1	Solution Structure in Supercritical Fluids	1
1.1	Introduction.....	1
1.1.1	What is a Supercritical Fluid?	1
1.1.2	Studies of Supercritical Fluids at the Molecular Level	2
1.2	Solvation Structure from Spectroscopy	3
1.2.1	Introduction	3
1.2.2	Electronic Transitions	4
1.2.3	Vibrational Spectra.....	10
1.3	Solvation Structure from Molecular Simulations.....	18
1.3.1	Molecular Interactions in Supercritical Fluids	18
1.3.2	Introduction to Molecular Simulation	23
1.3.3	Solvation Structure in Supercritical Fluids.....	30
1.4	Static Properties of Supercritical Fluids.....	36
1.4.1	Excess Thermodynamic Quantities	37
1.4.2	Solubility	42
1.4.3	Adsorption.....	47
1.5	Dynamic Properties of Supercritical Fluids	51
1.5.1	Dynamics of Clusters in Supercritical Fluids.....	51
1.5.2	Diffusion and Viscosity.....	59
	References	64
2	Phase Equilibria and Static Properties	71
2.1	Thermophysical Properties of Supercritical Fluids.....	71
2.1.1	Behavior of Supercritical Fluids.....	71
2.1.2	Measurement of the Critical Point of Liquid and Vapor.....	77
2.2	Phase Equilibria for a Mixture with a Supercritical Fluid	78
2.2.1	Phase Rule	78
2.2.2	Phase Equilibria and Phase Diagrams	79
2.2.3	Experimental Phase Diagrams for a Binary Mixture	84
2.3	Measurement of Phase Equilibria	85
2.3.1	Static Method	85
2.3.2	Dynamic Method.....	90

2.4	Prediction of Phase Equilibria.....	98
2.4.1	Fundamental Equations.....	98
2.4.2	Empirical Equation of State	99
2.4.3	Mixing Rules.....	101
2.4.4	Correlation of Vapor–Liquid Equilibria	101
2.4.5	Correlation of Solubility of the Solid Component in a Supercritical Fluid	102
2.4.6	Correlation of Entrainer Effect.....	105
2.5	Group Contribution Method.....	108
2.5.1	Prediction of Excess Gibbs Free Energy Using the Group Contribution Method (ASOG and UNIFAC).....	110
2.5.2	EOS-Group Contribution Method.....	111
2.5.3	Group Contribution Equation of State (GC-EOS)	119
	References	122
3	Transport Properties of Supercritical Fluids.....	127
3.1	Viscosity	127
3.1.1	Definition and General Behavior of Viscosity	128
3.1.2	Measurement of Viscosity.....	131
3.1.3	Correlation.....	138
3.1.4	Critical Anomaly of Viscosity.....	142
3.1.5	Remarks.....	146
3.2	Thermal Conductivity	147
3.2.1	Definition and Units of Thermal Conductivity	147
3.2.2	Measurement of Thermal Conductivity	148
3.2.3	General Behavior of Thermal Conductivity.....	154
3.2.4	Correlation.....	157
3.2.5	Critical Anomaly of Thermal Conductivity	166
3.3	Binary Diffusion Coefficient	172
3.3.1	Definition of Binary Diffusion Coefficients	173
3.3.2	Measurement of Binary Diffusion Coefficient.....	174
3.3.3	Correlations.....	181
3.3.4	Pseudo-Binary Diffusion Coefficients in Mixture Solvents...191	
3.3.5	Critical Anomaly of Diffusion Coefficient	193
3.3.6	Remarks.....	198
	References	199

4	Extraction and Separation Using Supercritical Fluids	207
4.1	Principles for Supercritical Fluid Separation	207
4.1.1	Introduction	207
4.1.2	Solubility of a Nonvolatile Compound in a Supercritical Fluid	207
4.1.3	Solubility of a Solid Solute Mixture in a Supercritical Fluid	210
4.1.4	Fluid–Liquid Equilibria for a Ternary Mixture.....	214
4.1.5	Adsorption in the Presence of a Supercritical Fluid.....	216
4.1.6	Supercritical Fluid Extraction	218
4.1.7	Supercritical Fluid Fractionation of Polymers	221
4.1.8	Multistaged Countercurrent Extraction	222
4.1.9	Chromatographical Separation Using Supercritical Fluid.....	223
4.1.10	Reduction of Organic Solvent Usage in Extraction	224
4.2	Process Development Studies for Separation of Chemicals	224
4.2.1	Introduction	224
4.2.2	Separation of Organic + Water Liquid Mixtures.....	224
4.2.3	Crystallization Separation of Aromatic Hydrocarbons	226
4.2.4	Supercritical Fluid Adsorption Process.....	231
4.2.5	Polymer Processing.....	234
4.2.6	Treatment of Various Waste Streams.....	237
4.3	Extraction and Separation of Natural Products	239
4.3.1	Phase Equilibria for Components in Natural Materials.....	239
4.3.2	Solid Material Processing.....	242
4.3.3	Liquid Material Processing	246
4.3.4	Pressure Swing Adsorption	256
4.4	Separation and Analysis by Supercritical Fluid Chromatography ...	260
4.4.1	Introduction	260
4.4.2	Characteristics of Supercritical Fluid Chromatography	260
4.4.3	Instrumentation.....	266
4.4.4	Control of Retention and Selectivity	273
4.4.5	Measurement of Solubility and Phase Behavior Using Supercritical Fluid Chromatography Techniques	274
	References	276
5	Material Processing Using Supercritical Fluids.....	281
5.1	Fractionation, Debinding and Drying	281
5.1.1	Fractionation of Polymers	281
5.1.2	Phase Separation of Polymer Solutions.....	283

5.1.3	Devolatilization of Polymers.....	285
5.1.4	Debinding of Molded Fine Ceramics	289
5.1.5	Drying of Alkogels	293
5.2	Crystallization Using a Supercritical Fluid	299
5.2.1	Rapid Expansion of Supercritical Solutions (RESS)	299
5.2.2	Gas Anti-Solvent (GAS)	310
5.3	Processing of Polymeric Materials Using Supercritical Fluids.....	319
5.3.1	Solubility and Diffusivity of Gases in Polymers.....	320
5.3.2	Crystallization of Plastics Induced by Supercritical Fluid	324
5.3.3	Batchwise Production of Microcellular Thermoplastics	326
5.4	Hydrothermal Synthesis of Metal Oxide.....	331
5.4.1	Principle of Hydrothermal Synthesis in Supercritical Water.....	331
5.4.2	Key Features of Hydrothermal Synthesis in Supercritical Water.....	332
5.4.3	Applications of Hydrothermal Synthesis in Supercritical Water.....	337
	References	340
6	Reactions in Supercritical Fluids	347
6.1	Reactions and Reaction Theory in Supercritical Fluids	347
6.1.1	Introduction	347
6.1.2	Characteristics of Reactions in Supercritical Fluids.....	347
6.1.3	Reaction Mechanism and Reaction Rate in Supercritical Fluids	350
6.2	Characteristics of Supercritical Fluids as Reaction Solvents	357
6.2.1	Introduction	357
6.2.2	Supercritical Carbon Dioxide.....	360
6.2.3	Supercritical Water.....	360
6.2.4	Supercritical Methanol	362
6.3	Oxidation and Hydrolysis Reactions in Supercritical Water	364
6.3.1	Oxidation and Related Reactions	364
6.3.2	Hydrolysis Reactions.....	374
6.4	Organic and Catalytic Reactions in Supercritical Carbon Dioxide ..	381
6.4.1	Introduction	381
6.4.2	Recent Advances in Organic Reactions in Supercritical Fluids	383
6.4.3	Homogeneous Catalytic Reactions in Supercritical Fluids	388
6.4.4	Concluding Remarks	402

6.5 Reactions of Enzymes and Molecular Aggregates in Supercritical Fluids.....	403
6.5.1 Introduction	403
6.5.2 Enzymatic Reactions in Supercritical Carbon Dioxide	405
6.5.3 Reactions in Microemulsions Formed in Supercritical Fluids	411
6.5.4 Concluding Remarks	414
6.6 Heterogeneous Catalysis in Supercritical Fluids.....	415
6.6.1 Introduction	415
6.6.2 Fischer–Tropsch Synthesis in Supercritical Fluids	416
6.6.3 Synthesis of Fine Chemicals in Supercritical Fluids.....	420
6.6.4 Kinetics of Heterogeneous Catalysis in Supercritical Fluids	421
6.6.5 Concluding Remarks	425
References	426
Appendices	437
Subject Index	441

Supercritical Fluids

Molecular Interactions, Physical Properties and New
Applications

Arai, Y.; Sako, T.; Takebayashi, Y. (Eds.)

2002, XX, 448 p., Hardcover

ISBN: 978-3-540-41248-9
