

# Contents

## Radiative Processes in Relativistic Outflows

<i>Apostolos Mastichiadis</i> .....	1
1 Introduction .....	1
2 Superluminal Motion .....	2
3 Doppler Boosting .....	3
4 Photon-Photon Pair Production .....	4
5 Synchrotron Radiation .....	7
6 Inverse Compton Scattering .....	10
7 Synchro Self-Compton Radiation .....	15
8 Continuity Equation .....	16
9 Coda .....	22
References .....	23

## Particle Acceleration at Relativistic Shocks

<i>Yves A. Gallant</i> .....	24
1 Introduction and Motivation .....	24
2 Relativistic Shocks .....	25
3 Fermi Acceleration and the Spectral Index .....	29
4 Maximum and Minimum Particle Energies .....	35
5 Summary .....	39
References .....	40

## Jet Formation and Collimation

<i>Christophe Sauty, Kanaris Tsinganos, Edoardo Trussoni</i> .....	41
1 Introduction .....	41
2 Basics of Jet Formation Theory .....	47
3 Acceleration .....	54
4 Collimation .....	58
5 On a Possible Classification of AGN .....	62
6 Concluding Remarks .....	67
References .....	68

## The Evolution of Classical Double Radio Galaxies

<i>Katherine M. Blundell</i> .....	71
1 Unavoidable Problems .....	71
2 What Are Radio Galaxy Observables? .....	72

3	Measurement of Source Properties .....	73
4	Minimizing the Effects of Spurious Correlations .....	75
5	Salient Correlations and Non-correlations .....	76
6	Refining Models for Luminosity Evolution .....	81
7	The Youth-Redshift Degeneracy .....	84
	References .....	86

## Blazars

	<i>Annalisa Celotti</i> .....	88
1	What Are They? .....	88
2	A Blazar Sequence .....	89
3	Jet Power .....	94
4	Internal Shock Scenario .....	97
5	Extended (X-ray) Jets .....	98
6	Conclusions .....	99
	References .....	99

## Relativistic Outflows from X-ray Binaries ('Microquasars')

	<i>Rob Fender</i> .....	101
1	History and Introduction .....	101
2	The Near-Ubiquity of Jets from X-ray Binaries .....	104
3	Connections .....	112
4	Forwards .....	113
5	Physical Processes .....	116
6	Conclusions .....	119
	References .....	119

## Gamma-Ray Bursts: The Afterglow Revolution

	<i>Titus J. Galama, Re'em Sari</i> .....	123
1	Introduction .....	123
2	$\gamma$ -Ray Burst Properties .....	124
3	GRB Theory – the Generic Picture .....	132
4	The Afterglow: Theory .....	136
5	The Afterglow Revolution .....	140
6	Collimated Outflow (Jets): Theory .....	145
7	Observational Evidence for Collimated Outflow (Jets) .....	148
8	Polarization – A Promising Tool .....	151
9	The Reverse Shock Emission: Theory and Observations .....	153
10	Progenitors .....	156
11	GRBs as Probes of the High-Redshift Universe .....	162
12	Summary .....	163
	References .....	163

**Observations and Simulations of Relativistic Jets**

<i>José-Luis Gómez</i> .....	169
1 Introduction .....	169
2 Relativistic HD and Emission Models .....	170
3 Hydrodynamical Models of Superluminal Sources .....	175
4 Magnetic Fields in Relativistic Jets .....	181
5 Jet Environments .....	184
6 Conclusions .....	191
References .....	191

**3D Relativistic Hydrodynamics**

<i>Miguel A. Aloy, José M. Martí</i> .....	197
1 Introduction .....	197
2 The Equations of General Relativistic Hydrodynamics .....	198
3 Numerical Integration of the RHD Equations .....	202
4 Computational Issues and Current 3D RHD Codes .....	210
5 Applications .....	214
6 Summary .....	221
References .....	222

**Epilogue**

<i>Roger Blandford</i> .....	227
1 Relativistic Flows in Astrophysics .....	227
2 Relativistic Flows .....	231
3 Numerical Simulations .....	234
4 What Now? .....	234
References .....	237
