

A

- acoustic processing, 205-, 215, 217
- agrammatism, 62-
- amalgams, 107-110
- amplitude modulation, 218
- animal models, 241, 243-245
- aphasia, 30-, 64, 74-
- articulatory gestures, 275
- attention
 - selective, 157-
 - ~al gradient, 147-148
- auditory
 - discrimination, 362-365
 - dysfunction, 359-360, 366
 - processes, 223-224

B

- bilingual, 110
- binarity, 113
- binocular instability, 203-204
- bottom up, 177-180
- brain
 - injury, 166, 246

C

- cell assembly, 165, 181
- cerebellum, 204, 208-, 265, 270-276
- Chinese language, 280
- closed class, 30, 62, 64-77

- cognitive
 - ability, 185-186
 - development, 359
 - processes, 12, 124-, 254-257, 293-294
- coherence, 45-
- coherent motion, 201-, 225-234
- competence difference hypothesis, 84-85
- concatenation, 105-
- context modes of processing, 25-, 36-37
- contiuity, 84-85
- contrastive signal coherence (CSC), 41, 45-57
- cortical dominance, 166, 172, 179-, 186
- cortical malformation, 245-246
- cylinder entropies, 45-

D

- dendritic spread, 200
- desymbolization, 11, 181-182
- developmental
 - delay, 182, 217, 330-
 - dyslexia, 173-174, 184-, 201-, 215-, 242-247, 254-, 265-, 283-, 330-, 359-
 - impairment, 180
 - individual development, 182
 - word blindness, 166-168
- discrepancy criterion, 16, 184-186, 188, 254-, 350

- dual-route model, 253-254
- Dutch language, 79-, 107-110
- dyslexia, cf. develop. dyslexia

E

- education, 168, 184, 254, 337
- EEG (electroencephalogram), 43-, 362-
- English language, 251-252, 62-, 105-, 214-215, 331
- Event Related Potentials (ERP), 31, 43-57
- evoked potential
 - visual, 47-52
 - auditive, 218-
- evolution 181-182
- eye movements, 121-, 138-148, 203, 226-

F

- fixation, 122-133, 138-149, 175, 225-226
- FMRI (Functional Magnetic Response Imaging), 241, 359
- focusing effect, 156
- frequency modulation, 216-
- functional
 - coordination, 174-
 - fragmentation, 176
 - projections, 87, 108-

G

- ganglion cell bodies, 200
- gaze duration, 126-
- genetic

- linkage, 167, 207, 246, 284
 - mechanisms, 207
- German language, 36-, 79-, 105-, 214, 286-294, 331
- grammar, 79-, 105-

H

- head turn preference paradigm, 79, 92-
- Hebrew language, 283
- hemispheric dominance, cf. cort. dominance

I

- immunological, 207-
- information integration, 47, 174-
- intelligence, 165-166, 184-186, 221, 254-257
- IQ, cf. intelligence

J

- Japanese language, 157

K

- kana, 156-157
- kanji, 156-157
- kindergarten, 302-

L

- lateral geniculate nucleus (LGN), 200-208, 231

- learning to read, 5, 12, 171, 179, 182, 218, 300
- lexeme frequency, 132-133
- lexical
 - ambiguity, 28-, 130-131
 - processing, 12-13, 25-, 129, 140-141, 144-
- low level, 15, 124-, 148-149, 207, 225

M

- magnocellular, 200-209, 241-
- mirror-image generalization, 12, 179-
- mismatch negativity (MMN), 359-
- morphological complexity, 131-132
- morphology, 88, 126
- motion sensitivity, 200-206, 225-
- motor system, 241
- multicausal, 15, 184-189

N

- neighborhood size, 129-130
- neural activity, 65, 165
- neurophysiological processes, 199-, 271-272, 360-

O

- object constancy, 165, 178
- oculomotor control, 137-
- open class, 64-76, 111-112
- orthographic
 - processing, 301-, 330-350

- sensitivity, 214-216, 229-232
 - skills, 202-203, 208-209, 214-215
 - system, 331
 - units, 251, 257-258,
- orthography, 129-130, 157, 202-, 251-, 286, 301-, 331

P

- parafoveal processing, 123-129, 141-
- parallel processing, 148-150
- parameter setting, 85, 96-
- parvocellular, 200-201, 284-285
- phonemic awareness, 215, 258-261
- phonological
 - awareness, 176, 215-224, 246, 261, 266, 299-, 316-325, 332-333, 350-352
 - neighborhood, 129-130
 - processes, 12, 214, 261, 300-
 - processing, 10-11, 176, 216-, 246, 253-, 266, 307, 333-, 360
 - route, 200, 252-turnaround, 14, 173
- phonology, 129-130, 214-, 251, 301-302
- phrase structure, 44, 85, 106-
- pivots, 111
- psycholinguistic, 172-, 252-

R

- RAN, 300-312

- rapid
 - serial naming, 299-
 - tapping, 241
- reaction time (RT), 28-, 180, 256-, 364
- reading
 - acquisition, 182, 266, 299
 - disability, cf. dyslexia
 - instruction, 184, 302
 - level match design, 261
 - normal ~, 11-, 123, 141, 148, 169, 293-,
 - silent ~, 199, 304-
- reading span test (RST), 155-
- recurrent network, 61, 64-
- reversal errors, 15, 165, 172-

S

- saccade programming, 141, 147-
- saliency map, 149
- sensory-linguistic approach, 232-
- sentence comprehension, 12, 25-, 66-67, 156, 161
- severe speech impairment, 315-
- short term memory, 62-, 176-, 316-,
- simulation, 66-, 141
- sound discrimination, 360-
- Spanish language, 214, 251-, 331
- specifier, 106-
- speech perception, 216-, 351
- spelling, 129, 202, 224, 229-, 255 f., 269-, 299-, 315-, 329-
- strephosymbolia, 14-, 169-
- sustained, 14-, 226
- symmetry generalization, 15, 178-,

- syntax
 - acquisition, 105-
 - objects, 105-
 - processing, 257

T

- temporal
 - distribution, 41-, 75
 - processing, 227, 241-, 266-
 - processing deficit, 266-
- thalamus, 200-, 242-
- three stage model, 41-
- top down, 177, 230-
- topographical distribution, 41-
- transient, 14-, 207-, 225-285
- transparent orthography, 251-

V

- verb placement, 79-
- ventrolateral stream, 200
- visual
 - cortex, 12, 33, 170, 183, 200-, 228-
 - deficit, 14, 169-, 207, 225-, 284-
 - object recognition, 11, 165-166
 - processing, 16, 138, 173, 181-, 225-, 266, 359
 - route, 253, 333
 - system, 14, 182, 200-, 226, 231, 241-, 284
 - word center, 167-
- visuomotor, 124-
- vocabulary, 109, 217, 303-

W

- well-formedness condition,
86
- word
 - blindness, 14, 166-
 - identification, 252-253,
301-, 352
 - recognition, 129-, 221-,
252-, 282-, 329-
- working memory
 - deficit, 284-
 - visual~, 283-

Basic Functions of Language, Reading and Reading
Disability

Witruk, E.; Friederici, A.D.; Lachmann, Th. (Eds.)

2002, IX, 377 p., Hardcover

ISBN: 978-1-4020-7027-3
