.3 The Service Dimension	75
3.9 Summary	77
4 Understanding Requirements Conversations	79
4.1 Introduction to Discourse Theory	79
4.2 Conversations and Context	82
4.3 Conversation Structures	84
4.4 Non-Verbal Communication	86
4.5 Dialogue Acts and Patterns	87
4.5.1 Requirements Elicitation	88
4.5.2 Analysis and Modelling Dialogues	96
4.5.3 Refining Requirements	98
4.5.4 Validation Dialogues	98
4.5.5 Negotiation Dialogues	100
4.6 Summary	102
5 Representing the Problem	103
5.1 Representation Criteria	103
5.2 Representations and Information Requirements	106
5.3 Media and Representation	109
5.4 Choosing Representations for RE Tasks	113
5.4.1 Requirements Acquisition and Fact Capture	113
5.4.2 Analysis and Modelling	114
5.4.3 Validation	116
5.4.4 Negotiation	117
5.5 Delivering Representations on Artefacts	118
5.6 Representational Paradigms	119

5.6.1 Informal Models and Records	119
5.6.2 Formal Models	120
5.6.3 Scenarios	121
5.6.4 Prototypes	122
5.6.5 Design Rationale and Claims	122
5.7 Summary	125
6 Scenario-Based Requirements Engineering (SCRAM)	127
6.1 Background	127
6.2 Initial Requirements Capture	129
6.2.1 Goal Analysis	129
6.3 Storyboarding and Design Visioning	130
6.4 Requirements Exploration	132
6.4.1 Session Design	133
6.4.2 Contextual Scenario	133
6.5 Walkthrough Approach	136
6.5.1 Operational Guidance for Analysis Sessions	136
6.5.2 Questioning Strategies	137
6.6 Session Summary	139
6.7 Post-Session Analysis	140
6.8 Some Warnings	141
6.9 Prototyping and Requirements Validation	141
6.9.1 Session Design	142
6.9.2 Data Collection and Analysis	143
6.10 Postscript	146
6.11 Summary	147
7 Requirements Analysis for Safety Critical Systems	149
7.1 Problems and Issues in Safety Critical Systems	149
7.2 Analyzing Requirements for Dependable Systems	150
7.2.1 Influencing Factors	151
7.2.2 Safety Critical Scenario Analysis	155
7.2.3 Event Pattern Analysis	163
7.3 Modelling Combinations of Influencing Factors	165
7.3.1 Results of Causal Analysis	170
7.3.2 Linking Human Errors to Requirements	173
7.3.3 Case Study: Consequence Analysis	177
7.4 Formal Reasoning About Safety	179
7.5 Summary	180
8 Future Directions	181
8.1 Requirements and Design	181
8.2 Requirements for Service-Oriented Software	183
8.3 High-Level Requirements Languages	186
8.3.1 Natural Language Requirements	186

8.4 Multiple Methods	188
8.5 End-User Development	189
8.6 Comparison of Approaches	191
8.7 Requirements in Systems Engineering	193
8.8 Requirements and Software Evolution	193
8.9 RE Challenges	197
8.10 Summary	200
References	201
Index	211
