| | |
|---|------------|
| Foreword by J. R. Yates, III | v |
| Preface | vii |
| I. Proteomics and the Proteome | 1 |
| 1. <i>Proteomics and the New Biology</i> | 3 |
| 2. <i>The Proteome</i> | 15 |
| II. Tools of Proteomics | 25 |
| 3. <i>Overview of Analytical Proteomics</i> | 27 |
| 4. <i>Analytical Protein and Peptide Separations</i> | 31 |
| 5. <i>Protein Digestion Techniques</i> | 49 |
| 6. <i>Mass Spectrometers for Protein and Peptide Analysis</i> | 55 |
| 7. <i>Protein Identification by Peptide Mass Fingerprinting</i> | 77 |
| 8. <i>Peptide Sequence Analysis by Tandem</i> <i>Mass Spectrometry</i> | 89 |
| 9. <i>Protein Identification with Tandem Mass</i> <i>Spectrometry Data</i> | 99 |
| 10. <i>SALSA: An Algorithm for Mining Specific Features</i> <i>of Tandem MS Data</i> | 109 |
| III. Applications of Proteomics | 123 |
| 11. <i>Mining Proteomes</i> | 125 |
| 12. <i>Protein Expression Profiling</i> | 137 |
| 13. <i>Identifying Protein–Protein Interactions</i> <i>and Protein Complexes</i> | 151 |
| 14. <i>Mapping Protein Modifications</i> | 167 |
| 15. <i>New Directions in Proteomics</i> | 185 |
| Index | 195 |
