Table of Contents

1 Introduction 1
1.1 Mental Processing of Geographic Knowledge 1
1.1.1 Cognitive Maps 1
1.1.2 Mental Construction of Spatial Knowledge: An Example 3
1.2 Theses and Assumptions 5
1.2.1 Knowledge Construction and Human Memory 5
1.2.2 Characteristics of Geographic Knowledge 5
1.2.3 Spatial Knowledge Organization in Long-Term Memory 8
1.2.4 Visual Mental Images and Diagrammatic Reasoning 8
1.3 Research Questions and Goals 12
1.3.1 Research Questions 12
1.3.2 Goals 13
1.4 Approach: Experimental Computational Modeling 14
1.4.1 Computational Cognition 14
1.4.2 Building Computational Models 16
1.4.3 Modeling as Experimental Approach 18
1.5 Organization of this Thesis 19

2 State of the Art 21
2.1 Spatial Knowledge Conceptions: Cognitive Maps and Other Metaphors 21
2.1.1 Cognitive Maps 22
2.1.2 Rubber Sheet Maps, Cognitive Atlases, Collages, and Geographic Information Systems 24
2.1.3 Spatial Mental Models 27
2.1.4 Other Conceptions 28
2.2 Human Memory 29
2.2.1 Working Memory 30
2.2.2 Long-Term Memory 31
2.2.3 Interacting Memory Systems in Mental Imagery 32

2.3 Mental Imagery 33
2.3.1 The Imagery Debate 34
2.3.2 Psychological and Neuroscientific Foundations 35
2.3.3 The Kosslyn Models 37
2.3.3.1 The 1980 Model 38
2.3.3.2 The 1994 Model 41
2.4 Spatial Reasoning 45
2.4.1 Topology 46
2.4.2 Orientation 48
2.4.3 Distance 50
2.4.4 Shape 52
2.4.5 Computational Geometry 53
2.5 Diagrammatic Reasoning 54
2.5.1 Propositional vs. Analogical Knowledge Representation 55
2.5.2 Types of Diagrammatic Reasoning Systems 56
2.5.3 Examples for Diagrammatic Reasoning Architectures 58
2.5.3.1 DEPIC-2D 58
2.5.3.2 WHISPER 59
2.5.3.3 Computational Imagery 60
2.6 Summary 62

3 MIRAGE – Developing the Model 65
3.1 Characteristics of the Model 65
3.1.1 Long-Term Memory 66
3.1.2 Working Memory 68
3.1.3 Evaluating the Working Memory Representation 69
3.2 MIRAGE – Outline of the Model 71
3.3 Types of Entities and Spatial Relations in MIRAGE 75
3.3.1 Entities 75
3.3.2 Relations 75
3.4 Subsystems, Structures, and Processes 77
3.4.1 Long-Term Memory Activation 77
3.4.1.1 Spatial Knowledge Fragments 77
3.4.1.2 The Hierarchical Long-Term Memory Representation 79
3.4.1.3 The Access Process 80
3.4.1.4 The Activated Long-Term Memory Representation 83
3.4.1.5 The Construction Process 84
3.4.2 Visual Mental Image Construction 85
3.4.2.1 The Enriched Representation 85
3.4.2.2 The Conversion Process 86
3.4.2.3 The Visual Buffer 88
3.4.2.4 The Visualization Process 89
3.4.3 Image Inspection 91
3.4.3.1 The Inspection Result 91
3.4.3.2 The Inspection Process 92

4 Visual Mental Image Construction in Detail 95
4.1 A More Demanding Scenario 96
4.2 Diagrammatic Representations of Lean Knowledge 98
4.3 Consequences for Image Construction 99
4.3.1 Relaxation of Spatial Constraints 99
4.3.2 Completion of Qualitative Spatial Relations 100
4.3.3 Interpretation of Qualitative Spatial Relations 101
4.4 Image Revision Strategies in MIRAGE 102
4.4.1 Unstable Images 103
4.4.2 Omission of Facts 106
4.4.3 Revision of Relational Completion 107
4.4.3.1 Variation of Relational Completion 108
4.4.3.2 Relaxation of Relational Completion 109
4.4.4 Revision of Image Specification 110
4.4.4.1 Depicting Qualitative Spatial Relations 111
4.4.4.2 Depicting Unspecified Spatial Relations 112
4.5 Summary 113

5 MIRAGE Implementation 117
5.1 Computational Tools for Modeling: SIMSIS 117
5.1.1 The Idea of SIMSIS 118
5.1.1.1 The Aspect Map Model 118
5.1.1.2 Modeling Aspect Maps in SIMSIS 120
5.1.2 Depictions, Scenarios, and Interpretations 120
5.1.2.1 SIMSIS Pictures 121
5.1.2.2 SIMSIS Facts and Scenarios 122
5.1.2.3 SIMSIS Interpretations and Meaning Systems 123
5.2 Realization of the Model 124
5.2.1 MIRAGE Structures 124
5.2.1.1 Entities, Relations, and Spatial Knowledge Fragments 124
5.2.1.2 The Long-Term Memory Representations 127
5.2.1.3 The Visual Buffer 128
5.2.2 MIRAGE Processes 129
5.2.2.1 The Long-Term Memory Activation Processes 129
5.2.2.2 The Image Construction Processes 131
5.2.2.3 Image Inspection 133
5.3 Operation and Behavior of MIRAGE 134

6 Conclusion and Outlook 139
6.1 Summary 139
6.2 Results and Discussion 142
6.2.1 Reflecting the Theses 143
6.2.1.1 Spatial Knowledge Construction 143
6.2.1.2 Underdeterminacy in Long-Term Memory 144
6.2.1.3 Fragmentation and Hierarchical Organization 144
6.2.1.4 Visual Mental Imagery 145

6.2.2 The Parameters of the Model 145
6.2.2.1 Explicit Parameters 146
6.2.2.2 Implicit Parameters 147
6.2.3 Conclusions 148
6.3 Future Work 148
6.3.1 Extending MIRAGE 149
6.3.1.1 Geographic Entities and Spatial Relations 149
6.3.1.2 Partially Aggregated Knowledge Structures 150
6.3.1.3 Mental Imagery Functionality 150
6.3.1.4 Parameters of MIRAGE 151
6.3.2 Empirical Investigations 151
6.3.2.1 Use of Default Knowledge 151
6.3.2.2 Control of Image Construction 153
6.3.2.3 Processing Capacity for Mental Images 153
6.3.2.4 Use of Chunking Facilities 154
6.3.2.5 Combination of Propositional and Image-Based Reasoning 154
6.3.3 Application Perspectives 154
6.3.3.1 Adequate Presentation of Visual Information 155
6.3.3.2 External Support of Reasoning in Mental Images 155
