

Contents

1. Introduction	1
1.1 Complex Problem Solving in the Internet Age	2
1.1.1 Knowledge Intensive Problem Solving	2
1.1.2 Complexity Issues	3
1.1.3 Internet-Based Applications	3
1.2 Example Application Scenarios	4
1.2.1 Electronic Commerce	4
1.2.2 Diagnosis of Complex Technical Equipment	5
1.2.3 Electronics Design	6
1.3 Experience Reuse	6
1.3.1 Basic Scenarios of Experience Reuse	7
1.3.2 Expected Benefits of Experience Reuse	8
1.4 Experience Management	9
1.4.1 Knowledge Management	9
1.4.2 Experience Management versus Knowledge Management	11
1.4.3 Experience Management Activities	12
1.4.4 Experience Management Definition	14
1.5 Web Technologies for Experience Management	14
1.5.1 Representing and Storing Experience on the Web	14
1.5.2 Accessing Experience from the Web	15
1.5.3 Limitations of Information Access Approaches for Experience Reuse	16
1.5.4 Internet Technologies as Infrastructure for Experience Management	17
1.6 Methods for Experience Management on the Conceptual Level	17
1.7 Overview of This Book	19
1.7.1 The Topic in a Nutshell	19
1.7.2 Contributions from Recent Projects	19
1.7.3 Structure of the Book	21

2. Experience Management	25
2.1 Knowledge, Experience and Their Characteristics	26
2.1.1 Data, Information, and Knowledge	26
2.1.2 Specific and General Knowledge	27
2.1.3 Experience	28
2.1.4 Representation of Experience and Related Knowledge for Reuse	28
2.2 General Model for Experience Management	30
2.2.1 Problem Solving Cycle	32
2.2.2 Development and Maintenance Methodology	34
2.3 Related Models	36
2.3.1 Knowledge Management and Organizational Memory	37
2.3.2 Quality Improvement Paradigm and Experience Factory	38
2.3.3 The Case-Based Reasoning Cycle	41

Part I. Knowledge Representation for Experience Management

3. Representing Experience	47
3.1 Cases for Representing Experience	48
3.1.1 Basic Case Structure	48
3.1.2 A First General Formalization of Cases	49
3.1.3 Utility of Experience	50
3.1.4 Representing Experience with Respect to Utility	52
3.2 Overview of Case Representation Approaches	53
3.2.1 The Textual Approach	53
3.2.2 The Conversational Approach	54
3.2.3 The Structural Approach	55
3.2.4 Comparing the Different Approaches	57
3.2.5 Effort Required for the Different Approaches	57
3.2.6 Focus on the Structural Approach	60
3.3 Formalizing Structural Case Representations	61
3.3.1 Attribute-Value Representation	61
3.3.2 Object-Oriented Representations	63
3.3.3 Graph Representations	67
3.3.4 Predicate Logic Representations	69
3.3.5 Relation to the General Definition	70
3.3.6 Comparing Different Structural Case Representation Approaches	71
3.4 Generalized Cases	73
3.4.1 Extensional Definition of Generalized Cases	74
3.4.2 Different Kinds of Generalized Cases	74
3.4.3 Representation of Generalized Cases	75

3.5	Hierarchical Representations and Abstract Cases	78
3.5.1	Advantages of Abstract Cases	78
3.5.2	Levels of Abstraction	79
3.5.3	Kind of Cases	80
3.6	Languages for Structural Case Representations	81
3.6.1	Common Case Representation Language CASUEL . . .	81
3.6.2	The XML-based Orengo Modeling Language OML . . .	85
3.7	Choice of the Vocabulary	90
3.7.1	Characterization Part	90
3.7.2	Lesson Part	91
3.7.3	Choice of Types	91
4.	Assessing Experience Utility	93
4.1	Approximating Utility with Similarity	94
4.1.1	Traditional View of Case-Based Reasoning	94
4.1.2	Extended View	95
4.1.3	Similarity Measures	96
4.1.4	Relations between Similarity and Utility	96
4.2	General Considerations Concerning Similarity and Distance .	100
4.2.1	Distance Measures	100
4.2.2	Possible Properties of Similarity Measures	101
4.2.3	Similarity and Fuzzy Sets	102
4.3	Similarity Measures for Attribute-Value Representations . . .	103
4.3.1	Simple Measures for Binary Attributes	103
4.3.2	Simple Measures for Numerical Attributes	105
4.3.3	The Local-Global Principle	106
4.3.4	Local Similarity Measures for Numeric Attributes . . .	107
4.3.5	Local Similarity Measures for Unordered and Totally Ordered Symbolic Attributes	110
4.3.6	Taxonomically Ordered Symbolic Types	111
4.3.7	Global Similarity Measures	120
4.4	Similarity Measures for Object-Oriented Representations . .	122
4.4.1	Example Use of Class Hierarchies and Object Similarities	123
4.4.2	Computing Object Similarities	125
4.4.3	Handling Multi-value Attributes	129
4.4.4	Related Approaches	131
4.5	Similarity Measures for Graph Representations	131
4.5.1	Graph Matching	132
4.5.2	Graph Editing	134
4.6	Similarity Measures for Predicate Logic Representations . . .	135
4.6.1	Treating Atomic Formulas as Binary Attributes	135
4.6.2	Similarity between Atomic Formulas	135
4.6.3	Similarity through Logical Inference	137

4.7	Similarity for Generalized Cases	137
4.7.1	Canonical Extension of a Similarity Measure	137
4.7.2	The General Problem of Similarity Assessment	138
5.	Representing Knowledge for Adaptation	141
5.1	Rule-Based Representations	142
5.1.1	Different Kinds of Rules	142
5.1.2	Formalization for Rules in an Object-Oriented Framework	144
5.1.3	An Example	147
5.2	Operator-Based Representations	149
5.2.1	Basic Approach	149
5.2.2	Representation	150
5.3	Restricting Adaptability with Consistency Constraints	151
5.4	Generalized Cases	152

Part II. Methods for Experience Management

6.	User Communication	155
6.1	Introduction to User Interaction	156
6.1.1	A Basic Communication Architecture	156
6.1.2	Requirements	158
6.1.3	Distribution between Client and Server Side	160
6.2	A Formal Dialog Model	162
6.2.1	Overview	162
6.2.2	Dialog Situation	163
6.2.3	Dialog Interactions	163
6.2.4	Dialog Strategy and Its Execution	164
6.3	Predefined Static Dialog	165
6.3.1	Three-Step Questionnaire-Based Problem Acquisition	165
6.3.2	Static Domain Specific Dialogs	166
6.4	Dynamic and Adaptable Strategies	169
6.4.1	Criteria for Attribute Selection	170
6.4.2	Compiling Dialog Strategies	176
6.4.3	Dynamically Interpreted Strategies	179
6.4.4	Learning from User Interaction	180
6.5	Experience Presentation	180
6.5.1	Simple Lesson Lists	181
6.5.2	Experience Lists with External Links	182
6.5.3	Adding Similarity Explanations	182
6.5.4	Adaptive Experience Presentation	185

7. Experience Retrieval	187
7.1 General Considerations	188
7.1.1 Formal Retrieval Task	188
7.1.2 Storing Case Data in Databases	189
7.1.3 Overview of Approaches	190
7.2 Sequential Retrieval	191
7.3 Indexing by kd-Tree Variants	192
7.3.1 The Standard kd-Tree	192
7.3.2 The Inreca Tree	193
7.3.3 Building the Inreca Tree	195
7.3.4 Retrieval with the Inreca-Tree	197
7.3.5 Properties of kd-Tree Based Retrieval	200
7.4 Fish and Shrink Retrieval	200
7.4.1 Basic Idea	201
7.4.2 Retrieval Algorithm	202
7.4.3 Properties of Fish and Shrink	205
7.5 Case Retrieval Nets	206
7.5.1 The Case Retrieval Net Index Structure	206
7.5.2 The Retrieval Algorithm	208
7.5.3 Properties of Case Retrieval Nets	209
7.6 SQL Approximation	210
7.6.1 The Basic Idea	210
7.6.2 The Retrieval Algorithm	212
7.6.3 Properties of SQL Approximation	215
7.7 Summary	216
8. Experience Adaptation	219
8.1 Overview and Characterization of Different Adaptation Approaches	220
8.1.1 The Continuum of Adaptation Models	220
8.1.2 Generative Adaptation	222
8.1.3 Compositional Adaptation	224
8.1.4 Hierarchical Adaptation	225
8.1.5 Adaptation for Experience Management for Complex Problem Solving	225
8.2 Theory of Transformational Adaptation	225
8.2.1 Experience Transformations	226
8.2.2 The Experience Transformation Process	227
8.2.3 Similarity Measures in the Context of Experience Transformations	228
8.2.4 Relation to Rewrite Systems	229
8.2.5 Relation to Generalized Cases	229
8.3 Adaptation with Explicit Transformation Knowledge	230
8.3.1 Rule-Based Adaptation	230
8.3.2 Interactive Operator-Based Adaptation	231

8.4	Incremental Compositional Adaptation	232
8.4.1	Highly Structured Problems	233
8.4.2	Compositional Approach	233
8.4.3	The Adaptation Cycle.....	236
8.4.4	Controlling the Adaptation Cycle.....	238
8.4.5	Adaptation as Hill-Climbing Search	239
9.	Developing and Maintaining Experience Management	
	Applications	241
9.1	Introduction	242
9.1.1	General Purpose of a Methodology.....	242
9.1.2	Methodology for Experience Management.....	243
9.1.3	Contributions to Methodology Development	243
9.2	INRECA Methodology Overview	244
9.2.1	Process Modeling	245
9.2.2	Experience Captured in Software Process Models ...	247
9.3	The INRECA Experience Base	247
9.4	Process Modeling in INRECA	249
9.4.1	Technical, Organizational, and Managerial Processes .	249
9.4.2	Interaction among Processes	250
9.4.3	Combining Processes to Process Models	251
9.4.4	Generic and Specific Descriptions	252
9.5	The Common Generic Level.....	253
9.5.1	Overview	253
9.5.2	Managerial Processes	255
9.5.3	Technical Processes: Software Development	257
9.5.4	Organizational Processes	259
9.6	Documenting the INRECA Experience	261
9.6.1	Process Description Sheets.....	262
9.6.2	Product Description Sheets	263
9.6.3	Simple Method Description Sheets	265
9.6.4	Complex Method Description Sheets	267
9.7	Reusing and Maintaining INRECA Experience	267
9.7.1	The INRECA Reuse Procedure.....	269
9.7.2	Relations to the EMM Problem Solving Cycle	270
9.7.3	Development and Maintenance of the INRECA Experience Base	271
9.8	Tool Support for the INRECA Methodology	272
9.8.1	INRECA Experience Modeling Methodology Tool ...	273
9.8.2	Knowledge Modeling Tools	275

Part III. Experience Management Application Areas

10. Experience Management for Electronic Commerce	281
10.1 Introduction to the Electronic Commerce Scenario	282
10.1.1 Electronic Commerce Definition	282
10.1.2 Transaction Model	282
10.1.3 Knowledge Involved in Electronic Commerce	284
10.1.4 Opportunities for Experience Management Support	285
10.2 Analyzing Pre-sales Scenarios	287
10.2.1 Customer Wishes	287
10.2.2 Products	289
10.2.3 Experience Representation for Product Search	290
10.3 WEBSSELL: A Generic Electronic Commerce Architecture	293
10.3.1 Pathways Server and Dialog Components	294
10.3.2 Case-Based Retrieval	295
10.3.3 Collaborative Recommendation	295
10.3.4 Customization	297
10.4 Methodology Recipe for Electronic Commerce	298
10.4.1 Requirements Acquisition	298
10.4.2 Knowledge Modeling	300
10.4.3 GUI Development	301
10.4.4 Implement CBR Retrieval Engine	302
10.4.5 Integrate CBR and GUI	303
10.5 Application Overview	303
10.6 Application: Product Catalog for Operational Amplifiers	304
10.6.1 Vocabulary and User Interface	306
10.6.2 Benefit Analysis	306
10.7 Application: Customization of Electro-mechanical Components	310
10.7.1 Vocabulary, Retrieval, Customization, and User Interface	310
10.7.2 Benefit Analysis	311
11. Experience Management for Self-Service and Help-Desk Support	315
11.1 Introduction	316
11.2 Structure and Representation of the Experience Base	317
11.2.1 Object-Oriented Representation	317
11.2.2 Case Structure	317
11.2.3 Partitioning the Experience Base	319
11.3 User and Roles	319
11.4 Overall Architecture	320
11.4.1 The Server	321
11.4.2 The HOMER Client	322

11.5	Hotline Component	322
11.5.1	Create a New Problem Description	322
11.5.2	Retrieving Problem Solutions	325
11.5.3	Feedback from Problem Solving	325
11.6	Methodology Recipe for Help-Desk Applications	327
11.6.1	Managerial Processes during System Development ...	327
11.6.2	Organizational Processes during System Development	329
11.6.3	Technical Processes during System Development	332
11.6.4	Managerial Processes during System Use	335
11.6.5	Organizational Processes during System Use	335
11.6.6	Technical Processes during System Use	336
11.6.7	Process Model for a Help-Desk Project	338
11.7	Evaluation of HOMER	341
11.7.1	Benefits for the Help-Desk Operators	342
11.7.2	Evaluation of the Methodology Recipe	343
11.8	Summary	346
12.	Experience Management for Electronic Design Reuse	347
12.1	Electronic Design Reuse	348
12.1.1	Intellectual Properties	348
12.1.2	IP Reuse	349
12.1.3	Existing IP Reuse Support	349
12.1.4	Challenges of Experience Management for IP Reuse ..	351
12.2	Representation of Intellectual Properties	352
12.2.1	IP Taxonomy	352
12.2.2	IP Attributes	353
12.2.3	IP Representation as Generalized Cases	355
12.2.4	An Example IP	355
12.3	Descriptions of Design Problems and Reuse-Related Knowledge	358
12.3.1	Problem Descriptions	358
12.3.2	Similarity Measures	358
12.4	The READEE Prototype for DSP Selection	361
12.5	Issues of Future Research	363
List of Symbols		365
