

# Table of Contents

Introduction . . . . .	1
<i>Bran Selic (Rational Software Inc., Canada)</i>	
A Meta-model Facility for a Family of UML Constraint Languages . . . . .	4
<i>Tony Clark (King's College London, UK), Andy Evans (University of York, UK), Stuart Kent (University of Kent, UK)</i>	
A New Type Checking Approach for OCL Version 2.0? . . . . .	21
<i>Andy Schürr (University of the Federal Armed Forces, Munich, Germany)</i>	
OCL: Syntax, Semantics, and Tools . . . . .	42
<i>Mark Richters, Martin Gogolla (University of Bremen, Germany)</i>	
On the Precise Meaning of OCL Constraints . . . . .	69
<i>Rolf Hennicker (Ludwig-Maximilian University of Munich, Germany), Heinrich Hussmann (University of Dresden, Germany), Michel Bidoit (CNRS &amp; ENS de Cachan, France)</i>	
Expressing UML Class Diagrams Properties with OCL . . . . .	85
<i>Martin Gogolla, Mark Richters (University of Bremen, Germany)</i>	
The Amsterdam Manifesto on OCL . . . . .	115
<i>Steve Cook (Business Innovation Services, IBM, UK), Anneke Kleppe (Klasse Objecten, NL), Richard Mitchell (University of Brighton, UK), Bernhard Rumpe (Technical University of Munich, Germany), Jos Warmer (Klasse Objecten, NL), Alan Wills (TriReme International, UK)</i>	
An OCL Extension for Real-Time Constraints . . . . .	150
<i>Stephan Flake, Wolfgang Mueller (Paderborn University, Germany)</i>	
Statistical Constraints and Verification . . . . .	172
<i>John Knapman (IBM, Hursley Park, UK)</i>	
«Java»OCL Based on New Presentation of the OCL-Syntax . . . . .	189
<i>Bernhard Rumpe (Technical University of Munich, Germany)</i>	
The Semantics of the OCL Action Clause . . . . .	213
<i>Anneke Kleppe, Jos Warmer (Klasse Objecten, The Netherlands)</i>	
Constraint Trees . . . . .	228
<i>Stuart Kent (University of Kent, UK), John Howse (University of Brighton, UK)</i>	

Using OCL and UML to Specify System Behavior . . . . . 250  
    *Shane Sendall, Alfred Strohmeier (Swiss Federal Institute of Technology  
    Lausanne, Switzerland)*

**Author Index** . . . . . 281

Object Modeling with the OCL

The Rationale behind the Object Constraint Language

Clark, T.; Warmer, J. (Eds.)

2002, VIII, 288 p., Softcover

ISBN: 978-3-540-43169-5
