

CONTENTS

<i>Foreword by Bob Boutilier</i>	v
<i>Preface</i>	vii
<i>List of Color Plates</i>	xiii
1. Introduction: <i>Science Is Improbable</i>	1
2. The Beginnings	9
Myth and Magic	9
Mesopotamia	12
Egypt	13
3. Early Greek Science	17
The Milesians	17
The Post-Milesians	19
The Soul	23
Summary	23
4. The Age of Plato and Aristotle	25
Plato and Theory	25
Aristotle and Observation	27
5. The Alexandrian Period: <i>The Age of the Experiment and the Textbook</i>	35
6. The Roman Period	41
Celsus	41
Pliny	42
Galen	43
7. The Middle Ages	49
8. Islamic Science	57
9. Scholasticism and Science	65
10. Renaissance I: <i>The Birth of Science</i>	73

11. Renaissance II: <i>The Birth of Experimental Biology</i>	87
12. The New Physiology	93
Iatrochemistry	93
Iatrophysics	96
13. New Technology, New Physiology	105
The New World of the Very Small: <i>The Microscope</i>	105
Vital Air: <i>The Development of Pumps and Early Theories of Respiration</i>	110
The Thermometer and Body Heat	111
14. Reaction and Opposition	113
15. The Enlightenment and Rational Biology	119
Rational Biology	119
The Emergence of Physiology	120
16. Transition to the Nineteenth Century:	
<i>Popular Science, Eccentric Science, and Romantic Physiology</i>	137
Hunter and Spallanzani: <i>The Last Great All-Rounders</i>	137
The Science Museum: <i>Collecting and Displaying</i>	139
Romantic Physiology	142
17. Consolidation of Experimental Biology	145
Respiration	145
Metabolic Chemistry	149
Internal Secretions	151
Renal Physiology	152
Digestion	154
Benefits	158
New Fields	160
18. Evolution and Physiology	161
19. Physiology Abused	165
Gullibility	166
Reckless Intervention	168
Evolutionary Genetics and Social Repression	170

20. Today	179
What is Science?	179
Biology Today	180
<i>References</i>	183
<i>List of Illustrations</i>	189
<i>Index</i>	195
<i>Biography</i>	201

The Rise of Experimental Biology

An Illustrated History

Lutz, P.L.

2002, XIII, 201 p. 109 illus., 9 illus. in color., Hardcover

ISBN: 978-0-89603-835-6
