PART I LIBRARY SYNTHESIS AND QUALITY CONTROL

1 Using a Noncovalent Protection Strategy to Enhance Solid-Phase Synthesis <i>Fahad Al-Obeidi, John F. Okonya, Richard E. Austin, and Dan R. S. Bond</i>	3
2 Quality Control of Solid-Phase Synthesis by Mass Spectrometry <i>Jean-Louis Aubagnac, Robert Combarieu, Christine Enjalbal, and Jean Martinez</i>	15
3 Preparation of Encoded Combinatorial Libraries for Drug Discovery <i>Tao Guo and Doug W. Hobbs</i>	23
4 Simple Tools for Manual Parallel Solid Phase Synthesis <i>Viktor Krchňák and Andrew Burritt</i>	41
5 Cleavage of Compounds from Solid Phase by Gaseous Reagents <i>Viktor Krchňák</i>	61
6 Synthesis of DNA-Binding Polyamides: <i>Robust Solid-Phase Methods for Coupling Heterocyclic Aromatic Amino Acids</i> <i>Peter O. Krutzik and A. Richard Chamberlin</i>	77
7 The Preparation of Phenyl-stilbene Derivatives Using the Safety Catch Linker <i>Amy Lew and A. Richard Chamberlin</i>	93
8 Host–Guest Chemistry: <i>Combinatorial Receptors</i> <i>Brian R. Linton</i>	111
9 Automated Structure Verification of Small Molecules Libraries Using 1D and 2D NMR Techniques <i>Gérard Rossé, Peter Neidig, and Harald Schröder</i>	123
10 Rapid Liquid-Phase Combinatorial Synthesis of Heterocyclic Libraries <i>Chung-Ming Sun</i>	141

11	Soluble Polymer-Supported Methods for Combinatorial and Organic Synthesis Paul Wentworth, Jr. and Carsten Spanka	167
12	Analytical Methods for Optimization and Quality Control of Combinatorial Synthesis Bing Yan, Liling Fang, Mark M. Irving, Jiang Zhao, Diana Liu, Gianine M. Figliozzi, Frank Woolard, and Clinton A. Krueger	189
PART II LIBRARY PURIFICATION AND SCREENING		
13	Resolving Racemic Mixtures Using Parallel Combinatorial Libraries Tingyu Li, Yan Wang, and Louis H. Bluhm	203
14	Ligand Libraries for the Extraction of Metal Ions: <i>Dynamic Combinatorial and High-Throughput Screening Methods</i> Seema Choudhary and Janet R. Morrow	215
15	Automated Liquid–Liquid Extraction and Ion-Exchange Solid-Phase Extraction for Initial Purification Sean X. Peng and Charles Henson	227
16	On-Bead and Solution Screening Approaches for Genomically Derived Targets: <i>Discovery of Surrogate Ligands and Substrates Using Combinatorial Chemistry Libraries</i> David S. Thorpe, Gérard Rossé, Helen Yeoman, Sydney Wilson, Patti Willson, Greg Harlow, Anna Robinson, and Kenneth F. Wertman	239
PART III COMPUTATIONAL LIBRARY DESIGN		
17	Design of Virtual Combinatorial Libraries Alex M. Aronov	267
18	Approaches to Library Design for Combinatorial Chemistry Stefan Güssregen, Bernd Wendt, and Mark Warne	277
19	Reagent-Based and Product-Based Computational Strategies in Library Design Eric A. Jamois	297
20	Designing Combinatorial Libraries for Efficient Screening John I. Manchester and David S. Hartsough	307
21	Application of Neural Networks to Large Dataset QSAR, Virtual Screening, and Library Design David A. Winkler and Frank R. Burden	325
	Index	369
