## Development of Visceral Smooth Muscles

G. Gabella

1	Early Appearance of Smooth Muscles . . . . .	1
2	Timing of Smooth Muscle Development . . . . .	3
3	Morphology of Developing Smooth Muscles . . . . .	8
4	Cytological Differentiation . . . . .	11
5	Chemical Differentiation . . . . .	15
6	Growth of Visceral Smooth Muscles . . . . .	18
7	Cell Division and Increase in Cell Number . . . . .	20
8	Extracellular Materials and Vascularization . . . . .	24
9	Origin of Smooth Muscle Precursors . . . . .	25
10	Influence of Endothelium, Epithelium, Connective Tissue and Nerves on Smooth Muscle Development . . . . .	26
	10.1 Role of Endothelium and Epithelium . . . . .	26
	10.2 Role of Mesenchymal Cells and the Extracellular Matrix . . . . .	28
	10.3 Role of Nerves . . . . .	28
11	Development of Mechanical Activity . . . . .	29
12	Related Processes of Development and Growth . . . . .	31
13	Synopsis . . . . .	32
	References . . . . .	33

## Mammalian Smooth Muscle Differentiation: Origins, Markers and Transcriptional Control

J.M. Miano

1	Introduction . . . . .	39
2	Smooth Muscle Cell Ontogeny . . . . .	40
	2.1 Evolutionary Concepts . . . . .	40
	2.2 Embryological Origins of SMC . . . . .	41
	2.3 Models for Studying SMC Differentiation . . . . .	42
3	Molecular Definitions of Smooth Muscle Cell Lineages . . . . .	43
	3.1 SMC-Restricted Markers . . . . .	43
	3.2 SMC-Restricted Promoter Activity . . . . .	48
4	Future Perspectives . . . . .	50
	References . . . . .	51

## **The Genetics of Murine Skeletal Muscle Biogenesis**

S. Tajbakhsh

1	Introduction .....	61
2	The Restriction of Cell Fate and Views on Cell Determination .....	62
3	The Somite Is a Source of Multiple Cell Types .....	64
4	The Acquisition of Cell Fate in the Somite: Myf5 and Myod Confer Skeletal Muscle Identity .....	67
5	Subpopulations of Stem Cells Migrate from the Somite to the Limb .....	68
6	Extrinsic Factors Direct Cell Identity in the Somite .....	70
7	Manipulations of the Myf5 Locus and Distal Rib Phenotypes: the Complexities of Gene Regulation .....	72
8	Conclusions .....	75
	References .....	75

## **Somite Patterning: a Few More Pieces of the Puzzle**

C. Marcelle, C. Lesbros, and C. Linker

1	Introduction .....	81
2	Segmental Plate Morphology .....	81
3	Somite Differentiation .....	83
3.1	Muscle Formation .....	83
3.1.1	Epaxial and Hypaxial Muscle Derivatives .....	83
3.1.2	A Distinct Embryonic Origin for Epaxial and Hypaxial Muscles? .....	85
3.1.3	Epaxial Muscle Formation .....	85
3.1.4	Hypaxial Muscle Formation .....	88
3.1.5	A Second Wave of Proliferative Muscle Progenitors .....	90
3.2	Dermis Formation .....	91
4	Tissue and Molecular Regulation of Somite Differentiation .....	91
4.1	The Notochord and Floor Plate Exert a Ventralizing Activity on the Somite: a Role for Sonic Hedgehog? .....	92
4.2	Dorsalizing Activity of Wnt Molecules in the Dorsal Ectoderm and Neural Tube .....	94
4.3	Tissue and Molecular Regulation of Myogenesis: an Instructive or Permissive Process? .....	97
5	Conclusion .....	101
	References .....	102

## Transcription Factors in Skeletal Myogenesis of Vertebrates

P. Neuhaus and T. Braun

1	Myogenesis .....	109
2	Determination and Differentiation of Muscle Precursor Cells .....	110
2.1	MRFs .....	110
2.1.1	<i>Myf5</i> .....	111
2.1.2	<i>MyoD</i> .....	112
2.1.3	<i>Myogenin</i> .....	114
2.1.4	<i>MRF4</i> .....	115
2.2	<i>MEF2</i> Transcription Factors .....	115
3	Hypaxial Muscle Development .....	116
3.1	<i>Pax3</i> .....	116
3.2	<i>Lbx1</i> .....	117
3.3	<i>Mox2</i> .....	119
4	Regeneration of Skeletal Muscle .....	119
4.1	MRFs .....	120
4.2	<i>Pax7</i> .....	120
4.3	<i>MNF</i> .....	121
5	Perspectives .....	122
	References .....	122

## Hypaxial Muscle Development

G. Parkyn, R.C. Mootoosamy, L. Cheng, C. Thorpe, and S. Dietrich

1	Introduction .....	127
2	Developmental Anatomy of Trunk Skeletal Muscles in Amniotes .....	128
3	Markers for Hypaxial Muscle Precursors .....	129
4	Specification of Hypaxial Muscle Precursors .....	131
4.1	Cues from the Lateral Mesoderm .....	131
4.2	Cues from the Surface Ectoderm .....	132
4.3	Master Regulator <i>Pax3</i> .....	133
5	Specification of Migratory Muscle Precursors .....	133
5.1	Somitic Competence .....	133
5.2	Localized Lateral Signals for the Recruitment of Limb Muscle Precursors .....	134
5.3	The Role of Scatter Factor/Hepatocyte Growth Factor and cMet in the Delamination of Migratory Muscle Precursors .....	135
5.4	The Role of <i>Lbx1</i> in Target Recognition of Limb Muscle Precursors .....	136
6	Building a Regulatory Network for Hypaxial Muscle Development .....	136
	References .....	137

## **Inhibition of Skeletal Muscle Development: Less Differentiation Gives More Muscle**

E.-M. Füchtbauer

1	Introduction .....	143
2	Secreted Signalling Molecules .....	145
2.1	Fibroblast Growth Factor Family .....	145
2.2	Transforming Growth Factor $\beta$ Superfamily .....	146
3	Extracellular Matrix .....	149
4	Transcription Factors .....	149
4.1	Notch .....	149
4.2	Twist .....	150
4.3	Id .....	153
4.4	Msx1 .....	155
5	Summary .....	155
	References .....	156

## **Control of Muscle Size During Embryonic, Fetal, and Adult Life**

K. Patel, B. Christ, and F.E. Stockdale

1	Introduction .....	163
2	Somite Patterning and Specification of Myogenic Cells .....	163
3	Allocation of Cells to the Dorsal Somite Compartment .....	166
4	Migration of Muscle Precursor Cells .....	166
5	Balance Between Proliferation and Differentiation .....	166
6	Muscle Growth in the Embryonic, Fetal, and Neonatal Periods of Development .....	167
7	Embryonic and Fetal Muscle Fibers .....	168
8	Embryonic, Fetal, and Adult Myoblasts .....	169
9	Number of Embryonic and Fetal Myoblasts and Fiber Formation .....	170
10	Innervation and Muscle Fiber Number and Size .....	172
11	Muscle Hypertrophy and Regeneration .....	174
12	Programmed Cell Death During Muscle Development .....	177
13	Recruitment of Myogenic Cells from Adult Pluripotent Stem Cells .....	178
	References .....	180

## **Cadherins in Skeletal Muscle Development**

Z. Waibler and A. Starzinski-Powitz

1	Cadherins .....	187
1.1	Cadherin Structure and Interactions .....	187
1.2	Cadherins and Catenins .....	189
2	Cadherins in Myogenesis .....	190
2.1	M-Cadherin .....	190

2.2	N-Cadherin .....	192
2.3	R-Cadherin .....	193
3	Summary and Outlook .....	194
	References .....	195

## **Slow Myosins in Muscle Development**

F.E. Stockdale, W. Nikovits, Jr., and N.R. Espinoza

1	Introduction .....	199
2	Myosin Heavy Chain Genes .....	199
3	Slow Myosin Heavy Chain Genes in Avian Skeletal Muscle .....	201
4	Slow Myosin Heavy Chain Genes in Mammalian Skeletal Muscle .....	202
5	Slow MyHC Genes in Fish Skeletal Muscle .....	202
6	Hedgehog Family of Signaling Molecules and Slow Myosin Expression in Skeletal Muscle Development .....	203
7	Innervation and Calcineurin Responsive Pathways and the Control of Slow MyHC Expression in Skeletal Muscle .....	204
8	Slow MyHC Expression in the Developing Heart .....	207
9	Summary .....	210
	References .....	210

## **Molecular Characterization of Early Cardiac Development**

T. Brand, B. Andrée, and T. Schlange

1	Introduction .....	215
2	Molecular Control of Heart Field and Tubular Heart Formation ..	216
2.1	Conserved Regulatory Circuits Control Heart Field Formation in Insects and Vertebrates .....	216
2.1.1	Heart Field Formation in Vertebrates .....	216
2.1.2	Heart Formation in Insects .....	216
2.1.3	Nkx Homeobox Genes .....	217
2.1.4	GATA Genes .....	218
2.2	Hypoblast and Anterior Endoderm Are Involved in Myocardial Specification and Differentiation .....	219
2.3	Identification of Signalling Molecules Involved in Cardiac Specification and Differentiation .....	220
2.3.1	The Role of BMP2 in Heart Induction .....	220
2.4	Other Cardiogenic Signals .....	222
2.4.1	Wnt Signals Interfere with Heart Formation in Vertebrates .....	222
2.4.2	FGF Cooperates with BMP2 .....	223
2.4.3	Cerberus .....	223
2.4.4	Cripto .....	224
2.5	Heart Tube Formation .....	224

---

3	Molecular Control of Cardiac Chamber Formation .....	225
3.1	Transcriptional Regulators of Chamber Formation .....	225
3.2	Cell-Cell Interaction in Chamber Formation .....	226
3.3	<i>Popeye</i> Genes – a Novel Family of Muscle-Restricted Genes ..	228
	References .....	230
	<b>Subject Index</b> .....	239
