PART I. PERFORMING AND OPTIMIZING PCR

1 Polymerase Chain Reaction: <i>Basic Principles and Routine Practice</i> Lori A. Kolmodin and David E. Birch	3
2 Computer Programs for PCR Primer Design and Analysis Bing-Yuan Chen, Harry W. Janes, and Steve Chen	19
3 Single-Step PCR Optimization Using Touchdown and Stepdown PCR Programming Kenneth H. Roux	31
4 XL PCR Amplification of Long Targets from Genomic DNA Lori A. Kolmodin	37
5 Coupled One-Step Reverse Transcription and Polymerase Chain Reaction Procedure for Cloning Large cDNA Fragments Jyrki T. Aatsinki	53
6 Long Distance Reverse-Transcription PCR Volker Thiel, Jens Herold, and Stuart G. Siddell	59
7 Increasing PCR Sensitivity for Amplification from Paraffin-Embedded Tissues Abebe Akalu and Juergen K. V. Reichardt	67
8 GC-Rich Template Amplification by Inverse PCR: <i>DNA Polymerase and Solvent Effects</i> Alain Moreau, Da Shen Wang, Steve Forget, Colette Duez, and Jean Dusart	75
9 PCR Procedure for the Isolation of Trinucleotide Repeats Teruaki Tozaki	81
10 Methylation-Specific PCR Haruhiko Ohashi	91

11	Direct Cloning of Full-Length Cell Differentially Expressed Genes by Multiple Rounds of Subtractive Hybridization Based on Long-Distance PCR and Magnetic Beads Xin Huang, Zhenglong Yuan, and Xuetao Cao	99
PART II. CLONING PCR PRODUCTS		
12	Cloning PCR Products: <i>An Overview</i> Baotai Guo and Yuping Bi	111
13	Using T4 DNA Polymerase to Generate Clonable PCR Products Kai Wang	121
14	Enzyme-Free Cloning of PCR Products and Fusion Protein Expression Brett A. Neilan and Daniel Tillett	125
15	Directional Restriction Site-Free Insertion of PCR Products into Vectors Guo Jun Chen	133
16	Autosticky PCR: <i>Directional Cloning of PCR Products with Preformed 5' Overhangs</i> József Gál and Miklós Kálmán	141
17	A Rapid and Simple Procedure for Direct Cloning of PCR Products into Baculoviruses Tamara S. Gritsun, Michael V. Mikhailov, and Ernest A. Gould	153
PART III. MUTAGENESIS AND RECOMBINATION		
18	PCR Approaches to DNA Mutagenesis and Recombination: <i>An Overview</i> Binzhang Shen	167
19	In-Frame Cloning of Synthetic Genes Using PCR Inserts James C. Pierce	175
20	Megaprimer PCR Sailen Barik	189
21	PCR-Mediated Recombination: <i>A General Method Applied to Construct Chimeric Infectious Molecular Clones</i> Guowei Fang, Barbara Weiser, Aloise Visosky, Timothy Moran, and Harold Burger	197
22	PCR Method for Generating Multiple Mutations at Adjacent Sites Jiri Adamec	207

23	A Fast Polymerase Chain Reaction-Mediated Strategy for Introducing Repeat Expansions into CAG-Repeat Containing Genes Franco Laccone	217
24	PCR Screening in Signature-Tagged Mutagenesis of Essential Genes Dario E. Lehoux and Roger C. Levesque	225
25	Staggered Extension Process (StEP) In Vitro Recombination Anna Marie Aguinaldo and Frances Arnold	235
26	Random Mutagenesis by Whole-Plasmid PCR Amplification Donghak Kim and F. Peter Guengerich	241
PART IV. CLONING UNKNOWN NEIGHBORING DNA		
27	PCR-Based Strategies to Clone Unknown DNA Regions from Known Foreign Integrants: <i>An Overview</i> Eric Ka-Wai Hui, Po-Ching Wang, and Szecheng J. Lo	249
28	Long Distance Vectorette PCR (LDV PCR) James A. L. Fenton, Guy Pratt, and Gareth J. Morgan	275
29	Nonspecific, Nested Suppression PCR Method for Isolation of Unknown Flanking DNA ("Cold-Start Method") Michael Lardelli	285
30	Inverse PCR: <i>cDNA Cloning</i> Sheng-He Huang	293
31	Inverse PCR: <i>Genomic DNA Cloning</i> Ambrose Y. Jong, Anna T'ang, De-Pei Liu, and Sheng-He Huang	301
32	Gene Cloning and Expression Profiling by Rapid Amplification of Gene Inserts with Universal Vector Primers Sheng-He Huang, Hua-Yang Wu, and Ambrose Y. Jong	309
33	The Isolation of DNA Sequences Flanking Tn5 Transposon Insertions by Inverse PCR Vincent J. J. Martin and William W. Mohn	315
34	Rapid Amplification of Genomic DNA Sequences Tagged by Insertional Mutagenesis Martina Celerin and Kristin T. Chun	325
35	Isolation of Large Terminal Sequences of BAC Inserts Based on Double-Restriction-Enzyme Digestion Followed by Anchored PCR Zhong-Nan Yang and T. Erik Mirkov	337

36	A “Step Down” PCR-Based Technique for Walking Into and the Subsequent Direct Sequence Analysis of Flanking Genomic DNA Ziguo Zhang and Sarah Jane Gurr	343
PART V. LIBRARY CONSTRUCTION AND SCREENING		
37	Use of PCR in Library Screening: <i>An Overview</i> Jinbao Zhu	353
38	Cloning of Homologous Genes by Gene-Capture PCR Renato Mastrangeli and Silvia Donini	359
39	Rapid and Nonradioactive Screening of Recombinant Libraries by PCR Michael W. King	377
40	Rapid cDNA Cloning by PCR Screening (RC-PCR) Toru Takumi	385
41	Generation and PCR Screening of Bacteriophage λ Sublibraries Enriched for Rare Clones (the “Sublibrary Method”) Michael Lardelli	391
42	PCR-Based Screening for Bacterial Artificial Chromosome Libraries Yuji Yasukochi	401
43	A 384-Well Microtiter-Plate-Based Template Preparation and Sequencing Method Lei He and Kai Wang	411
44	A Microtiter-Plate-Based High Throughput PCR Product Purification Method Ryan Smith and Kai Wang	417
	Index	423
