

Contents

Part 1: Data Analysis, Statistics, and Classification	1
Clustering and Models	
<i>C. Ambroise, G. Govaert</i>	3
Some New and Some Old Results for the Polytomous Rasch Model	
<i>E. B. Andersen</i>	17
Some Basic Results on the Extension of Quasi-likelihood Based Measurement Error Correction to Multivariate and Flexible Structural Models	
<i>T. Augustin</i>	29
On the Optimal Number of Clusters in Histogram Clustering	
<i>J. M. Buhmann, M. Held</i>	37
The Dual Dynamic Factor Analysis Models	
<i>R. Coppi, P. D'Urso</i>	47
Joint Non-symmetrical Correspondence Analysis with Ordered Categories	
<i>L. D'Ambra, R. Lombardo, P. Amenta</i>	59
Regression Analysis of Extremely Multicollinear Data	
<i>N. Fickel</i>	67
Modern Data Analysis: A Clash of Paradigms	
<i>D. J. Hand</i>	75
Two-mode Clustering with Genetic Algorithms	
<i>J. Hansohm</i>	87
Exact Tests for the Comparison of Binary Data Structures in Time	
<i>J. Krauth</i>	95
Connected Maximum Split Clustering of Ladder Graphs	
<i>I. Lari</i>	107
A Generalization of Two-mode Three-way Asymmetric Multidimensional Scaling	
<i>A. Okada, T. Imaizumi</i>	115
Central Limit Theorem for Probabilities of Correct Classification	
<i>W.-D. Richter</i>	123
A New Model for the Analysis of Multitrait-multimethod Data	
<i>R. Rocci, G. Bove</i>	131
Discrete and Continuous Models for Two-way Data	
<i>M. Vichi</i>	139

Part 2: Pattern Recognition and Automation	149
Towards Feature Fusion – A Classifier on the Basis of Automatically Generated Significant Contour Sections <i>D. Pechtel, K.-D. Kuhnert</i>	151
Convex Discriminant Analysis Tools for Non Convex Pattern Recognition <i>M. Rémon</i>	159
Sparse Kernel Feature Analysis <i>A. J. Smola, O. L. Mangasarian, B. Schölkopf</i>	167
Part 3: Data Mining, Information Processing, and Automation	179
Exploring Association Rules by Interactive Graphics <i>H. Hofmann, A. Wilhelm</i>	181
Classification of Texts with Support Vector Machines: An Examination of the Efficiency of Kernels and Data-transformations <i>J. Kindermann, E. Leopold</i>	189
Text Mining with the Help of Cohesion Trees <i>A. Mehler</i>	199
New Features of Categorical Principal Components Analysis for Complicated Data Sets, Including Data Mining <i>J.J. Meulman, A.J. van der Kooij, A. Babinec</i>	207
Supplement of Information: Data Integration by Classification of Pairs of Records <i>M. Neiling, H.-J. Lenz</i>	219
The Completion of Missing Values by Neural Nets for Data Mining <i>A. Ultsch, S. Rolf</i>	227
Knowledge Landscapes: Clustering Hypermedia Course Content for Efficient Overviews <i>E. Weippl, H. Lohninger</i>	235
Simplification of Knowledge Discovery using “Structure Classification” <i>S. Zumpe, W. Esswein</i>	245
Part 4: New Media, Web Mining, and Automation . . .	253
Natural Language-based Specification and Fuzzy Logic for the Multimedia Development Process <i>K. Alfert, M. Heiduck</i>	255

A Tool System for an Object-oriented Approach to Construction and Maintenance of Hypermedia Documents	
A. Fronk	265
Recommendations for Virtual Universities from Observed User Behavior	
A. Geyer-Schulz, M. Hahsler, M. Jahn	273
Virtual Dialect Areas in the Internet: "Townchats"	
B. Kelle	281
The Navigation Problem in the World-Wide-Web	
M. Levene	289
Mining Web Usage Data for Automatic Site Personalization	
B. Mobasher	299
Integrating Combinatorial Relationships in a Cartography for Web Site Promotion	
F. Velin, P. Kuntz, H. Briand	313
Part 5: Applications in Management Science, Finance, and Marketing	321
Common Due Date Scheduling	
- Straddling Jobs and Due Windows -	
M. Feldmann	323
Currency Derivatives in German Non-financials:	
Empirical Evidence on Theoretical Approaches	
D. Mahayni	333
Data Visualization and Preparation by Separating Sales Force Data	
Matthias Meyer	343
Fuzzy Scenario Evaluation	
M. Missler-Behr	351
Fair Stock Risk Premiums under Firm-specific Price Jumps	
B. Nietert	359
What Components Determine Stock Market Returns in the 1990's?	
M. Pojarliev, W. Polasek	367
A Comparison of Estimators for Multivariate ARCH Models	
W. Polasek, S. Liu	375
Pricing of a New Integrated Risk Reinsurance Product	
H. Schmeiser	383
A Multiple Method Approach for Discrimination and Classification in Marketing Research	
T. Temme	391

Goodness-of-Fit Measures for Two-mode Cluster Analyses <i>A. Unterreitmeier, M. Schwaiger</i>	401
On Volatility Transfers During the Asia Crisis in 1997-1998 <i>E. Zahnd</i>	409
Part 6: Applications in Medicine, Biology, Archaeology, and Others	419
QTL Mapping in Plant Populations <i>K. Emrich</i>	421
Robust Multivariate Methods in Geostatistics <i>P. Filzmoser, C. Reimann</i>	429
Resampling Methods in Physical Mapping <i>S. Heber, J. Stoye, M. Frohme, J. Hoheisel, M. Vingron</i>	437
Validating Dialect Comparison Methods <i>W. Heeringa, J. Nerbonne, P. Kleiweg</i>	445
Rater Classification on the Basis of Latent Features in Responding to Situations <i>M. Meulders, P. De Boeck, I. Van Mechelen</i>	453
Results of Automatic Conversion of Diagnoses from ICD-9 to ICD-10 for Cancer Registration <i>Martin Meyer, M. Franzkowiak de Rodriguez</i>	463
Exploring Roman Brick and Tile by Cluster Analysis with Validation of Results <i>H.-J. Mucha, H.-G. Bartel, J. Dolata</i>	471
Relief Intensity and the Formation of the Archaeological Record <i>T. Saile</i>	479
Spatio-Temporal Modeling of Cancer Mortality Rates <i>U. Schach</i>	491
The Classification of Critical Periods for Melanoma Development due to UV-Radiation <i>D. Schneider, A. Pfahlberg, O. Gefeller</i>	499
Classification in the Prescription of Medicaments <i>R. Schuster, D. Melcher</i>	507
Effects of Independent Non-differential Misclassification on the Attributable Risk <i>C. Vogel, M. Land, O. Gefeller</i>	515
A New Approach to Discriminant Analysis with Longitudinal Data <i>K.-D. Wernecke</i>	523

Author Index	531
Subject Index	533

Classification, Automation, and New Media
Proceedings of the 24th Annual Conference of the
Gesellschaft für Klassifikation e.V., University of Passau,
March 15—17, 2000
Gaul, W.; Ritter, G. (Eds.)
2002, XI, 535 p. 1 illus., Softcover
ISBN: 978-3-540-43233-3
