

# Table of Contents

<b>1. Inequalities in the Löwner Partial Order</b> .....	1
1.1 The Löwner-Heinz inequality.....	2
1.2 Maps on Matrix Spaces .....	4
1.3 Inequalities for Matrix Powers .....	11
1.4 Block Matrix Techniques .....	13
<b>2. Majorization and Eigenvalues</b> .....	17
2.1 Majorizations .....	17
2.2 Eigenvalues of Hadamard Products .....	21
<b>3. Singular Values</b> .....	27
3.1 Matrix Young Inequalities .....	27
3.2 Singular Values of Hadamard Products.....	31
3.3 Differences of Positive Semidefinite Matrices .....	35
3.4 Matrix Cartesian Decompositions.....	39
3.5 Singular Values and Matrix Entries .....	50
<b>4. Norm Inequalities</b> .....	55
4.1 Operator Monotone Functions.....	57
4.2 Cartesian Decompositions Revisited.....	68
4.3 Arithmetic-Geometric Mean Inequalities.....	71
4.4 Inequalities of Hölder and Minkowski Types .....	79
4.5 Permutations of Matrix Entries .....	87
4.6 The Numerical Radius .....	90
4.7 Norm Estimates of Banded Matrices .....	95
<b>5. Solution of the van der Waerden Conjecture</b> .....	99
<b>References</b> .....	110
<b>Index</b> .....	115
