

# Table of Contents, Part II

## VI Logic in Databases and Information Integration

MuTACLP: A Language for Temporal Reasoning with Multiple Theories . . .	1
<i>Paolo Baldan, Paolo Mancarella, Alessandra Raffaetà, Franco Turini</i>	
Description Logics for Information Integration . . . . .	41
<i>Diego Calvanese, Giuseppe De Giacomo, Maurizio Lenzerini</i>	
Search and Optimization Problems in Datalog . . . . .	61
<i>Sergio Greco, Domenico Saccà</i>	
The Declarative Side of Magic . . . . .	83
<i>Paolo Mascellani, Dino Pedreschi</i>	
Key Constraints and Monotonic Aggregates in Deductive Databases . . . . .	109
<i>Carlo Zaniolo</i>	

## VII Automated Reasoning

A Decidable CLDS for Some Propositional Resource Logics . . . . .	135
<i>Krysjia Broda</i>	
A Critique of Proof Planning . . . . .	160
<i>Alan Bundy</i>	
A Model Generation Based Theorem Prover MGTP for First-Order Logic .	178
<i>Ryuzo Hasegawa, Hiroshi Fujita, Miyuki Koshimura, Yasuyuki Shirai</i>	
A ‘Theory’ Mechanism for a Proof-Verifier Based on First-Order Set Theory . . . . .	214
<i>Eugenio G. Omodeo, Jacob T. Schwartz</i>	
An Open Research Problem: Strong Completeness of R. Kowalski’s Connection Graph Proof Procedure . . . . .	231
<i>Jörg Siekmann, Graham Wrightson</i>	

## VIII Non-deductive Reasoning

Meta-reasoning: A Survey . . . . .	253
<i>Stefania Costantini</i>	
Argumentation-Based Proof Procedures for Credulous and Sceptical Non-monotonic Reasoning . . . . .	289
<i>Phan Minh Dung, Paolo Mancarella, Francesca Toni</i>	

Automated Abduction . . . . .	311
<i>Katsumi Inoue</i>	

The Role of Logic in Computational Models of Legal Argument: A Critical Survey . . . . .	342
<i>Henry Prakken, Giovanni Sartor</i>	

## IX Logic for Action and Change

Logic Programming Updating - A Guided Approach . . . . .	382
<i>José Júlio Alferes, Luís Moniz Pereira</i>	

Representing Knowledge in A-Prolog . . . . .	413
<i>Michael Gelfond</i>	

Some Alternative Formulations of the Event Calculus . . . . .	452
<i>Rob Miller, Murray Shanahan</i>	

## X Logic, Language, and Learning

Issues in Learning Language in Logic . . . . .	491
<i>James Cussens</i>	

On Implicit Meanings . . . . .	506
<i>Veronica Dahl</i>	

Data Mining as Constraint Logic Programming . . . . .	526
<i>Luc De Raedt</i>	

DCGs: Parsing as Deduction? . . . . .	548
<i>Chris Mellish</i>	

Statistical Abduction with Tabulation . . . . .	567
<i>Taisuke Sato, Yoshitaka Kameya</i>	

## XI Computational Logic and Philosophy

Logicism and the Development of Computer Science . . . . .	588
<i>Donald Gillies</i>	

Simply the Best: A Case for Abduction . . . . .	605
<i>Stathis Psillos</i>	

<b>Author Index . . . . .</b>	<b>627</b>
-------------------------------	------------

# Table of Contents, Part I

A Portrait of a Scientist as a Computational Logician .....	1
<i>Maurice Bruynooghe, Luís Moniz Pereira, Jörg H. Siekmann, Maarten van Emden</i>	

Bob Kowalski: A Portrait .....	5
<i>Marek Sergot</i>	

Directions for Logic Programming.....	26
<i>Robert A. Kowalski</i>	

## I Logic Programming Languages

Agents as Multi-threaded Logical Objects .....	33
<i>Keith Clark, Peter J. Robinson</i>	

Logic Programming Languages for the Internet .....	66
<i>Andrew Davison</i>	

Higher-Order Computational Logic .....	105
<i>John W. Lloyd</i>	

A Pure Meta-interpreter for Flat GHC, a Concurrent Constraint Language .....	138
<i>Kazunori Ueda</i>	

## II Program Derivation and Properties

Transformation Systems and Nondeclarative Properties .....	162
<i>Annalisa Bossi, Nicoletta Cocco, Sandro Etalle</i>	

Acceptability with General Orderings.....	187
<i>Danny De Schreye, Alexander Serebrenik</i>	

Specification, Implementation, and Verification of Domain Specific Languages: A Logic Programming-Based Approach .....	211
<i>Gopal Gupta, Enrico Pontelli</i>	

Negation as Failure through Abduction: Reasoning about Termination ....	240
<i>Paolo Mancarella, Dino Pedreschi, Salvatore Ruggieri</i>	

Program Derivation = Rules + Strategies .....	273
<i>Alberto Pettorossi, Maurizio Proietti</i>	

### III Software Development

Achievements and Prospects of Program Synthesis . . . . .	310
<i>Pierre Flener</i>	
Logic for Component-Based Software Development . . . . .	347
<i>Kung-Kiu Lau, Mario Ornaghi</i>	
Patterns for Prolog Programming . . . . .	374
<i>Leon Sterling</i>	

### IV Extensions of Logic Programming

Abduction in Logic Programming . . . . .	402
<i>Mark Denecker, Antonis Kakas</i>	
Learning in Clausal Logic: A Perspective on Inductive Logic Programming . . . . .	437
<i>Peter Flach, Nada Lavrač</i>	
Disjunctive Logic Programming: A Survey and Assessment . . . . .	472
<i>Jack Minker, Dietmar Seipel</i>	
Constraint Logic Programming . . . . .	512
<i>Mark Wallace</i>	

### V Applications in Logic

Planning Attacks to Security Protocols: Case Studies in Logic Programming . . . . .	533
<i>Luigia Carlucci Aiello, Fabio Massacci</i>	
Multiagent Compromises, Joint Fixpoints, and Stable Models . . . . .	561
<i>Francesco Buccafurri, Georg Gottlob</i>	
Error-Tolerant Agents . . . . .	586
<i>Thomas Eiter, Viviana Mascardi, V.S. Subrahmanian</i>	
Logic-Based Hybrid Agents . . . . .	626
<i>Christoph G. Jung, Klaus Fischer</i>	
Heterogeneous Scheduling and Rotation . . . . .	655
<i>Thomas Sjöland, Per Kreuger, Martin Aronsson</i>	

<b>Author Index . . . . .</b>	<b>677</b>
-------------------------------	------------

Computational Logic: Logic Programming and Beyond

Essays in Honour of Robert A. Kowalski, Part II

Kakas, A.C.; Sadri, F. (Eds.)

2002, XII, 628 p., Softcover

ISBN: 978-3-540-43960-8
