

Contents

| | | |
|----------|--|----------|
| 1 | Introduction | 1 |
| | U. SOMMER, B. WORM | |
| 1.1 | The Intellectual Debate Until 1990 | 2 |
| 1.2 | Progress During the Last Decade | 3 |
| 1.3 | Consequences for the Structure of the Book | 4 |
| | References | 4 |
| | | |
| 2 | Competition in Well-Mixed Habitats: From Competitive Exclusion to Competitive Chaos | 7 |
| | J. PASSARGE, J. HUISMAN | |
| 2.1 | Introduction | 7 |
| 2.2 | Competition for a Single Abiotic Resource | 9 |
| 2.2.1 | Growth of a Single Species | 9 |
| 2.2.2 | Competitive Interactions | 11 |
| 2.2.3 | Competition for Light | 13 |
| 2.3 | Resource Storage | 15 |
| 2.3.1 | A Competition Model Based on Storage | 15 |
| 2.3.2 | Storage in a Constant Environment | 16 |
| 2.3.3 | Storage in a Variable Environment | 17 |
| 2.4 | Competition for a Single Biotic Resource | 18 |
| 2.5 | Competition for Two Resources | 21 |
| 2.5.1 | Essential vs. Substitutable Resources | 21 |
| 2.5.2 | Abiotic Resources | 22 |
| 2.5.3 | Biotic Resources | 25 |
| 2.6 | Competition for Three Resources | 28 |
| 2.6.1 | Competitive Oscillations | 28 |
| 2.6.2 | Competitive Chaos | 30 |
| 2.7 | Discussion | 34 |
| | References | 38 |

| | | |
|----------|---|-----------|
| 3 | Spatial Models of Competition | 43 |
| | C.A. KLAUSMEIER, D. TILMAN | |
| 3.1 | Introduction | 43 |
| 3.2 | Implicitly Spatial Models | 45 |
| 3.2.1 | Single Species Model | 45 |
| 3.2.2 | Two Species Models | 46 |
| 3.2.3 | Conclusions | 56 |
| 3.3 | Explicitly Spatial Models | 57 |
| 3.3.1 | Interacting Particle Systems | 57 |
| 3.3.1.4 | Conclusions | 59 |
| 3.3.2 | Point Process Models | 59 |
| 3.3.3 | Pair Approximation and Moment Methods | 60 |
| 3.3.4 | Reaction-Diffusion Models | 61 |
| 3.4 | Comparing and Connecting Methods | 64 |
| 3.5 | Underlying Spatial Heterogeneity | 67 |
| 3.5.1 | Reaction-Diffusion Models | 67 |
| 3.5.2 | Neighborhood Models | 68 |
| 3.5.3 | Patch Models | 68 |
| 3.5.4 | Conclusions | 70 |
| 3.6 | Competition and Coexistence | 70 |
| 3.7 | Future Directions | 72 |
| 3.7.1 | More Work on Environmental Heterogeneity | 72 |
| 3.7.2 | Combining Population and Ecosystem Perspectives | 73 |
| 3.7.3 | Competition for Light Among Terrestrial Plants | 73 |
| 3.7.4 | Evolution and Community Assembly | 74 |
| | References | 75 |
| | | |
| 4 | Competition and Coexistence in Plankton Communities . . | 79 |
| | U. SOMMER | |
| 4.1 | Introduction | 79 |
| 4.1.1 | What Makes Plankton Competition Special? | 79 |
| 4.1.2 | The Chemostat as an Experimental System | 80 |
| 4.2 | Competition Experiments in Laboratory Microcosms | 84 |
| 4.2.1 | Competition Experiments Under Constant Conditions . . . | 84 |
| 4.2.2 | Competition Experiments Under Temporally Variable Conditions | 89 |
| 4.3 | Experiments in Field Mesocosms | 94 |
| 4.4 | Tests of the Intermediate Disturbance Hypothesis by Field Data | 98 |
| 4.5 | Herbivory and Diversity | 101 |

| | |
|---|-----|
| Contents | IX |
| 4.6 The Role of Abundance and of Seasonality | 102 |
| 4.7 Conclusions | 104 |
| References | 105 |
| 5 Competition and Coexistence in Mobile Animals | 109 |
| M. RITCHIE | |
| 5.1 Introduction | 109 |
| 5.2 Competition Among Mobile Animals | 111 |
| 5.3 Heterogeneity, Trade-Offs, and Competition | 118 |
| 5.4 Scale and Heterogeneity | 120 |
| 5.5 New Challenges | 126 |
| References | 128 |
| 6 Competition, Coexistence and Diversity on Rocky Shores . | 133 |
| B. WORM, R. KAREZ | |
| 6.1 Introduction | 133 |
| 6.1.1 What Distinguishes Rocky Shores from Other Communities? | 133 |
| 6.1.2 Evolution of Competition Theory | 136 |
| 6.2 Disruption of Competitive Exclusion: The Non-Equilibrium View | 137 |
| 6.2.1 Keystone Predation and Herbivory | 137 |
| 6.2.2 Strong vs. Weak Interactors | 140 |
| 6.2.3 The Effects of Physical Disturbance | 141 |
| 6.3 Coexistence Through Trade-Offs: The Equilibrium View . . | 144 |
| 6.3.1 The Resource-Ratio Hypothesis | 145 |
| 6.3.2 The Competitive Hierarchy Hypothesis | 147 |
| 6.3.3 Intransitive Competitive Networks | 149 |
| 6.4 Synthesis: Integrating the Effects of Competition, Consumption and Disturbance | 152 |
| 6.4.1 Consumer vs. Resource Control of Species Diversity | 152 |
| 6.4.2 An Integrated Competition Model | 153 |
| 6.5 Conclusion | 157 |
| 6.5.1 Unifying Competition Theory | 157 |
| 6.5.2 Competition, Coexistence and the Human Impact | 157 |
| References | 158 |

| | | |
|--------------|---|----------------|
| 7 | Competition and Coexistence in Terrestrial Plants | 165 |
| | J. FARGIONE, D. TILMAN | |
| 7.1 | Introduction | 165 |
| 7.2 | Competition | 166 |
| 7.2.1 | Resource Competition | 166 |
| 7.2.2 | For Which Resources Do Species Compete? | 173 |
| 7.2.3 | Physiological and Morphological Mechanisms of Competition | 175 |
| 7.2.4 | Competition Summary | 180 |
| 7.3 | Coexistence | 181 |
| 7.3.1 | Neutral Theory of Biodiversity | 181 |
| 7.3.2 | Spatial Heterogeneity | 183 |
| 7.3.3 | Competition-Colonization Trade-Off | 188 |
| 7.3.4 | Temporal Variability | 192 |
| 7.3.5 | Additional Trophic Levels | 194 |
| 7.3.6 | Multiple Mechanisms of Coexistence and Limits to Diversity | 196 |
| 7.3.7 | Coexistence Summary | 197 |
| 7.4 | Conclusion | 198 |
| | References | 198 |
| 8 | Synthesis: Back to Santa Rosalia, or No Wonder There Are So Many Species | 207 |
| | U. Sommer, B. Worm | |
| 8.1 | Trade-Offs | 208 |
| 8.2 | Disturbance, Predation and Competition | 209 |
| 8.3 | The Spatial Dimension | 210 |
| 8.4 | Self-Generated Heterogeneity | 211 |
| 8.5 | Exclusive Resources | 212 |
| 8.6 | Slow Exclusion | 213 |
| 8.7 | Equilibrium vs. Non-Equilibrium Concepts | 213 |
| 8.7.1 | The Semantic Problem | 214 |
| 8.7.2 | The Scale Problem | 215 |
| 8.8 | Future Challenges | 216 |
| | References | 217 |

Competition and Coexistence

Sommer, U.; Worm, B. (Eds.)

2002, XI, 223 p., Hardcover

ISBN: 978-3-540-43311-8
