

Contents

- A. Introduction 1
 - Project Physics and Beyond 2
 - Organization and Overview 3
 - The Textbook 5
 - Laboratory Explorations 9
 - Student Evaluation and Testing 12
- B. History and Nature of Science: Content Standards of the National Research Council 15
- C. Chapter Discussions 21
 - Part One of Textbook 21
 - Part Two of Textbook 46
 - Typically: Objectives, Suggested presentation strategies,
Demonstrations, Mini-laboratories, Major laboratories, Videos/DVDs,
Supplementary material, Computer resources, Further reading
- D. Discussion of Laboratory Explorations 65
- E. Some Resources, Literature, and Pedagogical References
for Instructors 75
- F. Some Suggested Syllabi 85
- G. Some Suggested Examination Questions 93
