

# Preface

The Annual Conference of the European Association for Computer Science Logic, CSL 2002, was held in the Old College of the University of Edinburgh on 22–25 September 2002. The conference series started as a programme of International Workshops on Computer Science Logic, and then in its sixth meeting became the Annual Conference of the EACSL. This conference was the sixteenth meeting and eleventh EACSL conference; it was organized by the Laboratory for Foundations of Computer Science at the University of Edinburgh.

The CSL 2002 Programme Committee considered 111 submissions from 28 countries during a two week electronic discussion; each paper was refereed by at least three reviewers. The Committee selected 37 papers for presentation at the conference and publication in these proceedings.

The Programme Committee invited lectures from Susumu Hayashi, Frank Neven, and Damian Niwiński; the papers provided by the invited speakers appear at the front of this volume.

In addition to the main conference, two tutorials – ‘Introduction to Mu-Calculi’ (Julian Bradfield) and ‘Parametrized Complexity’ (Martin Grohe) – were given on the previous day.

I thank the Programme Committee and all the referees for their work in reviewing the papers; the other members of the local organizing team (Dyane Goodchild, Monika Lekuse, and Alex Simpson), as well as the many other LFCS colleagues who helped in various ways, for arranging the event itself; the organizers of CSL 2001, in particular François Laroussinie, for allowing me to inherit the fruits of their labours; and Richard van de Stadt, whose CyberChair system greatly facilitated the handling of submissions and reviews.

Finally, I acknowledge with gratitude the generous support of the U.K.’s Engineering and Physical Sciences Research Council, which sponsored the invited lecturers as well as providing support for students; and the Laboratory for Foundations of Computer Science, which provided both financial support and much time from its staff.

July 2002

Julian Bradfield
