
Contents

1 The Causes of Colorectal Cancer	1
Introduction	1
Descriptive Epidemiology and Temporal Trends	2
The Environment and Colorectal Cancer	3
Diet and Micronutrients	3
Physical Activity, Obesity and Energy Imbalance	5
Hormonal Factors	6
Smoking and Alcoholic Beverages	6
Inflammatory Bowel Diseases	7
Drugs	7
Colorectal Polyps and the Adenoma-Carcinoma Sequence	8
Familial and Hereditary Factors	10
Familial Colorectal Cancer	10
Hereditary Non-polyposis Colorectal Cancer	11
Familial Adenomatous Polyposis	13
Gene-Environment Interactions	14
Conclusions	14
References	15
2 Pathogenesis of Colorectal Cancer	23
Introduction	23
Main Causes of Colorectal Cancer	24
Pathogenesis of Colorectal Cancer:	
Different Molecular Pathways for One Disease	25
Sporadic Colorectal Cancer Development (Loss of Heterozygosity Pathway)	26
Tumor Development in FAP and Other Polyposis Syndromes	30
Colorectal Tumorigenesis in HNPCC (Mutator Genes/Microsatellite Instability Pathway)	35
The Mitotic Checkpoint Gene Mutation Pathway	38
Colorectal Cancer Development in Inflammatory Bowel Diseases	38

Tumor Development Through the I1307 K Mutation of the APC Gene: Some Clues to Familial Cancer	40
Conclusions	41
References	42
 3 Pathology of Colorectal Cancer	 49
Introduction	49
The Colorectal Mucosa	50
Normal Architecture	50
Cell Proliferation	52
Aberrant Crypts	52
Adenomatous Polyps	54
Descriptive Epidemiology	54
Distribution, Size and Multiplicity	55
Histopathology, Dysplasia and “Malignant Polyps”	55
Adenomas in Familial Adenomatous Polyposis and Hereditary Non-polyposis Colorectal Cancer	59
The Adenoma-Carcinoma Sequence	59
Etiology of Adenomatous Polyps	60
Other Types of Polyps	61
Hyperplastic, Mixed Polyps and Serrated Adenomas	61
Flat Adenomas	63
Hamartomatous Polyps	64
Polyps and Dysplasia in Inflammatory Bowel Diseases	65
Other Benign Tumors	66
Colorectal Carcinoma	66
Adenoma-Carcinoma Sequence Versus “De Novo” Carcinogenesis	66
Macroscopic Appearance	67
Histological Features and Grading	67
Pattern of Metastasis and Staging	69
Other Tumors of the Large Bowel	70
Conclusions	71
References	72
 4 Diagnosis and Clinical Features of Colorectal Cancer	 79
Introduction	79
Clinical Findings: Symptoms and Signs	80

Laboratory Investigations	81
Diagnosis of Colorectal Cancer: Old Methods and Recent Imaging Techniques	82
Imaging Studies in Primary Cancer	82
Imaging Studies in the Diagnosis of Recurrent or Metastatic Disease	85
Conclusions	88
References	89
 5 Colorectal Cancer Screening and Surveillance . . .	95
Introduction	95
Colorectal Cancer Screening in the General Population	96
Role of Fecal Occult Blood Testing	97
Role of Sigmoidoscopy	98
Role of Colonoscopy and Barium Enema	99
New Screening Procedures Based on Molecular Analysis	100
Screening in Individuals with Familial Colorectal Cancer	100
Understanding the Nature of the Familial Risk	101
Screening Recommendations for Individuals with Familial Risk	102
Surveillance After Endoscopic Polypectomy	102
Surveillance After Surgery for Colorectal Cancer . .	103
Surveillance in Patients with Inflammatory Bowel Disease	104
Surveillance in Hereditary Cancer Syndromes	105
Familial Adenomatous Polyposis	106
Hereditary Non-polyposis Colorectal Cancer . .	107
Conclusion: Media, Society and Colorectal Cancer Screening	108
References	109
 6 Prevention and Chemoprevention of Colorectal Neoplasms	117
Introduction	117
Can We Prevent Colorectal Cancer with an Appropriate Diet?	118
Can We Prevent Colorectal Cancer by Modifying Our Lifestyle?	119
Secondary Prevention: Is the Removal of Adenomas Effective?	120

Colorectal Cancer Prevention	
Under Special Conditions	121
Chemoprevention of Colorectal Cancer	123
General Concepts of Chemoprevention	123
Main Compounds Used in the Chemoprevention	
of Colorectal Tumors	125
Conclusions	128
References	128
7 Treatment of Colorectal Cancer	135
Introduction	135
Staging Colorectal Neoplasms	136
Treatment of Resectable Colorectal Tumors	137
Endoscopic Treatment of Malignant Polyps	137
Surgical Treatment of Resectable Tumors	
of the Colon	138
Surgical Treatment of Resectable Tumors	
of the Rectum	139
Medical Treatment of Colorectal Tumors	141
Radiation Treatment of Rectal Cancer	144
Management of Locally Recurrent Cancer	146
Treatment of Advanced Colorectal Tumors	147
Surgical Treatment	
of Metastatic Colorectal Cancer	147
Chemotherapy for Advanced Colorectal Cancer	148
Toxicity and Cost of Chemotherapy	
in Advanced Colorectal Cancer	151
Other Treatments	
for Advanced Colorectal Neoplasms	151
Innovative Treatments for Colorectal Cancer	152
Conclusions	154
References	154
8 Survival and Follow-up of Colorectal Cancer	163
Introduction	163
Factors Influencing Colorectal Cancer Survival	164
Gender, Age and Stage at Diagnosis	164
Morphological and Clinical Indicators	165
Cell Replication, Nuclear Ploidy	
and Colorectal Cancer Survival	167
Molecular Markers of Prognosis	168
Micrometastases and Prognosis	170
Temporal Trends and Ethnic Differences	
in Colorectal Cancer Survival	171

Follow-up of Colorectal Cancer Patients	172
Proposed Surveillance Programs	
After Colorectal Cancer Resection	173
Controlled Studies Evaluating the Effectiveness of Follow-up	174
Conclusions	175
References	175
 9 Cancer of the Anal Canal	 181
Introduction	181
Epidemiology of Anal Cancer	181
Descriptive Epidemiology	181
Risk Factors	182
Clinical Features and Pathology	184
Treatment of Cancer of the Anus	185
Radiotherapy Alone	185
Combination Therapy	185
Conclusions	186
References	187
 10 Hereditary Non-polyposis Colorectal Cancer (Lynch Syndrome)	 191
Introduction	191
Brief History of HNPCC	191
Epidemiology and Frequency of Lynch Syndrome . .	192
Formal Genetics and the Role of Family History . .	195
Clinical Features of HNPCC	197
Age at Diagnosis and Preferential Location in the Right Colon	198
Multiple Tumors	199
Tumor Spectrum	200
Pathology of HNPCC	201
Molecular Biology of HNPCC	202
DNA Mismatch Repair in Bacteria	203
Human Mismatch Repair Genes in Lynch Syndrome	203
Microsatellite Instability: the MSI+ Phenotype . .	205
Microsatellite Instability and Cancer Development	206
Frequency of Mutations in HNPCC Families . . .	207
New Genes Predisposing to HNPCC	208
Diagnosis of HNPCC	209
Identification of HNPCC	209
Suspected HNPCC	210

Genetic Counseling in HNPCC	212
Management and Survival	213
Treatment and Follow-up	214
Survival	215
Conclusions	216
References	216
11 Familial Adenomatous Polyposis	225
Introduction	225
Definition and Historical Overview	226
Epidemiology and Formal Genetics	227
Diagnosis, Clinical Features and Morphology	229
Colorectal Lesions	229
Extracolonic Manifestations	231
Molecular Biology of FAP	235
The APC Gene and Its Functions	235
Genotype-Phenotype Correlations	236
Methods for Study of the APC Gene	239
Management of Familial Adenomatous Polyposis	239
The Role of Counseling in the Diagnosis and Surveillance of Adenomatosis Coli	240
Surgical Treatment of FAP	241
Overall Prognosis and Follow-up	243
Medical Treatment	243
Conclusions	244
References	245
12 Other Polyposis of the Large Bowel	253
Introduction	253
Peutz-Jeghers Syndrome	253
Clinical Manifestations and Morphology	256
Molecular Biology of PJS	257
Management	258
Juvenile Polyposis	259
Phenotypic Characteristics, Genetics and Cancer Risk	259
Molecular Biology and Genetic Heterogeneity of JP	260
Management of JP	261
Cowden's Disease	261
Clinical Manifestations and Morphology	261
Molecular Basis of CD	262
Management of CD	262
Turcot Syndrome	263

Clinical and Morphologic Aspects of TS	263
Complex Genetic and Molecular Basis of TS . . .	263
Management of TS	265
Muir-Torre Syndrome and Other Rare Polyposis . .	265
Clinical and Morphologic Features of MTS . . .	265
Molecular Biology of MTS	266
Management of MTS	267
Cronkhite-Canada Syndrome	267
Bannayan-Riley-Ruvalcaba Syndrome	268
Conclusions	268
References	269
 13 Carcinoid Tumors of the Large Bowel	 275
Introduction	275
Brief History	275
Biology and Pathology of CT	276
Clinical Features of Colorectal CT	277
Diagnosis and Treatment of CT of the Large Bowel	279
Diagnosis of CT	280
Treatment of the Primary Tumor	280
Treatment of Metastatic CT	280
Conclusions	281
References	282
 14 Colorectal Cancer	
at the Beginning of the New Millennium	285
The Colorectal Cancer Epidemic	285
Gene-Environment Interaction	286
Dealing with Colorectal Cancer Patients	
in the “Molecular Era”	287
