## Part I Entwined modules and Doi-Koppinen Hopf modules

---

<b>1</b>	<b>Generalities</b> .....	3
1.1	Coalgebras, bialgebras, and Hopf algebras .....	3
1.2	Adjoint functors .....	22
1.3	Separable algebras and Frobenius algebras .....	28
<b>2</b>	<b>Doi-Koppinen Hopf modules and entwined modules</b> .....	39
2.1	Doi-Koppinen structures and entwining structures .....	39
2.2	Doi-Koppinen modules and entwined modules .....	48
2.3	Entwined modules and the smash product .....	50
2.4	Entwined modules and the smash coproduct .....	59
2.5	Adjoint functors for entwined modules .....	64
2.6	Two-sided entwined modules .....	68
2.7	Entwined modules and comodules over a coring .....	71
2.8	Monoidal categories .....	78
<b>3</b>	<b>Frobenius and separable functors for entwined modules</b> ...	89
3.1	Separable functors and Frobenius functors .....	89
3.2	Restriction of scalars and the smash product .....	99
3.3	The functor forgetting the $C$ -coaction .....	124
3.4	The functor forgetting the $A$ -action .....	137
3.5	The general induction functor .....	146
<b>4</b>	<b>Applications</b> .....	159
4.1	Relative Hopf modules .....	159
4.2	Hopf-Galois extensions .....	168
4.3	Doi's $[H, C]$ -modules .....	179
4.4	Yetter-Drinfeld modules .....	181
4.5	Long dimodules .....	193
4.6	Modules graded by $G$ -sets .....	195
4.7	Two-sided entwined modules revisited .....	198
4.8	Corings and descent theory .....	204

---

**Part II Nonlinear equations**

---

<b>5</b>	<b>Yetter-Drinfeld modules and the quantum Yang-Baxter equation</b>	217
5.1	Notation	217
5.2	The quantum Yang-Baxter equation and the braid equation	218
5.3	Hopf algebras versus the QYBE	225
5.4	The FRT Theorem	235
5.5	The set-theoretic braid equation	238
<b>6</b>	<b>Hopf modules and the pentagon equation</b>	245
6.1	The Hopf equation and the pentagon equation	245
6.2	The FRT Theorem for the Hopf equation	253
6.3	New examples of noncommutative noncocommutative bialgebras	267
6.4	The pentagon equation versus the structure and the classification of finite dimensional Hopf algebras	277
<b>7</b>	<b>Long dimodules and the Long equation</b>	301
7.1	The Long equation	301
7.2	The FRT Theorem for the Long equation	304
7.3	Long coalgebras	311
<b>8</b>	<b>The Frobenius-Separability equation</b>	317
8.1	Frobenius algebras and separable algebras	317
8.2	The Frobenius-separability equation	320
8.3	The structure of Frobenius algebras and separable algebras	332
8.4	The category of FS-objects	339
	<b>References</b>	345
	<b>Index</b>	353

Frobenius and Separable Functors for Generalized  
Module Categories and Nonlinear Equations

Caenepeel, S.; Militaru, G.; Zhu, S.

2002, XIV, 354 p., Softcover

ISBN: 978-3-540-43782-6
