1 Introduction

Seizo Morita	1
1.1 AFM in Retrospective	1
1.2 Present Status of NC-AFM	4
1.3 Future Prospects for NC-AFM	8
References	10

2 Principle of NC-AFM

Franz J. Giessibl	11
2.1 Basics	11
2.1.1 Relation to the Scanning Tunneling Microscope (STM) ..	11
2.1.2 Atomic Force Microscope (AFM)	15
2.1.3 Operating Modes of AFMs	18
2.1.4 Scanning Speed, Signal Bandwidth and Noise	20
2.2 The Four Additional Challenges Faced by AFM	20
2.2.1 Jump-to-Contact and Other Instabilities	21
2.2.2 Contribution of Long-Range Forces	21
2.2.3 Noise in the Imaging Signal	22
2.2.4 Non-Monotonic Imaging Signal	22
2.3 Frequency-Modulation AFM (FM-AFM)	22
2.3.1 Experimental Setup	22
2.3.2 Applications	26
2.4 Relation between Frequency Shift and Forces	29
2.4.1 Generic Calculation	29
2.4.2 Frequency Shift for a Typical Tip-Sample Force	32
2.4.3 Calculation of the Tunneling Current for Oscillating Tips	33
2.5 Noise in Frequency-Modulation AFM	34
2.5.1 Generic Calculation	34
2.5.2 Noise in the Frequency Measurement	34
2.5.3 Optimal Amplitude for Minimal Vertical Noise	38
2.6 A Novel Force Sensor Based on a Quartz Tuning Fork	39
2.6.1 Quartz Versus Silicon as a Cantilever Material	39
2.6.2 Benefits in Clamping One of the Beams (qPlus Configuration)	40

VIII Contents

2.7 Conclusion and Outlook	41
References	43
3 Semiconductor Surfaces	
Seizo Morita, Yasuhiro Sugawara.....	47
3.1 Instrumentation	47
3.2 Three-Dimensional Mapping of Atomic Force	48
3.3 Control of Atomic Force	52
3.4 Imaging Mechanisms for Si(100)2×1 and Si(100)2×1:H	55
3.5 Surface Strain on an Atomic Scale	58
3.6 Low Temperature Image of Si(100) Clean Surface	60
3.7 Mechanical Control of Atom Position	61
3.8 Atom Identification Using Covalent Bonding Force	65
3.9 Charge Imaging with Atomic Resolution	68
3.10 Mechanical Atom Manipulation	74
References	76
4 Bias Dependence of NC-AFM Images and Tunneling Current Variations on Semiconductor Surfaces	
Toyoko Arai, Masahiko Tomitori	79
4.1 Experimental Conditions.....	79
4.2 Bias Dependence of NC-AFM Images for Si(111)7×7	80
4.2.1 Mechanism of Inverted Atomic Corrugation.....	81
4.2.2 NC-AFM Imaging and Tunneling Current	84
4.3 NC-AFM Images for Ge/Si(111)	88
4.4 Concluding Remarks	91
References	92
5 Alkali Halides	
Roland Bennewitz, Martin Bammerlin, Ernst Meyer	93
5.1 Introduction	93
5.1.1 Experimental Techniques	93
5.1.2 Relevant Forces	94
5.2 Imaging of Single Crystals	95
5.2.1 Sample Preparation	95
5.2.2 Atomic Corrugation	96
5.2.3 Imaging of Defects	97
5.2.4 Mixed Alkali Halide Crystals	98
5.3 Imaging of Thin Films.....	98
5.3.1 Preparation of Thin Films.....	99
5.3.2 Atomic Resolution at Low-Coordinated Sites	100
5.4 Radiation Damage	101
5.4.1 Metallization and Bubble Formation in CaF ₂	101
5.4.2 Monatomic Pits in KBr	102

5.5	Dissipation Measurements	103
5.5.1	Material and Site-Specific Contrast	104
5.5.2	Using Damping for Distance Control	105
