

Table of Contents

Theories, Implementations, and Transformations	1
<i>Eric Hehner (Invited Speaker) and Ioannis T. Kassios</i>	
Incremental Proof of the Producer/Consumer Property for the PCI Protocol	22
<i>Dominique Cansell, Ganesh Gopalakrishnan, Mike Jones, Dominique Méry, and Airy Weinzoepflen (B)</i>	
Controlling Control Systems: An Application of Evolving Retrenchment	42
<i>Michael Poppleton and Richard Banach (B)</i>	
Checking Z Data Refinements Using an Animation Tool	62
<i>Neil J. Robinson (Z)</i>	
Encoding Object-Z in Isabelle/HOL	82
<i>Graeme Smith, Florian Kammüller, and Thomas Santen (Z)</i>	
Characters + Mark-up = Z Lexis	100
<i>Ian Toyn and Susan Stepney (Z)</i>	
Extraction of Abstraction Invariants for Data Refinement	120
<i>Marielle Doche and Andrew Gravell (B)</i>	
An Approach to Combining B and Alloy	140
<i>Leonid Mikhailov and Michael Butler (B)</i>	
Software Construction by Stepwise Feature Introduction	162
<i>Ralph-Johan Back (Invited Speaker)</i>	
The Semantics of <i>Circus</i>	184
<i>Jim Woodcock and Ana Cavalcanti (Z)</i>	
Handling Inconsistencies in Z Using Quasi-Classical Logic	204
<i>Ralph Miarka, John Derrick, and Eerke Boiten (Z)</i>	
Loose Specification and Refinement in Z	226
<i>Eerke Boiten (Z)</i>	
On Using Conditional Definitions in Formal Theories	242
<i>Jean-Raymond Abrial and Louis Mussat (B)</i>	
A Theory of Generalised Substitutions	270
<i>Steve Dunne (B)</i>	
Reinforced Condition/Decision Coverage (RC/DC): A New Criterion for Software Testing	291
<i>Sergiy A. Vilkomir and Jonathan P. Bowen (Z)</i>	

A Comparison of the BTT and TTF Test-Generation Methods	309
<i>Bruno Legeard, Fabien Peureux, and Mark Utting (Z, B)</i>	
A Formal Analysis of the CORBA Security Service	330
<i>David Basin, Frank Rittinger, and Luca Viganò (Z)</i>	
Type Synthesis in B and the Translation of B to PVS	350
<i>Jean-Paul Bodeveix and Mamoun Filali (B)</i>	
“Higher-Order” Mathematics in B	370
<i>Jean-Raymond Abrial, Dominique Cansell, and Guy Laffitte (B)</i>	
ABS Project: Merging the Best Practices in Software Design from Railway and Aircraft Industries	394
<i>Pierre Chartier (Invited Speaker)</i>	
Generalised Substitution Language and Differentials	396
<i>James Blow and Andy Galloway (B)</i>	
Communicating B Machines	416
<i>Steve Schneider and Helen Treharne (B)</i>	
Synchronized Parallel Composition of Event Systems in B	436
<i>Françoise Bellegarde, Jacques Julliand, and Olga Kouchnarenko (B)</i>	
Global and Communicating State Machine Models in Event Driven B: A Simple Railway Case Study	458
<i>Antonis Papatsaras and Bill Stoddart (B)</i>	
Verification of Dynamic Constraints for B Event Systems under Fairness Assumptions	477
<i>Françoise Bellegarde, Samir Chouali, and Jacques Julliand (B)</i>	
A Formal Model of the UML Metamodel: The UML State Machine and Its Integrity Constraints	497
<i>Soon-Kyeong Kim and David Carrington (Z)</i>	
Coming and Going from UML to B: A Proposal to Support Traceability in Rigorous IS Development	517
<i>Régine Laleau and Fiona Polack (B)</i>	
Author Index	535

ZB 2002: Formal Specification and Development in Z
and B

2nd International Conference of B and Z Users

Grenoble, France, January 23-25, 2002, Proceedings

Bert, D.; Bowen, J.P.; Henson, M.C.; Robinson, K. (Eds.)

2002, XI, 541 p., Softcover

ISBN: 978-3-540-43166-4
