<b>A Blended Fictitious/Real Domain Decomposition Method for Partially Axisymmetric Exterior Helmholtz Problems with Dirichlet Boundary Conditions</b> .....	1
<i>Ulrich Hetmaniuk and Charbel Farhat</i>	
1 Introduction .....	1
2 The Sound-Soft Acoustic Scattering Problem .....	2
3 A Fictitious Domain Decomposition Method .....	3
4 A Blended Fictitious/Real Domain Decomposition Method .....	10
5 Applications .....	15
6 Conclusions .....	24
References .....	25
<b>Dual-Primal FETI Methods with Face Constraints</b> .....	27
<i>Axel Klawonn, Olof B. Widlund, Maksymilian Dryja</i>	
1 Introduction .....	27
2 Elliptic Model Problem, Finite Elements, and Geometry .....	28
3 New Dual-Primal FETI Methods .....	30
4 Some Auxiliary Lemmas .....	34
5 Convergence Analysis .....	35
References .....	40
<b>A FETI - DP Method for a Mortar Discretization of Elliptic Problems</b> .....	41
<i>Maksymilian Dryja, Olof B. Widlund</i>	
1 Introduction .....	41
2 Differential and Discrete Problems .....	42
3 A Dual-Primal Formulation of the Problem .....	43
4 Convergence Analysis: the Upper Bound. ....	45
5 Convergence Analysis: the Lower Bound .....	48
References .....	52
<b>Balancing Neumann-Neumann Methods for Mixed Approximations of Linear Elasticity</b> .....	53
<i>Paulo Goldfeld, Luca F. Pavarino, Olof B. Widlund</i>	
1 Introduction .....	53
2 Mixed Methods for Linear Elasticity: Continuous and Discrete Problems .....	54
3 Substructuring for Saddle Point Problems .....	59
4 A Neumann-Neumann Preconditioner .....	62
5 Main Result .....	66
6 Variable Coefficient and Composite Materials .....	66

7 Numerical Experiments .....	67
References .....	74
<b>Partition of Unity Coarse Spaces and Schwarz Methods with Harmonic Overlap</b> .....	77
<i>Marcus Sarkis</i>	
1 Introduction.....	77
2 Notations .....	79
3 Overlapping Additive Schwarz (AS) Methods .....	80
4 AS Methods with Harmonic Overlap (ASHO) .....	81
5 Hybrid Methods with PU Coarse Spaces .....	82
6 Remarks about ASHO Methods.....	83
7 Theoretical Analysis.....	84
8 Numerical Experiments and Final Remarks .....	89
References .....	94
<b>Convergence of Some Two-Level Overlapping Domain Decomposition Preconditioners with Smoothed Aggregation Coarse Spaces</b> .....	95
<i>Caroline Lasser, Andrea Toselli</i>	
1 Introduction.....	95
2 Problem Setting and Two-Level Overlapping Preconditioners .....	98
3 A Convergence Result .....	99
4 Smoothed Aggregation .....	102
5 An Improved Convergence Result .....	106
6 Some Choices for the Smoother .....	108
7 Numerical Results .....	113
References .....	114
<b>Wavelet/FEM Coupling by the Mortar Method</b> .....	119
<i>Silvia Bertoluzza, Silvia Falletta, Valérie Perrier</i>	
1 Introduction.....	119
2 The Mortar Method with Approximate Constraint .....	120
3 Wavelet/FEM Coupling .....	125
References .....	131
<b>Non-Conforming <math>hp</math> Finite Element Methods for Stokes Problems</b> .....	133
<i>Faker Ben Belgacem, Lawrence K. Chilton, Padmanabhan Seshaiyer</i>	
1 Introduction.....	133
2 The Stokes Problem and its Non-Conforming $hp$ Discretization ....	134
3 Convergence Estimates .....	137
4 Mixed Method Implementation .....	138
5 Numerical Results .....	138
References .....	144

<b>A Defect Correction Method for Multi-Scale Problems in Computational Aeroacoustics</b> .....	147
<i>Georgi S. Djambazov, Choi-Hong Lai, Koulis A. Pericleous, Zong-Kang Wang</i>	
1 Introduction .....	147
2 The Defect Correction Method .....	148
3 Coarse Grid Sound Source Retrieval .....	151
4 Numerical Experiments .....	152
5 Conclusions .....	156
References .....	156
 <b>Domain Decomposition Methods for Time-Harmonic Maxwell Equations: Numerical Results</b> .....	157
<i>Ana Alonso Rodríguez, Alberto Valli</i>	
1 The Time-Harmonic Maxwell Equations in a Conductor .....	157
2 Domain Decomposition Algorithms for the Time-Harmonic Maxwell Equations in a Conductor .....	158
3 Numerical Results for the Time-Harmonic Maxwell Equations in a Conductor .....	160
4 The Eddy-Current Problem and a Domain Decomposition Algorithm for its Solution .....	165
5 Numerical Results for the Eddy Current Problem .....	167
References .....	171
 <b>Iterated Frequency Filtering Preconditioners</b> .....	173
<i>Yves Achdou, Frédéric Nataf</i>	
1 Introduction .....	173
2 Filtering Factorizations .....	175
3 Adaptive Filtering .....	179
4 The Dimension-wise Iterated Frequency Filtering Preconditioner ...	180
5 The Complete Algorithm .....	181
6 Numerical Experiments Without Adaptivity .....	182
7 Numerical Experiments with the Adaptive Method .....	184
References .....	186
 <b>A “Parareal” Time Discretization for Non-Linear PDE’s with Application to the Pricing of an American Put</b> .....	189
<i>Guillaume Bal, Yvon Maday</i>	
1 Introduction .....	189
2 Problem Formulation .....	190
3 Analysis of the Algorithm for Linear PDE’s .....	191
4 Application to a Nonlinear Parabolic Problem .....	197
5 Pricing of an American Put .....	197
References .....	201

<b>The Influence of Quadrature Formulas in 2D and 3D Mortar</b>	
<b>Element Methods</b> .....	203
<i>Yvon Maday, Francesca Rapetti, Barbara I. Wohlmuth</i>	
1 Introduction .....	203
2 Problem Formulation and Notation .....	204
3 Problem Discretization .....	205
4 Matrix Form of the Discrete Problem .....	211
5 Numerical Results in 3D .....	213
6 Numerical Results in 2D .....	218
References .....	221
<b>Portable Efficient Solvers for Adaptive Finite Element</b>	
<b>Simulations of Elastostatics in Two and Three Dimensions</b> .... 223	
<i>Andrew C. Bauer, Swapan Sanjanwala, Abani K. Patra</i>	
1 Introduction .....	223
2 Model Problem and Finite Element Approximation .....	224
3 Solution Algorithms .....	227
4 Portable Hybrid Solvers .....	230
5 Numerical Results .....	236
6 Conclusions and Future Work .....	241
References .....	242

Recent Developments in Domain Decomposition  
Methods
