Part I Ozone Depletion and UV Radiation in the Arctic

1	Recent Changes in Surface UV Radiation and Stratospheric Ozone at a High Arctic Site	1
	A. Dahlback	
1.1	Introduction	3
1.2	Atmospheric Ozone	4
1.2.1	Natural Variations	4
1.2.2	Long-Term Ozone Changes at High Latitudes	6
1.3	UV Radiation	9
1.3.1	Spectral Distribution and UV Controlling Factors	9
1.3.2	Arctic UV Radiation	12
1.3.3	UV Radiation Model	19
1.4	Summary	19
	References	20
2	Spectral Properties and UV Attenuation in Arctic Marine Waters	23
	E. Aas, J. Høkedal, N.K. Højerslev, R. Sandvik, E. Sakshaug	
2.1	Introduction	23
2.2	Factors Determining the Vertical Attenuation of Irradiance in the Sea	25
2.2.1	Transmission of Irradiance Through the Surface of the Sea .	25
2.2.2	Vertical Attenuation Coefficient of Downward Irradiance . .	26
2.3	Spectral Properties of Marine Optical Components	27
2.3.1	Pure Seawater	27
2.3.2	Yellow Substance	28
2.3.3	Phytoplankton and Associated Detritus	31
2.3.4	Minerogenic Particles	33
2.3.5	Sea Ice	34
2.4	Relations Between Spectral Vertical Attenuation Coefficients	35

X		Contents
2.5	Methods	38
2.5.1	Representation of UV Daylight Transparency	38
2.5.2	Instruments	39
2.6	Regional Transparency of UV Daylight	40
2.6.1	Characteristics of Arctic Marine Waters	40
2.6.2	Nordic and Barents Seas	42
2.6.3	Kara Sea and Davis Strait	48
2.7	Summary and Conclusions	51
	References	52
 3	 Spectral Properties and UV Attenuation in Arctic Freshwater Systems	 57
	J.B. Ørbæk, T. Svenøe, and D.O. Hessen	
3.1	Introduction	57
3.2	Optical Properties of Arctic Lakes	59
3.3	UV Scenarios for Arctic Lakes	67
3.4	Summary	69
	References	70
 4	 UV and the Optical Properties of Sea Ice and Snow	 73
	D.K. Perovich	
4.1	Introduction	73
4.2	Sea Ice Structure and Morphology	74
4.3	Theory	76
4.4	Observations	79
4.5	Models	82
4.6	Summary	86
	References	87

Part II UV Radiation and Arctic Terrestrial Systems

 5	 Effects of UV-B Radiation on Terrestrial Organisms and Ecosystems with Special Reference to the Arctic	 93
	L.O. Björn	
5.1	Introduction	93
5.2	Terrestrial Arctic Conditions and UV-B Effects	94

Contents	XI
5.3 UV-B Effects of Biological Interest on Dead Matter	96
5.3.1 Effects on the Atmosphere	96
5.3.2 Effects on the Oxidation State and Biological Availability of Iron and Manganese	97
5.3.3 Effects on Plant Litter and Humic Acid	97
5.4 The Molecular Targets in Organisms	98
5.5 Effects on Plants	99
5.5.1 Effects on Growth and Morphological Changes in Plants . .	99
5.5.2 Effects on Mosses	100
5.5.3 Effects on Photosynthesis	100
5.5.4 Effects on Plant Reproduction and Phenology	100
5.5.5 Effects on Interspecies Competition Among Plants	103
5.5.6 Effects on Plant Secondary Metabolism and on Emission of Volatile Organic Substances from Plants	104
5.5.7 Long-Term Effects on Plant Populations and on Ecosystem Primary Productivity	105
5.5.8 UV-B Effects on Terrestrial Antarctic Plants	106
5.6 Effects on Terrestrial Microorganisms	106
5.6.1 Changing Research Focus	106
5.6.2 Nonpathogenic Fungi	107
5.6.3 Plant Pathogens	108
5.6.4 Insect Pathogens	109
5.6.5 Vitamin D ₂ and D ₃ Formation in Fungi and Lichens	109
5.6.6 Secondary Metabolism, Pigmentation and Morphogenesis in Fungi	110
5.6.7 UV-B Effects on Cyanobacteria	110
5.6.8 Snow Algae	111
5.7 Effects on Animals	111
5.7.1 Vertebrates	111
5.7.2 Invertebrates	112
5.8 Summary	113
References	114

6 UV Tolerance, Pigmentation and Life Forms in High Arctic Collembola	123
H.P. Leinaas	
6.1 Introduction	123
6.2 Collembola: Life Forms and Pigmentation	124
6.3 The Species Studied	125
6.4 UV Exposure and UV Tolerance	126

6.5	Pigmentation, Photoprotection and Spatial Structure of Species Assemblages	130
6.6	Summary	132
References	132

Part III UV Radiation and Arctic Freshwater Systems

7	UV Effects on Aquatic Microbial Food Webs in Northern Lakes and Rivers	137
	W.F. Vincent and C. Belzile	
7.1	Introduction	137
7.2	Biological UV Exposure	139
7.3	Planktonic Microbial Communities	142
7.3.1	Phototrophs	142
7.3.2	Heterotrophs	145
7.4	Benthic Microbial Communities	147
7.5	Summary	149
References	151
8	UV Radiation and Arctic Freshwater Zooplankton	157
	D.O. Hessen	
8.1	Introduction	157
8.2	Ambient UV Radiation	158
8.3	Lines of Defense Against UV Damage	162
8.3.1	Seasonal and Spatial Responses	163
8.3.2	Photoprotective Pigmentation	165
8.3.3	Anti-Oxidants	169
8.4	Evidence for in Situ UV Effects	173
8.4.1	Direct UV Effects	173
8.4.2	Indirect UV Effects	174
8.5	UV and Multiple Stress Effects	175
8.5.1	Oxygen and Temperature	176
8.5.2	UV and Low Food	177
8.5.3	UV and Water Chemistry	177
8.6	Summary	179
References	180

9	UV Radiation and the Pelagic Food Web of Arctic Freshwaters	185
	D.O. Hessen, G.A. Dahl-Hansen, and E. Van Donk	
9.1	Introduction	185
9.2	UV-Induced Top-Down Effects	187
9.2.1	Zooplankton Grazing	188
9.3	Bottom-Up Effects	190
9.3.1	Changes in Food Quality for Grazers	190
9.3.2	Community Shifts in Food Resources	192
9.4	Summary	194
	References	195

Part IV UV Radiation and Arctic Marine Systems

10	UV Radiation Effects on Phytoplankton Primary Production: A Comparison Between Arctic and Antarctic Marine Ecosystems	203
	E.W. Helbling and V.E. Villafañe	
10.1	Introduction	203
10.2	Similarities and Differences Between the Arctic and Antarctica	204
10.3	UV Radiation Effects upon Polar Marine Phytoplankton . .	207
10.3.1	Short-Term Effects of UV Radiation	208
10.3.2	Long-Term Effects of UV Radiation	214
10.4	Importance of Water Mixing	219
10.5	Summary	219
	References	220
11	UV Radiation and Arctic Marine Macroalgae	227
	K. Bischof, D. Hanelt, and C. Wiencke	
11.1	Introduction	227
11.2	Macroalgae in the Arctic Environment	228
11.3	Photosynthesis	230
11.4	Protection by UV Radiation Screening Compounds	233
11.5	Impact on Different Developmental Stages	236
11.6	UV Radiation Effects on Growth	237
11.7	Summary	239
	References	240

12	UV Radiation and Pelagic Bacteria	245
	G.J. Herndl, I. Obernosterer	
12.1	Introduction	245
12.2	Dissolved Organic Matter and Its Photochemical Transformation in the Arctic – Is It Different from Other Marine Environments?	247
12.3	The Bacterial Community of the Arctic	251
12.4	Mixing Processes, Photochemical Transformation of Dissolved Organic Matter and Its Interaction with Bacteria – The Impact of UV Radiation in the Dynamic Context	253
12.5	Summary	255
	References	256
 13	 Impacts of UV Radiation on Crustacean Zooplankton and Ichthyoplankton: Case Studies from Subarctic Marine Ecosystems	 261
	H.I. Browman, R.D. Vetter	
13.1	Introduction	261
13.2	Case Study I – Lofoten, Norway	262
13.2.1	Hydrographics of the Lofoten Area	263
13.2.2	The UV Environment of the Norwegian Coast	263
13.2.3	UV Responses in Arcto-Norwegian Cod Eggs	265
13.2.4	UV Responses in Arcto-Norwegian Cod Yolk Sac Larvae . .	269
13.2.5	In-Situ Measurements on the Lofoten Spawning Banks . . .	272
13.2.6	Summary of Case Study I	273
13.3	Case Study II – Estuary and Gulf of St. Lawrence, Canada . .	274
13.3.1	Hydrographics of the Study Area	274
13.3.2	The UV Environment of the Gulf of St. Lawrence	276
13.3.3	Species Studied	278
13.3.4	Effects of UV-B on Crustacean Zooplankton and Ichthyoplankton	279
13.3.5	Ecological Context	293
13.3.6	Summary of Case Study II and Parting Words of Caution . .	296
	References	297

Part V UV Radiation and the Arctic Human Population0

14	Human Health and Arctic Ozone Depletion	307
	E.C. De Fabo, F.P. Noonan	
14.1	Introduction	307
14.2	Is UV-B Radiation a Health Risk in the Arctic?	309
14.2.1	Pollutants and UV-B	309
14.2.2	Arctic Environmental Stressors	309
14.2.3	UV-B and Immune Suppression	310
14.2.4	Skin Cancer	311
14.2.5	Dietary Factors and UV-B-Induced Immune Suppression . .	312
14.2.6	Other Health Effects Associating UV-B and Arctic Ozone Depletion	312
14.3	Summary	313
	References	314
	 Subject Index	 317
