

Table of Contents

Invited Program

Keynote Communicating Cars: A Case for Ubiquitous Computing in the Automotive Domain	3
<i>Ralf Guido Herrtwich</i>	
Keynote Microprocessor Architectures for the Mobile Internet Era	4
<i>Marc Fleischmann</i>	

I Context-Aware Systems

An Architecture for the Integration of Physical and Informational Spaces	7
<i>Scott M. Thayer and Peter Steenkiste</i>	
A Context System for a Mobile Service Platform	21
<i>Fritz Hohl, Lars Mehrmann, and Amen Hamdan</i>	
Detecting Context in Distributed Sensor Networks by Using Smart Context-Aware Packets	34
<i>Florian Michahelles, Michael Samulowitz, and Bernt Schiele</i>	

II System Aspects

A Ubiquitous Control Architecture for Low Power Systems	51
<i>James “Wez” Weatherall and Duncan Grisby</i>	
Software Architecture-Based Adaptation for Pervasive Systems	67
<i>Shang-Wen Cheng, David Garlan, Bradley Schmerl, João Pedro Sousa, Bridget Spitznagel, Peter Steenkiste, and Ningning Hu</i>	
KECho - Event Communication for Distributed Kernel Services	83
<i>Christian Poellabauer, Karsten Schwan, Greg Eisenhauer, and Jiantao Kong</i>	

III Networking 1

A Fine-Grained Addressing Concept for GeoCast	101
<i>Peter Coschurba, Kurt Rothermel, and Frank Dürre</i>	
Data Paths in Wearable Communication Networks	114
<i>Christian Decker and Michael Beigl</i>	

Location and Network Quality Issues in Local Area Wireless Networks 131
Georgi Tonev, Vaidy Sunderam, Roger Loader, and James Pascoe

IV Processor Architecture

Design Tradeoffs for Embedded Network Processors 149
Tilman Wolf and Mark A. Franklin

Reconfigurable RISC – A New Approach for Space-Efficient Superscalar
Microprocessor Architecture 165
Sascha Wennekers and Christian Siemers

Cached Two-Level Adaptive Branch Predictors with Multiple Stages 179
Colin Egan, Gordon Steven, and Lucian Vintan

V Middleware and Verification

On the Combination of Assertions and Virtual Prototyping for the Design of
Safety-Critical Systems 195
Tim Oodes, Holger Krisp, and Christian Müller-Schloer

Ubiquitous Access to Wide-Area High-Performance Computing 209
*Frank Burchert, Stephan Gatzka, Christian Hochberger, Chang-Kun Lee,
Ulrike Lucke, and Djamshid Tavangarian*

Filter Similarities in Content-Based Publish/Subscribe Systems 224
Gero Mühl, Ludger Fiege, and Alejandro Buchmann

VI Networking 2

A Bluetooth Remote Control System 241
Fridtjof Feldbusch, Alexander Paar, Manuel Odendahl, and Ivan Ivanov

Rendezvous Layer Protocols for Bluetooth-Enabled Smart Devices 256
Frank Siegemund and Michael Rohs

A Robust Header Compression Simulator & Visualizer 274
Xiaoyuan Gu, Hannes Hartenstein, and Stefan Fischer

Author Index 287

Trends in Network and Pervasive Computing - ARCS
2002

International Conference on Architecture of Computing
Systems, Karlsruhe, Germany, April 8-12, 2002
Proceedings

Schmeck, H.; Ungerer, T.; Wolf, L. (Eds.)

2002, XIV, 294 p., Softcover

ISBN: 978-3-540-43409-2
