

# Table of Contents

<b>1. Introduction</b>	1
1.1 Constraint Programming	1
1.2 Motivation	2
1.3 Approach	3
1.4 Outline	5
1.5 Source Material	7
<b>2. Constraint Programming</b>	9
2.1 Constraints	9
2.2 Search	10
2.3 Programming	13
<b>3. Introducing Oz Light</b>	15
3.1 Overview	15
3.2 Oz Light: Basics	16
3.2.1 The Store	16
3.2.2 Threads	17
3.2.3 Statements	18
3.3 Oz Light Continued	20
3.3.1 Primitive Operations	20
3.3.2 Exceptions	22
3.3.3 Ports and Active Services	22
3.3.4 Finite Domain Constraints	23
3.4 Syntactic Convenience	25
3.5 Relation to Full Oz	26
<b>4. Spaces for Search</b>	29
4.1 Overview	29
4.2 Local Computation Spaces	30
4.3 Space Manipulation	31
4.3.1 Space Creation	31
4.3.2 Merging Spaces	32
4.3.3 Injecting into Spaces	33
4.4 Control and Status	33

4.5	Search .....	34
4.5.1	Alternatives .....	35
4.5.2	Distributable Spaces .....	36
4.5.3	Synchronizing on Stability .....	36
4.5.4	Committing to Alternatives .....	37
4.5.5	Cloning Spaces .....	37
4.5.6	Refining Commit .....	39
4.6	Situated Procedure Calls: Services Reconsidered .....	40
4.7	Previous Work: Solve Combinator .....	41
4.8	Summary .....	42
<b>5.</b>	<b>Search Engines .....</b>	<b>45</b>
5.1	Depth-First Search .....	45
5.2	Simplifying Control: Exceptions .....	47
5.3	Binarization .....	47
5.4	Multiple Solutions .....	49
5.5	Explicit State Representation .....	49
5.6	Limited Discrepancy Search .....	50
5.7	Best-First Search .....	52
<b>6.</b>	<b>Best-Solution Search .....</b>	<b>55</b>
6.1	Constraining Spaces .....	55
6.2	Iterative Best-Solution Search .....	56
6.3	Branch-and-Bound Best-Solution Search .....	56
6.4	An Alternative Formulation of BAB .....	57
6.5	Prune-Search: Generalizing BAB .....	57
<b>7.</b>	<b>Recomputation .....</b>	<b>59</b>
7.1	Overview .....	59
7.2	Full Recomputation .....	60
7.3	Fixed Recomputation .....	61
7.4	Why Recomputation Matters .....	64
7.5	Adaptive Recomputation .....	65
<b>8.</b>	<b>Oz Explorer: Visual Search .....</b>	<b>69</b>
8.1	Development of Constraint Programs .....	69
8.2	Example: Aligning for a Photo .....	70
8.3	Features .....	74
8.4	Implementation .....	75
8.5	Evaluation .....	76
8.6	Related Work .....	78

<b>9. Distributed Search</b>	79
9.1 Overview	79
9.2 Distributed Oz	80
9.3 Architecture	82
9.3.1 Cooperation	82
9.3.2 Worker	84
9.3.3 Manager	84
9.3.4 Best-Solution Search	85
9.4 Distributed Search Engines	86
9.5 Evaluation	88
<b>10. Spaces for Combinators</b>	93
10.1 Overview	93
10.2 Space Tree	94
10.3 Space Tree Manipulation	95
10.3.1 Space Creation	96
10.3.2 Merging Spaces	97
10.3.3 Injecting into Spaces	99
10.4 Control and Status	99
10.4.1 Stability	100
10.4.2 Status Variable	102
10.4.3 Debugging Support	103
10.5 Choice of Programming Language	104
<b>11. Constraint Combinators</b>	105
11.1 Introduction	105
11.2 Concurrent Negation	106
11.3 Generic Reification	107
11.4 Disjunction	109
11.5 Conditional	111
11.6 Andorra-Style Disjunction	113
11.7 Discussion and Evaluation	114
<b>12. Implementing Oz Light</b>	117
12.1 Overview	117
12.2 Synchronization	118
12.3 Store	118
12.4 Scheduler	120
<b>13. Implementing Spaces</b>	121
13.1 Overview	121
13.2 Space Tree	122
13.2.1 Nodes and Links	122
13.2.2 Threads	123
13.2.3 The Store: Model	124

13.2.4	The Store: Implementation	126
13.3	Stability	130
13.3.1	Runnable Threads	130
13.3.2	Globally Suspended Threads	131
13.3.3	Speculative Constraints	132
13.3.4	Local Threads	132
13.3.5	Checking Stability	132
13.4	Merge	133
13.5	Search	135
13.5.1	Choose and Commit	135
13.5.2	Cloning Spaces	136
13.6	Richer Basic Constraints	137
13.6.1	Variable Aliasing	137
13.6.2	Tree Constraints	138
13.6.3	Finite Domain Constraints	138
13.7	Ports	139
13.8	Performance Overview	140
<b>14.</b>	<b>Other Approaches to Search</b>	<b>143</b>
14.1	Other Constraint Programming Systems	143
14.2	Comparison with Trailing	145
14.2.1	Expressiveness	145
14.2.2	Implementation Issues	146
14.2.3	Criteria and Examples	147
14.2.4	Copying	148
14.2.5	Copying versus Trailing	149
14.2.6	Recomputation versus Trailing	150
14.3	System Comparison	151
<b>15.</b>	<b>Conclusion</b>	<b>153</b>
15.1	Main Contributions	153
15.2	Future Work	154
<b>A.</b>	<b>Benchmark Problems and Platforms</b>	<b>157</b>
A.1	Benchmark Problems	157
A.2	Sequential Platform	158
A.3	Distributed Platform	159
