## Actin-Myosin Interactions

### An Overview of the Actin-Myosin Interactions

D.D. Thomas and O. Roopnarine

|  |   |
|--|---|
| 1 Structural Changes in Actin and Myosin Due to Their Strong and Weak Interactions .....                     | 2 |
| 2 Fluorescence Resonance Energy Transfer in Actomyosin Complexes .....                                       | 2 |
| 3 Insights into Actomyosin Interactions from Actin Mutations .....   | 2 |
| 4 Role of Charges in the Actomyosin Complex .....  | 3 |
| 5 The Alanine-Scanning Mutagenesis of <i>Dictyostelium</i> Myosin II at the Ionic Interface with Actin ..... | 4 |
| 6 Familial Hypertrophic Cardiomyopathic Mutations That Affect the Actin-Myosin Interaction .....             | 4 |
| 7 Coupling Between Chemical and Mechanical Events and Conformation of Single Protein Molecules .....         | 4 |
| References .....   | 5 |

### Changes in Actin and Myosin Structural Dynamics Due to Their Weak and Strong Interactions

D.D. Thomas, E. Prochniewicz, and O. Roopnarine

|   |    |
|---|----|
| 1 Introduction .....  | 7  |
| 2 Changes in Myosin Structural Dynamics Induced by Actin .....                            | 8  |
| 2.1 Global Motions of Catalytic Domain: Disorder-to-Order Transition .....                | 10 |
| 2.2 Global Motion of Light Chain Domain: Disorder-to-Order Transition, Two Angles .....   | 11 |
| 2.3 Internal Motion of the Myosin Catalytic Domain: Resolve Three Structural States ..... | 12 |
| 3 Changes in Actin Structural Dynamics Induced by Myosin .....                            | 12 |
| 3.1 Global Dynamics of Actin .....  | 12 |
| 3.2 Internal Dynamics of Actin .....  | 14 |
| 4 Summary and Conclusions .....   | 15 |
| References .....  | 17 |

## Fluorescence Resonance Energy Transfer in Acto-Myosin Complexes

C.M. Yengo and C.L. Berger

|   |    |
|---|----|
| 1 Structure and Function of the Acto-Myosin Complex ..... | 21 |
| 2 Fluorescence Resonance Energy Transfer .....            | 23 |
| 3 Results and Discussion .....                            | 25 |
| References .....  | 29 |

## Insights into Actomyosin Interactions from Actin Mutations

T.C. Doyle and E. Reisler

|  |    |
|--|----|
| 1 Introduction .....                                   | 31 |
| 2 Use of Actin Mutants in Actomyosin Studies .....     | 33 |
| 3 D24/D25 and E99/E100 in Loops 18–29 and 93–102 ..... | 34 |
| 4 Acidic N-Terminus 2–5 .....                          | 37 |
| 5 Specificity of Actomyosin Weak Binding .....         | 41 |
| 6 Hydrophobic Strong Binding Residues .....            | 42 |
| 7 C-Terminus of Actin and the 262–274 Plug .....       | 44 |
| 8 Conclusions .....                                    | 45 |
| References .....                                       | 47 |

## Role of Charges in Actomyosin Interactions

P. Chaussepied and J. Van Dijk

|  |    |
|--|----|
| 1 Introduction .....   | 51 |
| 2 Structure of the Actomyosin Interface .....                                      | 51 |
| 3 Dynamics of the Actomyosin Complex .....   | 53 |
| 4 Role of the Ionic Interactions .....   | 53 |
| 5 Studies of the Ionic Interactions by Chemical Cross-Linking<br>Experiments ..... | 54 |
| 5.1 Cross-Linking Reactions and Identification<br>of the Cross-Linking Sites ..... | 55 |
| 5.2 Regulation of the Cross-Linking Sites by Nucleotide<br>Analogues .....         | 56 |
| 6 A New Model for the Actomyosin Interface During<br>the ATPase Cycle .....        | 58 |
| 7 Conclusions .....  | 60 |
| References .....   | 61 |

## The Alanine-Scanning Mutagenesis of *Dictyostelium* Myosin II at the Ionic Interface with Actin

H. Asukagawa and K. Sutoh

|  |    |
|--|----|
| 1 Introduction .....   | 65 |
| 2 Materials and Methods .....                                | 67 |
| 2.1 Construction and Expression of Recombinant Myosins ..... | 67 |

|  |    |
|--|----|
| 2.2 Phenotypes of the Transformed Cells .....                            | 67 |
| 2.3 Myosin Purification .....  | 67 |
| 2.4 ATPase Assays .....  | 68 |
| 2.5 In Vitro Motility Assays .....                                       | 68 |
| 3 Results and Discussion .....   | 68 |
| 3.1 Phenotypes of <i>Dictyostelium</i> Cells Expressing the Mutants .... | 68 |
| 3.2 Characterization of Purified Mutant Myosins .....                    | 69 |
| References .....   | 73 |

## **Familial Hypertrophic Cardiomyopathic Myosin Mutations That Affect the Actin-Myosin Interaction**

O. Roopnarine

|  |    |
|--|----|
| 1 Description of the FHC Disease .....                                     | 75 |
| 2 Myosin FHC Mutations .....   | 76 |
| 3 Myosin FHC Mutations That Affect the Actin-Myosin Interaction .....      | 77 |
| 3.1 Myosin FHC Mutations Near the Actin-Binding Interface ....             | 77 |
| 3.2 Myosin FHC Mutations Near the ATP Binding Site .....                   | 80 |
| 4 Light Chain FHC Mutations That Affect the Actin-Myosin Interaction ..... | 80 |
| 5 Actin Mutations That Cause FHC .....                                     | 81 |
| 6 Mechanism for the FHC Disease .....                                      | 82 |
| 7 Conclusions .....  | 83 |
| References .....   | 83 |

## **Coupling between Chemical and Mechanical Events and Conformation of Single Protein Molecules**

Y. Ishii, A. Ishijima, and T. Yanagida

|   |     |
|---|-----|
| 1 Introduction .....  | 87  |
| 2 Measurements of Force Exerted by Single Myosin Molecules .....              | 88  |
| 3 Visualization of Turnover of Single ATP Molecule .....                      | 90  |
| 4 Coupling Between Chemical and Mechanical Events .....                       | 93  |
| 5 Detection of Conformation of Single Protein Molecules .....                 | 98  |
| 5.1 Fluorescence Resonance Energy Transfer of a Single Protein Molecule ..... | 98  |
| 5.2 Conformational Diversity of Myosin Subfragments .....                     | 100 |
| 5.3 Dynamic Behavior of Protein Molecules .....                               | 102 |
| 6 Concluding Remarks .....  | 103 |
| References .....  | 104 |

## Actin-Based Calcium Regulation

### An Overview of Actin-Based Calcium Regulation

S.S. Lehrer

|   |     |
|---|-----|
| 1 Introduction .....  | 107 |
| 2 Cooperativity in the $\text{Ca}^{2+}$ Regulation of Muscle Contraction .....  | 107 |
| 3 Motility Assays of Calcium Regulation of Actin Filaments .....  | 108 |
| 4 The Ultrastructural Basis of Actin Filament Regulation .....  | 108 |
| 5 The Role of Troponin in the $\text{Ca}^{2+}$ Regulation of Skeletal Muscle Contraction .....  | 108 |
| 6 Structural Changes Between Regulatory Proteins and Actin: A Regulation Model by Tropomyosin-Troponin Based on FRET Measurements ..... | 109 |

### Cooperativity in the $\text{Ca}^{2+}$ Regulation of Muscle Contraction

M.A. Geeves and S.S. Lehrer

|  |     |
|--|-----|
| 1 Introduction .....   | 111 |
| 2 The Problem: The Force/ $\text{pCa}^{2+}$ Curve .....                      | 111 |
| 3 Components of the Regulatory System .....                                  | 112 |
| 4 The Three Thin Filament States from Solution Studies .....                 | 114 |
| 4.1 Actin-S1 ATPase: Two Activity States .....                               | 114 |
| 4.2 Equilibrium Binding of S1 to Actin Filaments .....                       | 115 |
| 4.3 Kinetics of S1 Binding to Actin Filaments: Three S1-Binding States ..... | 117 |
| 5 Relationship of Structural States to Solution States .....                 | 120 |
| 5.1 Observation of States .....  | 120 |
| 5.1.1 Probes of Equilibrium Titrations and Kinetics .....                    | 120 |
| 5.1.2 X-Ray Diffraction .....  | 121 |
| 5.1.3 Electron Microscopy .....  | 121 |
| 6 Size of the Cooperative Units .....  | 122 |
| 6.1 Cooperativity of $\text{Ca}^{2+}$ Binding to Troponin .....              | 122 |
| 6.2 Cooperativity of Blocked to Closed Transition .....                      | 123 |
| 6.3 Cooperativity of Closed to Open Transition .....                         | 125 |
| 7 Relationship of Solution States to Fibers .....                            | 126 |
| References .....   | 129 |

### Motility Assays of Calcium Regulation of Actin Filaments

M.A. LaMadrid, P.B. Chase, and A.M. Gordon

|                               |     |
|-------------------------------|-----|
| 1 Introduction .....          | 133 |
| 2 Materials and Methods ..... | 135 |
| 3 Results .....               | 137 |
| 4 Discussion .....            | 139 |
| 5 Conclusion .....            | 145 |
| References .....              | 146 |

## **The Ultrastructural Basis of Actin Filament Regulation**

R. Craig and W. Lehman

|     |  |     |
|-----|--|-----|
| 1   | Introduction .....   | 149 |
| 2   | Regulation in Striated Muscle .....  | 150 |
| 2.1 | Background .....   | 150 |
| 2.2 | The “Steric Blocking” Model of Regulation .....                                      | 152 |
| 2.3 | Early Controversies Concerning the Steric Model .....                                | 153 |
| 2.4 | Recent Advances on the Ultrastructural Basis<br>of Regulation .....                  | 155 |
| 2.5 | Towards an Atomic Level Model for Regulation .....                                   | 157 |
| 2.6 | Recent Criticism of the Steric Blocking Model .....                                  | 159 |
| 2.7 | Mechanistic Insights into Regulation Using Mutant<br>Tropomyosin .....               | 161 |
| 2.8 | The Structure of Thin Filaments During Active Sliding<br>with Myosin Filaments ..... | 161 |
| 3   | Regulation in Smooth Muscle .....  | 162 |
| 3.1 | Caldesmon .....  | 163 |
| 3.2 | Calponin .....   | 163 |
| 4   | Conclusions .....  | 164 |
| 5   | Future Directions .....  | 165 |
|     | References .....   | 165 |

## **The Role of Troponin in the Ca<sup>2+</sup>-Regulation of Skeletal Muscle Contraction**

D. Szczesna and J.D. Potter

|   |  |     |
|---|--|-----|
| 1 | The Role of TnC and Its Interaction with TnI in the Regulation<br>of Contraction ..... | 171 |
| 2 | The Role of TnT and Its Interaction with TnC in the Regulation<br>of Contraction ..... | 176 |
| 3 | Model of the Regulation of Contraction by Troponin .....                               | 183 |
|   | References .....   | 185 |

## **Structural Changes Between Regulatory Proteins and Actin: A Regulation Model by Tropomyosin-Troponin Based on FRET Measurements**

M. Miki

|     |  |     |
|-----|--|-----|
| 1   | Introduction .....                           | 191 |
| 1.2 | History of Ca <sup>2+</sup> Regulation ..... | 191 |
| 1.2 | FRET as an Optical Ruler .....               | 192 |
| 1.3 | Probe Sites on Proteins .....                | 192 |
| 2   | Structural Changes Measured by FRET .....    | 193 |
| 2.1 | Tropomyosin-Actin .....                      | 193 |
| 2.2 | Troponin-Actin .....                         | 196 |

---

|     |  |     |
|-----|--|-----|
| 3   | A New Model For Regulation .....               | 197 |
| 3.1 | FRET Data Suggest a New Regulation Model ..... | 197 |
| 3.2 | Evaluation of the Regulation Model .....       | 198 |
| 4   | Conclusions .....                              | 200 |
|     | References .....                               | 201 |
|     | <b>Subject Index</b> .....                     | 205 |

Molecular Interactions of Actin

Actin-Myosin Interaction and Actin-Based Regulation

Thomas, D.D.; Remedios, C.G.d. (Eds.)

2002, XII, 207 p. 30 illus., Hardcover

ISBN: 978-3-540-67111-4
