

Table of Contents

| | |
|---|-----|
| Collection Principles in Dependent Type Theory | 1 |
| <i>Peter Aczel, Nicola Gambino</i> | |
| Executing Higher Order Logic | 24 |
| <i>Stefan Berghofer, Tobias Nipkow</i> | |
| A Tour with Constructive Real Numbers | 41 |
| <i>Alberto Ciaffaglione, Pietro Di Gianantonio</i> | |
| An Implementation of Type:Type | 53 |
| <i>Thierry Coquand, Makoto Takeyama</i> | |
| On the Logical Content of Computational Type Theory: A Solution to Curry's Problem | 63 |
| <i>Matt Fairtlough, Michael Mendler</i> | |
| Constructive Reals in Coq: Axioms and Categoricity | 79 |
| <i>Herman Geuvers, Milad Niqui</i> | |
| A Constructive Proof of the Fundamental Theorem of Algebra without Using the Rationals | 96 |
| <i>Herman Geuvers, Freek Wiedijk, Jan Zwanenburg</i> | |
| A Kripke-Style Model for the Admissibility of Structural Rules | 112 |
| <i>Healfdene Goguen</i> | |
| Towards Limit Computable Mathematics | 125 |
| <i>Susumu Hayashi, Masahiro Nakata</i> | |
| Formalizing the Halting Problem in a Constructive Type Theory | 145 |
| <i>Kristofer Johansson</i> | |
| On the Proofs of Some Formally Unprovable Propositions and Prototype Proofs in Type Theory | 160 |
| <i>Giuseppe Longo</i> | |
| Changing Data Structures in Type Theory: A Study of Natural Numbers . | 181 |
| <i>Nicolas Magaud, Yves Bertot</i> | |
| Elimination with a Motive | 197 |
| <i>Conor McBride</i> | |
| Generalization in Type Theory Based Proof Assistants | 217 |
| <i>Olivier Pons</i> | |

An Inductive Version of Nash-Williams' Minimal-Bad-Sequence Argument
for Higman's Lemma 233
 Monika Seisenberger

Author Index 243

Types for Proofs and Programs

International Workshop, TYPES 2000, Durham, UK,

December 8-12, 2000. Selected Papers

Callaghan, P.; Luo, Z.; McKinnon, J.; Pollack, R. (Eds.)

2002, VIII, 248 p., Softcover

ISBN: 978-3-540-43287-6
