

Contents

1 Uncertain Logics and Variables.....	1
1.1 Uncertain Logic.....	1
1.2 Other Versions of Uncertain Logic	5
1.3 Uncertain Variables.....	9
1.4 Additional Description of Uncertain Variables	12
2 Analysis and Decision Making for Static Plants.....	17
2.1 Analysis Problem for a Functional Plant.....	17
2.2 Decision Making Problem for a Functional Plant	18
2.3 External Disturbances.....	20
2.4 Nonparametric Uncertainty	25
3 Relational Systems	31
3.1 Relational Knowledge Representation	31
3.2 Analysis and Decision Making for Relational Plants	33
3.3 Determinization.....	39
3.4 Analysis for Relational Plants with Uncertain Parameters	41
3.5 Decision Making for Relational Plants with Uncertain Parameters.....	46
3.6 Computational Aspects.....	50
4 Systems with Logical Knowledge Representation.....	57
4.1 Logical Knowledge Representation	57
4.2 Analysis and Decision Making Problems.....	59
4.3 Logic-Algebraic Method	61
4.4 Analysis and Decision Making for the Plant with Uncertain Parameters	64
4.5 Uncertain Logical Decision Algorithm	66
5 Dynamical Systems	69
5.1 Relational Knowledge Representation	69
5.2 Analysis and Decision Making for the Dynamical Plants with Uncertain Parameters	74
5.3 Closed-Loop Control System. Uncertain Controller	80
5.4 Examples	81
5.5 Stability of Dynamical Systems with Uncertain Parameters	84

6 Comparison, Analogies and Generalisation	91
6.1 Comparison with Random Variables and Fuzzy Numbers.....	91
6.2 Application of Random Variables	95
6.3 Application of Fuzzy Numbers	96
6.4 Generalisation. Soft Variables.....	103
 7 Special and Related Problems.....	 109
7.1 Pattern Recognition	109
7.2 Control of the Complex of Operations	116
7.3 Descriptive and Prescriptive Approaches.....	119
7.4 Complex Uncertain System.....	121
7.5 Learning System.....	124
 Index.....	 129
 References.....	 131

Uncertain Logics, Variables and Systems

Bubnicki, Z.

2002, XIV, 134 p., Softcover

ISBN: 978-3-540-43235-7
