

# Table of Contents

|          |                                          |            |
|----------|------------------------------------------|------------|
| <b>1</b> | <b>Preliminaries</b>                     | <b>1</b>   |
| 1.1      | Blowing-ups                              | 1          |
| 1.2      | Weighted clusters                        | 17         |
| 1.3      | Birational maps of surfaces              | 23         |
| <b>2</b> | <b>Plane Cremona maps</b>                | <b>29</b>  |
| 2.1      | Base points                              | 29         |
| 2.2      | Principal curves                         | 34         |
| 2.3      | Contractile curves                       | 44         |
| 2.4      | Characteristic matrix                    | 46         |
| 2.5      | Equations of condition                   | 50         |
| 2.6      | Noether's inequality                     | 53         |
| 2.7      | Further relations                        | 57         |
| 2.8      | Quadratic plane Cremona maps             | 63         |
| 2.9      | Transforming curves                      | 66         |
| <b>3</b> | <b>Clebsch's theorems and jacobian</b>   | <b>73</b>  |
| 3.1      | A Clebsch's theorem                      | 73         |
| 3.2      | The entries of the characteristic matrix | 75         |
| 3.3      | On symmetry of characteristics           | 82         |
| 3.4      | Further properties                       | 87         |
| 3.5      | Jacobian of the homaloidal net           | 92         |
| <b>4</b> | <b>Composition</b>                       | <b>101</b> |
| 4.1      | Composition of two plane Cremona maps    | 101        |
| 4.2      | Consequences                             | 116        |
| <b>5</b> | <b>Characteristic matrices</b>           | <b>127</b> |
| 5.1      | Homaloidal nets                          | 127        |
| 5.2      | Homaloidal types                         | 129        |
| 5.3      | On proper homaloidal types               | 141        |
| 5.4      | Characteristic matrices                  | 147        |
| 5.5      | Exceptional types                        | 158        |
| 5.6      | On proper exceptional types              | 165        |
| 5.7      | Weyl groups                              | 170        |

|          |                                                      |     |
|----------|------------------------------------------------------|-----|
| <b>6</b> | <b>Total principal and special homaloidal curves</b> | 177 |
| 6.1      | Virtual versus effective behaviour                   | 177 |
| 6.2      | Non-expansive corresponding base points              | 181 |
| 6.3      | Generic versus effective behaviour                   | 183 |
| 6.4      | Irreducible homaloidal curves                        | 196 |
| 6.5      | Special homaloidal curves                            | 198 |
| <b>7</b> | <b>Inverse Cremona map</b>                           | 207 |
| 7.1      | Non-expected contractile curves                      | 207 |
| 7.2      | Proximity among base points of the inverse           | 213 |
| 7.3      | Inverse map and total principal curves               | 216 |
| 7.4      | Consequences                                         | 220 |
| <b>8</b> | <b>Noether's factorization theorem</b>               | 227 |
| 8.1      | Criterion for homaloidal nets                        | 228 |
| 8.2      | Complexity and major base points                     | 232 |
| 8.3      | Resolution into de Jonquières maps                   | 238 |
| 8.4      | Resolution into quadratic maps                       | 243 |
| 8.5      | Resolution into ordinary quadratic maps              | 245 |
|          | <b>References</b>                                    | 249 |
|          | <b>Subject index</b>                                 | 253 |
|          | <b>Index of notation</b>                             | 257 |

Geometry of the Plane Cremona Maps

Alberich-Carraminana, M.

2002, XVIII, 262 p., Softcover

ISBN: 978-3-540-42816-9
