## PART I. GENERAL PROTOCOLS

1 The GTPase Cycle: <i>How Dominant Inhibitory Mutants Block the Biological Functions of Small GTPases</i> <b>Edward J. Manser</b> .....	3
2 Preparation of GTPases for Structural and Biophysical Analysis <b>Susan J. M. Smith and Katrin Rittinger</b> .....	13
3 Using cDNA-Representational Difference Analysis (cDNA-RDA) in Combination with Microarrays to Identify Rac Regulated Genes <b>Arndt A. P. Schmitz, Robert Lucito, and Linda Van Aelst</b> .....	25
4 Fluorescence Methods in the Study of Small GTP-Binding Proteins <b>Mohammad Reza Ahmadian, Alfred Wittinghofer, and Christian Herrmann</b> .....	45

## PART II. SPECIFIC METHODS:

### *RAS FAMILY GTPASES*

5 Ras and Rac as Activators of Reactive Oxygen Species (ROS) <b>Herbert Archer and Dafna Bar-Sagi</b> .....	67
6 Interfering with Ras Signaling Using Membrane-Permeable Peptides or Drugs <b>Hiroshi Maruta, Hong He, and Thao Nhu</b> .....	75
7 A Ras-Based Module to Generate <sup>32</sup> P-Labeled Fusion Proteins for Blot Overlays <b>Zhoushen Zhao and Louis Lim</b> .....	87

### *RHO FAMILY GTPASES*

8 Determination of the Activity of Rho-Like GTPases in Cells <b>Angeliki Malliri, Jean P. ten Klooster, Christina Olivio, and John G. Collard</b> .....	99
9 Introduction of Dominant Inhibitory Proteins Directed Against ROK and MRCK Kinases <b>Ivan Tan, Louis Lim, and Thomas Leung</b> .....	111

10	Effects of Rho Family GTPases on Cell–Cell Adhesion <b>Masaki Fukata, Masato Nakagawa, Shinya Kuroda, and Kozo Kaibuchi</b> .....	121
11	Cell Motility and Invasion Assays <b>Jackie Banyard and Marc Symons</b> .....	129
<i>RAB FAMILY GTPASES</i>		
12	Isolation of Regulatory Proteins for the Rab3 Subfamily GTPases <b>Hiroyuki Nakanishi, Takuya Sasaki, and Yoshimi Takai</b> .....	143
13	Analysis and Preparation of Stable Complexes between Rab GTPases, Rab Escort Protein, and Rab Geranylgeranyl Transferase <b>José B. Pereira-Leal, Anita Q. Gomes, and Miguel C. Seabra</b> .....	157
<i>ARF FAMILY GTPASES</i>		
14	Preparation of Myristoylated Arf1 and Arf6 Proteins <b>Paul A. Randazzo and Henry M. Fales</b> .....	169
15	ARF-Directed Guanine-Nucleotide-Exchange (GEP) Proteins <b>Gustavo Pacheco-Rodriguez, Joel Moss, and Martha Vaughan</b> .....	181
16	Arf6 and its Role in Cytoskeletal Modulation <b>Julie G. Donaldson</b> .....	191
17	ARF GTPase-Activating Protein 1 <b>Irit Huber, Edna Cukierman, Miriam Rotman, and Dan Cassel</b> .....	199
<i>RAN GTPASES</i>		
18	The Use of Permeabilized Cell Systems to Study Nuclear Transport <b>Amy M. Brownawell, James M. Holaska, Ian G. Macara, and Bryce M. Paschal</b> .....	209
19	Analysis of Nuclear Protein Import and Export In Vitro Using Fluorescent Cargoes <b>Ralph H. Kehlenbach and Larry Gerace</b> .....	231
20	Characterization of the Effects of RanGTP on the Microtubule Cytoskeleton <b>Sofia B. Lizarraga, Yixian Zheng, and Andrew R. Wilde</b> .....	247
	Index .....	261
